

1. DIGITAL TRANSPORT SERVICE (DTS)**A. Service Description**

Digital Transport Service (DTS) provides a cost effective method of delivering voice grade service from the serving central office to a customer's premises. DTS is provided exclusively with OPTINET DS1 Service (1.544 Mbps) and the 24 channels may be used for the transport of lines for termination on customer provided equipment. DTS supports Direct Inward Dialing (DID) Service, ValueLink Premier Services or Dedicated 800 Service, and Local Exchange Business Service, hereafter referred to as Trunks. Touch-Tone is a required feature of DTS.

B. Regulations

1. DTS is offered in two serving arrangements, Integrated and Non-Integrated, from central offices where the Company has arranged facilities for such service. Flat Rate and Message Rate local exchange services cannot be furnished on the same premises.
 - a. Integrated Service is an arrangement that allows for the direct termination of digital trunks from a digital central office to customer provided equipment. This arrangement supports Trunk side features only. The Integrated Arrangement is comprised of three elements, 1) Trunk Terminations, 2) OPTINET Local Distribution Channel, and 3) Digital interface Termination.
 - b. Non-Integrated Service is an arrangement that allows for the termination of PBX trunks from an Analog or Digital central office to customer provided equipment. This arrangement supports Trunk side and Line side features on those trunks. This arrangement is comprised of three elements, 1) Trunk Terminations, 2) OPTINET Local Digital Distribution Channel, and 3) Central Office Multiplexing.
2. Serving arrangements that require a mixture of Integrated and Non-Integrated terminations are provided as Non-Integrated Service.
3. The rate structure for DTS requires charges for Trunk Terminations, an OPTINET Local Distribution Channel, Company-provided DS1 Central Office Multiplexing or Digital Interface Termination (as required) and End User Common Line Charges (EUCL).

1. DIGITAL TRANSPORT SERVICE (DTS) (cont'd)**B. Regulations (cont'd)**

4. Additional charges for Central Office services and features such as: Direct Inward Dialing (DID) Service, Wide Area Telecommunications Services (WATS), Private Branch Exchange (PBX) Trunks and Dedicated 800 Service are applicable when appropriate as identified in the references in the Service References paragraph.
5. All signals generated by Network Channel Terminating Equipment (NTCE) must comply with the signal and format constraints contained in Bell Communications Research Publication TR-NPL-000054. Performance parameters for DTS can be found in Technical Reference manual, AM TR-TMO-000101. (T)
6. Availability and functionality of DTS may vary by serving central office and switch type. The Company will determine when Integrated or Non-Integrated terminations are required and whether DTS can be provisioned with the customer's service and equipment.
7. If changes in central office technology permit the Company to convert customer's Non-Integrated Termination to an Integrated Termination, the customer's rate will be adjusted to reflect the Integrated Termination rates.
8. Clear Channel Capability is an optional feature of DTS, allowing the customer to transport 1.536 Mbps on a 1.544 Mbps line with no constraint on quantity or bit sequence.
9. Temporary suspension of service is not applicable to DTS.
10. DTS is not available with Centrex Service.

1. DIGITAL TRANSPORT SERVICE (DTS) (cont'd)**C. Service References**

The Price List denotes the components necessary for DTS service which include the Trunk Terminations, OPTINET Local Distribution Channel, multiplexing (as required) and the interface connection to the network. The additional rates and charges applicable for the specific services that can be provisioned on DTS channels can be found in the references listed following.

<u>Service</u>	<u>Reference</u>
OPTINET DS1 Service	Dedicated Communications Services, Part 15
Dedicated 800 Service	Wide Area Telecommunications Service, Part 10
ValueLink Premier Service	Message Toll Services, Part 9

Message Toll Service	Message Telecommunications Service, Part 9

1. DIGITAL TRANSPORT SERVICE (DTS) (cont'd)

D. Rates and Charges

1. The rates and charges for the services provisioned on the DTS channels are specified below.
2. Rates and charges for OPTINET DS1 (1.544 Mbps) Service are specified in Dedicated Communications Services, as identified below and are in addition to the charges specified in this Section.
3. Calls will be subject to usage charges for the services provisioned on the DTS channels. Local Message charges apply to Local Service Area Calls and Message Toll charges apply to calls outside the Local Service Area.
4. Termination charges are applicable for DS1 Service and central office Multiplexing, as specified for OPTINET Dedicated Communications Services.
5. Month-to-Month service subscribers are subject to Company initiated rate changes.

