

**CENTRAL OFFICE TO PREMISES FACILITIES (SERVICE TRANSPORT FACILITIES)****A. Regulations**

1. Customer premises are connected to the Company's central office by means of Service Transport Facilities.<sup>/1/</sup>

The use of these facilities is limited to those services provided for in this guidebook whose regulations permit their use. As such, STF is only offered in accordance with those services.

The part of the Service Transport Facilities (STF) rate that is attributable to Network Access is determined by the average rate per pair for all STF serving a customer multiplied by the equivalent trunks required for all services using those facilities.

Equivalent trunk values for Centrex are shown in Part 4, Section 2, *Trunk Equivalency*.

2. Service Transport Facilities are provided on a one facility pair-at-a-time basis, or in the following complements:<sup>/2/</sup>

100 pair	1500 pair
200 pair	1800 pair
300 pair	2100 pair
400 pair	2400 pair
600 pair	2700 pair
900 pair	3000 pair
1200 pair	3600 pair

3. Service Transport Facilities leased on a complement basis are available on a contract basis only. The contract periods are 3 years, 5 years and 7 years.

The monthly rate for Service Transport Facilities provided under contract will not be subject to Company initiated increases.

/1/ At the option of the customer, channelized local channels as provided in Part 20, Section 15, may be used in place of Service Transport Facilities.

/2/ Effective September 15, 2000, Service Transport Facilities (STF) provided in Pair Complements are no longer available to new customers. Existing customers under contract may retain or add to the STF pair complements under contract.

**CENTRAL OFFICE TO PREMISES FACILITIES (SERVICE TRANSPORT FACILITIES) (cont'd)****A. Regulations (cont'd)**

## 3. (cont'd)

The Company will notify the customer in writing at least 60 days before the expiration of the existing contract. At this time, the customer will have the opportunity to extend the existing contract for one additional period not to exceed the original contract life at a rate not to exceed a 15% increase for a 3 year contract, 20% increase for a 5 year contract or 25% increase for a 7 year contract; enter into a new contract; or automatically revert, upon expiration of the existing contract, to the then current monthly rate of the 3 year contract for the complement size.<sup>/1/</sup>

If the customer chooses not to extend or renew the contract, thereby reverting to the current monthly rate of the 3-year contract for the complement size, the monthly rate will be subject to increases approved by the Illinois Commerce Commission. (C)

When the customer elects to enter into a new contract, he will not be liable for the one-time charge for the existing facility complement.

## 4. Service Transport Facilities provided on a pair-at-a-time basis are provided on a one month contract.

Customers obtaining facilities on a pair-at-a-time basis may elect to obtain facilities on a complement basis and thereby gain rate stability by paying the then current one-time charge for the complement size and contract period desired.

## 5. If during a contract period additional Service Transport Facilities are required, they may be obtained either on a pair-at-a-time basis or by contracting for a larger sized or an additional complement.

If the customer elects to increase the facilities by contracting for an additional complement, the I.N.C. appropriate to the complement size and contract period chosen is applicable.

If the customer elects to contract for a larger complement size, the I.N.C. payable will equal the difference between the then current I.N.C. for the customer's existing complement and the then current I.N.C. for the larger complement.

## 6. If the customer elects to terminate the contract prior to its expiration, the customer will be liable for 70% of the monthly rate for the complement size multiplied by the number of months remaining in the contract period.

<sup>/1/</sup> This provision is applicable to contracts signed on or before November 13, 1987 and is replaced by the provisions in paragraph A.7. following for contracts signed on and after that date.

**CENTRAL OFFICE TO PREMISES FACILITIES (SERVICE TRANSPORT FACILITIES) (cont'd)****A. Regulations (cont'd)**

7. Once during the term of a 3, 5 or 7-year contract, a customer may extend that contract subject to the following conditions. The term remaining on the original contract plus the term of the extension ("term of the new agreement") may not be less than 12 months and may not exceed 84 months. This contract extension is in addition to the provisions covered in paragraphs A.3. and A.5. preceding.

The monthly line rate for the existing contract will continue during any contract extension unless a lower rate would apply to the term of the new agreement based on the then current guidebook rates for a 3, 5, or 7-year contract. If the term of the new agreement is up to 59 months, the 3 year contract rate would apply; if the term of the new agreement is from 60 through 83 months, the 5 year contract rate would apply; and if the term of the new agreement is 84 months, the 7 year contract rate would apply. The lower rate, if applicable, will become effective on the date the extension is signed. Such rate will not be retroactive. (C)

Regulations applicable to the 3, 5 or 7-year contracts apply to any extensions. (C)

8. Resale and Sharing of Service Transport Facilities

Service Transport Facilities may be resold or shared.

