#### A107.4.1 Definition and Requirements

A. Access line service for Payphone Service Provider (PSP) telephones is an exchange line service provided at the request of a subscriber for telecommunication use by the general public.

(D)

1. This access line service is provided on a flat rate basis in wire centers noted in paragraph A107.4.2. (T) (D)
2. This access line service is provided for use with PSP non-coin-operated public telephones or PSP coin-operated public telephones. (D)
3. PSP telephones may utilize "store and forward" technology to complete 0+ local, intraLATA and interLATA collect-only calls from prisons or jails. All inmate telephones which offer automated collect-only service must be equipped with both an acceptance and rejection response mechanism so if neither action is taken the call is terminated and not billed. (D)
4. The subscriber shall be responsible for the installation, maintenance and operation of PSP telephones used in connection with this service. (D)
5. PSP telephones must be connected to the Company network in compliance with Part 68 of the F.C.C. Rules and Regulations. (D)
6. The service is furnished subject to the condition that all applicable terms and conditions in Section A2. will be adhered to, with the exception of A2.2.1 A and B., which restrict the use of service and prohibit payment to the customer by another for use of the service. (D)
7. The service is provided for use by the subscriber but may be used by others when so authorized by the subscriber, provided that all such usage is subject to the provisions of this Guidebook. (D)
8. This service is not subject to concessions. (D)
9. This service may not be suspended at a reduced rate. (D)
10. Access line service for PSP telephones cannot be included on accounts containing other classes of service. A separate account is required for this offering at each location. (D)
11. This access line provides screening information to prevent the operator from allowing toll charges against the subscriber's line. The operator also cannot perform coin collecting functions. (D)
12. The Company is not responsible for refunds of coins deposited in PSP coin-operated telephones. (C) (D)
13. Customer-provided public telephones may only be connected to access line service for PSP telephones. (D)
14. The subscriber to this service will be responsible for any and all toll charges billed to the subscriber's account. (D)
15. Providers of public voice facsimile services which are transmitted over the public switched network are required to obtain Access Line Service for PSP Telephones for connection to the network. The term "Voice Facsimile service" refers to the use of devices providing facsimile service with associated voice capability so that the end user is able to make conventional voice calls as well as electronic transmissions over the same instrument. Provision for such services is subject to the rates, terms and conditions set forth herein for Access Line Service for PSP Telephones. (D)
16. For customers subscribing to Caller ID - Deluxe, as specified in A13.19.5 B., if the incoming call originates from a customer-provided public telephone, the name information transmitted will always be "Pay Phone". (D)