2. PRIMENUMBER SERVICE**A. Description**

PrimeNumber Service is an optional intraLATA service that provides business customers with multiple locations, a single telephone number per LATA to terminate incoming calls. Calls to the single number are routed to the location nearest the calling party or as specified by the customer.

B. Definitions

Record - A record is an entry in the routing table or database which is necessary to route the incoming calls.

C. Terms and Conditions

In accordance with Part 2 Section 2 of this Guidebook, the General Regulations apply to PrimeNumber Service. (T)

The General Regulations specify Company liability associated with interruptions to service and damages associated with the provision, maintenance, or restoration of PrimeNumber Service.

The following regulations apply to PrimeNumber Service in addition to those referenced above.

1. A prospective PrimeNumber Service subscriber must make separate arrangements for business Local Exchange Access Service prior to establishment of PrimeNumber Service.
2. PrimeNumber Service is available where facilities or arrangements permit.
3. PrimeNumber Service is only available on a twelve (12) month term basis. The twelve (12) month period will begin on the completion date of the Service Order.

2. PRIMENUMBER SERVICE (cont'd)**C. Terms and Conditions (cont'd)**

4. Applicable charges for local, toll, public or semi-public calls placed to a PrimeNumber will be billed to the originating party.
5. Additional listings are available at rates provided in Part 12, Section 1. (C)
6. A unique telephone number may be assigned to only one PrimeNumber Service subscriber within a LATA.
7. PrimeNumber Service is compatible with Caller ID Service network functionality. Caller ID Service is available to PrimeNumber Service subscribers where facilities permit at the applicable Guidebook rates.
8. With establishment of PrimeNumber Service, the subscriber will be provided with a Secure ID access card. Additional or replacement Secure ID cards will be available for a separate fee to be agreed upon by the Company and the subscriber.

Secure ID cards provide the subscriber with access to the PrimeNumber Service network system in order to maintain or modify the subscriber Routing Table or Database, and to access standard PrimeNumber Service reports.

Upon receipt of the Secure ID card(s), the subscriber assumes responsibility for safeguarding the use of their assigned card(s) and for any breaches to security resulting from the loss or misuse of the Secure ID card(s).

2. PRIMENUMBER SERVICE (cont'd)

D. Features

1. Standard Features

Where facilities permit, Standard Feature(s) will be provided as integral component(s) of PrimeNumber Service.

Basic Announcement

The Basic Announcement is activated when the network is unable to automatically identify and route the telephone number of the calling party. The Basic Announcement will prompt the calling party to enter the appropriate telephone number and then forward the call to a PrimeNumber Service subscriber location.

2. Optional Feature(s)

Where facilities and number availability permit, Optional Feature(s) will be made available to PrimeNumber Service subscribers at applicable rates.

Seven (7) Digit Option

Allows a PrimeNumber Service subscriber to serve customers in a LATA with multiple NPAs with a single seven (7) digit telephone number.

Day of Year and Time of Day Routing

Allows a PrimeNumber Service subscriber to select the location to which calls will be routed based upon the time of day and day of year (specific date) that calls originate.

Day of Week and Time of Day Routing

Allows a PrimeNumber Service subscriber to select the location to which calls will be routed based upon the time of day and day of week that calls originate.

2. PRIMENUMBER SERVICE (cont'd)**E. Prices**

1. Service Element Pricing

<u>Description /Billing Code/</u>	<u>Nonrecurring Charge</u>	<u>Monthly Price</u>
PrimeNumber Service, per LATA	\$295.00	\$125.00
- 7 Digit Option, per additional NPA	295.00	95.00
Routing Table or Database		
• Initial Development or Subsequent Reload		
- First 1,000 Records	80.00	--
- Each Additional 1,000 Records or fraction thereof	70.00	--
• Storage Fee		
- per record	--	0.02
• Maintenance (Records Updated by the Company)		
- First 50 Records	5.00	--
- Additional Records beyond the first 50, per record	0.07	--
Distribution/Routing Criteria, per PrimeNumber		
- NPA or NPA/NXX	75.00	50.00
- NPA/NXX-XXXX with Zip Code	125.00	75.00

