### A12.7 Direct-In-Dialing (DID) to Customer-Premises Located Switching Systems

#### A12.7.1 General

- A. DID service permits calls incoming to a PBX system, Telephone Answering Service, or other Customer Premises Equipment requiring outpulsing-of-digits from the network to reach a specific station line without the assistance of an attendant. DID service is provided subject to the availability of facilities and telephone numbers and other conditions as specified in Section A2.3.1 and A15. (T)
- B. The rates specified herein are in addition to the rates shown elsewhere in the *Guidebook* for the services with which this offering is associated (e.g., central office PBX trunks, access lines, Sharing and Resale of Exchange Service, etc.) (T)
- C. DID service is optionally available with Identified Outward Dialing (IOD) service and includes central office switching equipment necessary for in-dialing from the network directly to stations associated with customer premises switching equipment. Subscribers to DID service will be required to maintain an adequate number of DID trunks as determined by the Company in order to provide quality grade of service and prevent Network degradation.
- D. The service must be provided on all lines in a trunk group arranged. Where DID is required on more than one group of trunks or central office lines, each such group shall be considered as a separate DID service.
- E. The assignment of telephone numbers and the sequence of the numbers assigned to a DID service is made at the discretion of the Company. Where the equipment configuration requires the assignment of blocks of telephone numbers or where the customer requests additional blocks of telephone numbers held in reserve for future use, rates and charges as shown in Section A12.7.2 are applicable for each unused block of telephones. The Company does not guarantee to provide DID numbers arranged in a consecutive manner. If the DID numbers provided can not be arranged in a consecutive manner, they will still be provided at rates and charges for consecutive numbers. When a number is removed from an existing consecutive DID group, the installation charge and monthly rates for Non-Consecutive DID apply to the remaining numbers. If a customer requesting Non-Consecutive DID numbers does not have DID service at the time the Non-Consecutive DID numbers are requested, a minimum of 20 Non-Consecutive DID numbers must be ordered.
- F. When equipment or service of a special type arrangement is requested and provided, rates and charges are based on costs involved to meet the individual requirements of each case.

### A12.7 Direct-In-Dialing (DID) to Customer-Premises Located Switching Systems (Cont'd)

#### A12.7.1 General (Cont'd)

- G. Operational characteristics of interface signals between the Company-provided facilities and the customer-provided switching equipment must conform to the terms and conditions the Company considers necessary to maintain proper standards of service as specified in other sections of this guidebook.
- H. The Company shall not be responsible to the customer or authorized user if changes in protection criteria or in any of the facilities, operations, or procedures of the Company render any of the facilities provided by a customer or authorized user obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.
- I. Listings will be provided in accordance with the terms and conditions of Section A6. for PBX trunks. DID numbers furnished herein are not entitled to listings without charge. Where clients of a subscriber to DID service have no local exchange service but want to list one of these numbers, Sharing and Resale of Basic Local Exchange Services in Section A23. will be applicable.
- J. Automatic Intercept Service (AIS) for a non-listed disconnected DID telephone number will be provided at the rate shown in A12.7.2A., where facilities permit. (C)

All switching systems provided this service must be arranged to provide for the intercepting of reserved, idle and/or unassigned station numbers.

- 1. Calls to vacant, non-working and reserved numbers will be routed to the Customer Premises Equipment for handling. On incoming calls from the network to invalid numbers or restricted stations in DID equipped Customer Premises Equipment only two methods of intercept are acceptable: Attendant or Recorded Announcement. Due to the network irregularities that can be caused, no form of tone intercept is permitted.
- K. At the discretion of the Company, subject to operating limits and the availability of facilities, DID service may be provided outside the customer's normal serving central office. Where a DID trunk group is served from a central office other than the customer's normal serving central office, the appropriate mileage rates for Foreign Exchange or Foreign Central Office service, per DID trunk will apply.
- L. In addition to the rates and charges specified in Section A12.7.2, appropriate service connection, move and change charges are applicable to the establishment or rearrangement of trunks and numbers in connection with providing DID service.
- M. Installation charges for DID central office switching equipment are not applicable if the customer presently subscribes to DID service and changes the type of customer premises switching equipment or if the customer subscribes to Centrex-CU service which has DID as a feature and changes to another type of customer premises switching equipment with DID service. The following provisions apply:

This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.