The customer of record shall be responsible for recurring and nonrecurring charges associated with the provision of this service and, in the event of termination of service, appropriate termination charge.

9. The provisions of Part 2, Section 2, regarding *Cancellation of Application for Service Prior to Establishment of Service* are applicable.

**CENTRAL OFFICE TO PREMISES FACILITIES (SERVICE TRANSPORT FACILITIES) (cont'd)****A. Regulations (cont'd)**

10. The I.N.C. amounts shown in B. *Rates* following may be paid in full when service is established or, if the customer can demonstrate a credit standing acceptable to the Company, be paid under the Deferred Payment of Initial Nonrecurring Charges Plan.

In addition to the provisions for *Deferred Payment of Initial Nonrecurring Charges* plan in Part 2, Section 3, the following regulations apply:

- a. The deferred amount will be adjusted using the time value of money set forth in the agreement with the customer.
- b. Payments will be due on a monthly basis.
- c. The number of payment periods may not exceed the contract duration of the Service Transport Facilities complement size selected by the customer.
- d. The present worth of any outstanding payments of deferred charges may be prepaid at any time during the deferral period. The customer may not prepay less than the total of the outstanding deferred charge.
- e. The present worth of any nonrecurring charges being spread over time, as allowed above, are to be paid in full when a customer disconnects service prior to the expiration of the selected deferral period, unless a change of lessee agreement has been accepted by the Company and the new lessee can demonstrate a credit standing acceptable to the Company. In this event, the new lessee may elect to become responsible for all remaining payments. If the new lessee chooses not to become responsible for these payments, Service Transport Facilities service will be disconnected, and the original lessee will be responsible for the immediate payment of the outstanding amount. (C)

11. Change in responsibility for payment for service, i.e., change of lessee, as provided in Part 3, Section 1, is permissible.

**CENTRAL OFFICE TO PREMISES FACILITIES (SERVICE TRANSPORT FACILITIES) (cont'd)****B. Rates**

## 1. Service Transport Facilities/Pair-at-a-Time

	Access Area		
	<u>A</u> <u>Per Month</u>	<u>B</u> <u>Per Month</u>	<u>C</u> <u>Per Month</u>
One Service Transport Facility pair, per pair	\$5.09	\$8.78	\$12.32

2. Service Transport Facility Pair Complements<sup>/1/</sup>

The rates for Service Transport Facility pair complements are dependent upon the airline distance of the customer's premises from the serving central office, contract duration and complement size.

Centrex Trunk, per STF	No Charge	\$1.00	\$4.00

/1/ Effective September 15, 2000, Service Transport Facilities (STF) provided in Pair Complements are no longer available to new customers. Existing customers under contract may retain or add to the STF pair complements under contract.

**CENTREX MESSAGE SIGNAL INTERFACE-EXPANDED (CMSI-E)****A. Description**

Centrex Messaging Signaling Interface-Expanded (CMSI-E) is a Centrex System Feature designed to link a Centrex customer's premises equipment (CPE) to the Company's central office in order to pass signaling and message detail information. This service will allow a customer with operations located in multiple Central Office locations, multiple Central Office locations and an alternative carrier's service, or a single Central Office and an alternative carrier's service in the same LATA to use a single data (CMSI-E) link.

This service is available at both a low speed (1200 baud) and a high speed (9600 baud).

This service consists of three features: Call History Package Delivery, Remote Activation of Message Waiting Indicator and Message Waiting Indication.

**B. Definitions**Call History Package

This feature provides detailed information of calls forwarded from Centrex Lines via a Centrex multiline hunt group and associated data link from the Company's Central Office to the customer-provided Message System Interface.

Remote Activation of Message Waiting Indicator

This feature has two options:

*Remote Activation of Message Waiting Indicator:*

- allows the Centrex customer to activate/deactivate an audible message waiting tone (stutter dial tone) on Centrex Lines or a visual LED indication on electronic business sets.

*Remote Activation of Message Waiting Indicator-Alternate Network Delivery:*

- allows the Centrex customer to activate/deactivate an audible message waiting tone (stutter dial tone) on Centrex Lines or a visual LED indication on electronic business sets, and
- send MWI messages to one pre-defined SS7 Point Code of its suitably equipped alternate network provider. The alternate network telephone numbers must be in the same LATA as the customer's CMSI-E link.