2. PRIMENUMBER SERVICE (cont'd)**E. Prices (cont'd)**

1. Service Element Pricing (cont'd)

<u>Description /Billing Code/</u>	<u>Nonrecurring Charge</u>	<u>Monthly Price</u>
Routing Options, per PrimeNumber		
- Day of Year and Time of Day	\$50.00	\$25.00
- Day of Week and Time of Day	50.00	25.00
Charge per Subscriber Route to Number/Location	--	10.00
Charge Per Call to PrimeNumber, per Subscriber Route To Number/Location		
<u>Number of Calls Per Month, Per LATA</u>		<u>Rate Per Call*</u>
1 - 15,000		0.12
15,001 - 40,000		0.06
40,001 - 80,000		0.055
80,001 or greater		0.05
<u>Additional Minutes of Use</u>		<u>Rate Per Minute</u>
Per Minute, for each minute of use beyond the first thirty (30) minutes of each message		0.04

* All calls are billed at the same rate for the billing period. The applicable Rate Per Call is determined by the volume rate schedule and the total number of calls during the billing period.

2. PRIMENUMBER SERVICE (cont'd)

E. Prices (cont'd)

2. Termination Charges

PrimeNumber Service is only available on a twelve (12) month term basis.

In the event that a subscriber initiates a Service Order request for PrimeNumber Service, and subsequently cancels the Service Order prior to full operational establishment of service, the subscriber remains liable for all nonrecurring service establishment charges specified in this Guidebook. (T)

Subscribers that cancel their PrimeNumber Service before the term expiration date will be billed a termination liability which consists of a lump sum equal to the non-usage sensitive monthly recurring charges specified in this Guidebook times the number of months remaining on the term period, rounded up to the nearest whole month. (T)

Any cancellation or termination liability lump sum payment will become due and payable in its entirety immediately upon calculation and presentation of the lump sum bill statement.

At the expiration of the twelve (12) month term period, subsequent monthly billing will revert to the PrimeNumber Service monthly rates in effect at that time, as specified in this Guidebook. Termination liability charges are no longer applicable once the term period has expired and billing reverts to a month-to-month basis. (T)

(D)

(D)

(D)

(D)

(D)

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75

Effective July 16, 2005, no further installations, moves, rearrangements, or changes of any type will be made to ISDN X.25 or Dedicated X.75 Packet Services. Customers of record on July 16, 2005 may continue their service as long as such service remains at the location at which it was being furnished on the aforementioned date. In the event that these services are discontinued at their present location for any reason, they will not be reestablished. The preceding supersedes all of the rules and regulations that follow.

A. Description

The Packet Switched Network (PSN) combines packet switching technology and digital transmission facilities to provide a switched data carriage service. The PSN is designed to provide economical, usage-sensitive data transmission for a variety of interactive (or bursty) data applications. The PSN provides for the simultaneous two-way transmission of data at speeds up to 64 kilobits per second (Kbps). Customers can choose between the ISDN X.25 access arrangement which permits PSN switching to any PSN switch in the LATA and the Dedicated X.75 Access arrangement whose PSN switching is limited to a single ISDN switch in a LATA. Access to the Packet Switch Network is limited to ISDN Access with X.25 protocol or Dedicated Access with X.75 protocol.

With packet switching technology, data streams are packetized and then moved through the network to their destinations. The packet network examines, routes, and transports packets individually without maintaining a physical path between bursts of data. In this way, greater volumes can be transported through shared network transmission facilities and individual data packets can be sent on alternate routes as the need arises, resulting in better system performance and higher network availability. The reduction in network facilities results in a more economical form of data transmission for interactive applications.

The PSN will support communications between data terminal equipment (DTE) with like protocols.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**B. Terms and Conditions**

Network User Identification (NUI) codes are assigned by the Telephone Company. One NUI is provided per Network Terminal Number (NTN). Charges apply for each additional NUI code.

Idle time in excess of 20 minutes may generate a disconnect on all switched calls except Permanent Virtual Circuit calls.

ISDN access users may require conditioning of their exchange service facility as provided in other sections of this company's Guidebook.

All charges for customer traffic originating or terminating on an X.75 port will be billed to that port. The X.75 customer will be responsible for billing the appropriate user.

If it becomes necessary to disrupt service for scheduled maintenance reasons, the disruption will occur between the hours of 2:00 a.m. to 6:00 a.m., on Sunday. The disruption period will be only for the amount of time necessary to complete the maintenance and in all cases will be held to a minimum. Except for this scheduled service interruption, a credit allowance for interruptions to service will be given in accordance with the Company's Guidebook.

The PSN requires the use of Customer Provided Equipment (CPE). This equipment, used in conjunction with the PSN port terminations, is subject to the limitations specified in the following Technical References:

<u>Protocol</u>	<u>Technical Reference</u>	(C)
X.75	AM-TR-NPL-000016	 (C)
ISDN	AM-TR-OAT-000068	

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**B. Terms and Conditions (cont'd)**

CPE used in association with the PSN is, in addition, subject to the limitations of the Technical References for Exchange Terminations. The following is a list of the Exchange Terminations available and their corresponding Technical References:

<u>Type Termination</u>	<u>Transmission Capability</u>	<u>Technical Reference</u>	(C)
Digital	Up to 56 Kbps	AM-TR-NPL-000007	
ISDN	Up to 64 Kbps	AM-TR-NPL-000068	(C)

The Technical References may be obtained from:

APEX Support Team	(T)
(734) 523-7348	(T)

The 50% Evening, Weekend and Holiday discount is available in all comparably equipped central offices.

Verification of customer provided PADs and computer equipment may be required by the Company (T) for PSN compatibility.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**C. PSN Access Arrangements**

Customers may gain access to the PSN by using the following options:

- ISDN (X.25)
- Dedicated (X.75)

ISDN X.25

ISDN X.25 provides access to the PSN via the customer's 16 Kbps D channel or 64 Kbps B channel. All applicable ISDN exchange charges are billed to the ISDN customer's exchange service. Collect calls are not accepted by the PSN.^{/1/}

(C)

ISDN uses the following protocol:

- X.25

The applicable PSN elements are:

- Optional Features

The applicable PSN usage charges are:

- Data Transport Minutes of Use
- Data Transport Kilosegments
- Fast Select (if appropriate)

/1/ Effective March 19, 2016, Collect, Person-to-Person, Bill to Third Number calls and Busy Line Verification/Interruption services are discontinued.

(N)

(N)

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)

C. PSN Access Arrangements (cont'd)

Dedicated

Dedicated Access provides a permanent connection to the PSN via a dedicated private line channel from Dedicated Communication Service in Part 15.

The following private line facilities are supported for Dedicated Access:

LADS - Requires a Type 9002 Channel used for digital transmission as defined in Dedicated Communication Service in Part 15.

Digital - Requires an OPTINET Base Rate or Direct Digital Service (DDS) Channel used for digital transmission as defined in Dedicated Communication Service in Part 15.

Dedicated Access provides call origination and termination capabilities at speeds up to 64 Kbps.

Dedicated Access provides the capability of transmitting data using the following communication protocols:

- X.75

The applicable PSN elements are:

- Exchange Termination
- Port Termination
- Fast Select (if appropriate)

The applicable PSN usage charges are:

- ISDN Interface Minutes of Use
- ISDN Interface Kilosegments
- Fast Select (if appropriate)

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**D. PSN Elements****Exchange Terminations**

Exchange Terminations are determined by type of facility used to access the PSN. The exchange termination provides Data Service Unit/Channel Service Unit (DSU/CSU) function for digital access lines.

Port Terminations

Port Terminations provide the communications interface for users accessing the PSN. They are protocol and speed specific. A NTN is provided at no charge with each Port Termination. The NTN assignment is independent of the customer's voice telephone number.

Optional Features

Certain optional features and functions are available depending on the serving packet switch.

Call Redirection - Automatically redirects calls addressed to a primary DTE, to a secondary DTE when the primary DTE is not in service, busy or designated for call redirection due to network operator request. Call redirecting ends automatically when access to the primary DTE is again possible.