The *Remote Activation of Message Waiting Indicator-Alternate Network Delivery* option is limited to customers with operations in five or less Central Office locations in the LATA.

Message Waiting Indicator

This feature provides an audible tone signal, e.g., stutter dial tone, on a Centrex Line or, where technology permits, a visual LED indication on an electronic business set.

**CENTREX MESSAGE SIGNAL INTERFACE—EXPANDED (CMSI-E) (cont'd)****C. Terms and Conditions**

1. CMSI-E may be provided only from Central Offices equipped for this service, subject to the technical limitations and availability of equipment and facilities.
2. A modem is required in the central office and a compatible modem is required at the customer's premises.
3. Multi-line hunt groups will be required at the host Central Office only.
4. All customer locations linked by the CMSI-E link must be located in the same LATA.
5. A System Feature Change Charge applies for customer requested changes (e.g., Remote Activation of Message Waiting Indicator to Remote Activation of Message Waiting Indicator—Alternate Network Delivery) to the feature. See Reference Section.
6. If a customer upgrades from CMSI to CMSI-E or from 1200 to 9600 baud, only the incremental difference in non-recurring charges will be charged.

**CENTREX MESSAGE SIGNAL INTERFACE—EXPANDED (CMSI-E) (cont'd)****D. Prices****1. Service Elements**

<u>Description /Billing Code/</u>	<u>Nonrecurring Charge</u>	<u>1 Month</u>	<u>Monthly Payment</u>

**2. Other Applicable Charges and Payments**

## References:

<u>Service</u>	<u>Reference</u>
Centrex Service	Part 5, Section 1
Channel Services	Part 15, Section 2

**3. Payment Plans**

CMSI-E is an optional Centrex System Feature. See Reference Section.

<sup>/1/</sup> Requires a 3002 Dedicated Communications Service Channel between the customer premises and serving Central Office.

<sup>/2/</sup> Not available to customers who choose Remote Activation of Message Waiting Indicator-Alternate Network Delivery option

<sup>/3/</sup> Effective December 31, 2011, the 84-month Term Payment Plan (TPP) term period is no longer available for new installations or renewals of Centrex Service. Effective September 1, 2013, the 60-month TPP term period is no longer available for new installations or renewals of Centrex Service. Centrex customers currently on a 60-month or 84-month TPP term period may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then-current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply. (C)

## **CUSTOM BUSINESS SERVICES**

A. Abbott Laboratories  
Route 137 & Route 43  
North Chicago, Illinois 60064

## 1. Service Description

This service is a central office based digital business service for Abbott Laboratories in North Chicago. This service includes the following features:

- The switching equipment and facilities necessary for voice and digital data intercommunication between stations associated with the system, in-dialing directly to stations, network access, attendant call transfer of incoming calls from one station to another, identification of outgoing toll messages and billing of toll messages by line number, console or cord switchboard attendant operation, a night answering arrangement for directory number calls, attendant camp-on and indication of camp-on at stations on listed directory number calls, station transfer, consultation-hold and add-on conferencing of all calls, trunk answer from any station other than fully restricted stations, Touch-Tone calling, a listing in the Alphabetical Directory of the name of the customer, speed calling, call pick-up and call-hold, call forwarding-variable to numbers inside the system, call forwarding-don't answer, call forwarding-busy line, call diverting, data line features, a dedicated data link port, tie line terminations, foreign exchange line terminations, and Electronic Tandem Switching features.

The terms of agreement between Abbott Laboratories and the Company include criteria for installation, the start of service date, service acceptance, termination of service, system configuration, service standards, maintenance requirements and a provision for rate stability of up to 10 years.

## 2. Rates and Charges

I.N.C. Per Mo.

Per system<sup>1/</sup> \$101,033.00 \$71,456.00

/1/ Beginning with the system cutover for October, 1985, these system rates will be updated on a quarterly basis to reflect changes in the number of lines, optional features or contract length. (C)

B. The Board of Trustees of the University of Illinois,  
State of Illinois acting through the Department of Central Management Services

1. Service Description

This service is a central office based digital business service for the University of Illinois to be furnished at its Urbana-Champaign campus (UIUC) and at its Chicago campus (UIC). Included are the switching equipment and service transport facilities up to the network interface. The system is configured for: voice lines, digital data lines, digital data ports, consoles, and trunk termination for tie lines, WATS lines, FX lines, paging access trunks, and dial dictation trunks. The service at both locations is capable of supporting the following features or capabilities:

ATTENDANT FEATURES