Closed User Group (CUG) - A private group of users that limits communications to members within the group. The CUG allows its members to transmit and receive calls, service type permitting, to and from other members within the CUG.

Direct Call - Enables a user to automatically establish a virtual call to a predetermined NTN.

Fast Select Acceptance - Allows the customer to terminate fast select calls that originated from an end user's DTE. The fast select data is delivered to the terminating customer in the user data field of an incoming call packet. The terminating DTE then responds with either a call accepted packet or a call clear indication.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)

D. PSN Elements (cont'd)

Optional Features (cont'd)

Hunt Group - An association of ports with a single or multiple NTN's. Two features are available. The homing feature allows terminating calls to be distributed sequentially over the ports. Non-homing allows terminating calls to be distributed equally over the ports.

Multiple Network Terminal Numbers - Permits the user to have additional DTE addresses per port, thereby, permitting incoming logical transmissions to be routed by the PSN to the appropriate DTE. The available quantity of this feature may be limited by the Company.

Network User Identification (NUI) - A numeric character string, defined by the Company, used as a log-on ID. In the case of the dedicated access, the NUI may correspond to the network address.

Permanent Virtual Circuit - Establishes a logical channel between two NTN's and remains indefinitely in the data transfer mode.

Reverse Charging - Allows the originating NTN's PSN usage and holding time charges to be billed to the terminating NTN on a per session basis. The call will be set up only if the terminating NTN is configured to accept charges.

Reverse Charging Acceptance - Authorizes the terminating NTN to accept PSN usage and holding time charges from an originating NTN.

Usage Charges

Fast Select

Allows for a call request, the transmission of data and call clearing in a single exchange of packets. These packets may contain up to 128 data octets in addition to the call request information.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**D. PSN Elements (cont'd)**

Usage Charges (cont'd)

Data Transport

Charges apply for ISDN X.25. ISDN Interface usage charges apply for X.75 Dedicated Access Arrangements whose PSN switching is limited to a single ISDN switch in a LATA.

Customers who access the network via ISDN X.25 packet lines and transmit an average of 2.0 kilosegments or less of data per logical session per minute can choose between minutes of use (MOU) and kilosegment billing. Customers who transmit greater than an average of 2.0 kilosegments per logical session per minute will be billed for kilosegments transmitted. The average kilosegments per minute will be calculated for the billing period for rating purposes.

The measurement of a MOU session begins upon receipt of the call acceptance packet and ends upon receipt of the call clear packet. The minimum initial MOU session is 7 tenths of a minute and additional usage is measured in tenths of minutes. MOUs will be accumulated for the billing period for rating purposes.

Kilosegment measurement counts the number of segments transmitted. A kilosegment is 1000 segments. A segment has a billable length of 64 octets of customer information. The minimum initial session is 40 segments and additional usage is measured in segments. Segments are totaled at the end of the billing period and rounded to the next whole kilosegment for rating purposes.

ISDN Interface

The ISDN Interface is for the purpose of allowing other networks to terminate directly onto an ISDN Integrated Packet Handler (IPH). This will give the other network access to the ISDN lines served by that IPH and only that IPH. They must connect on an X.75 port connection in addition to the digital private line.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)

D. PSN Elements (cont'd)

Evening, Weekend and Holiday Discounts

An evening, weekend and holiday 50% discount in rates will apply on the following:

- Data Transport Charge
- ISDN Interface charge
- Fast select (if appropriate)

The evening discount will apply for any portion of a call occurring Monday through Friday during the period from 4:00 P.M. up to but not including 7:00 A.M.

The weekend and Holiday 50% discount will apply for any portion of a call through the entire day.

Subsequent Change

Nonrecurring Charges (NRCs) for the PSN Exchange or Dedicated Access facility, Exchange Termination and Optional Feature(s) apply for the installation of the PSN service.

Subsequent Change charge applies when changes are made to the speed associated with a port termination, when standard feature(s) associated with port or exchange terminations are added, changed or deleted, and when existing optional feature(s) are changed.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**E. General Definitions****Additional Logical Channels**

A capability which enables one or more calls to be set up on a single facility. A PSN customer may subscribe to more than one logical channel per single facility to allow two or more simultaneous calls to take place.

- One-Way Logical Channel Incoming
Logical channel capable of receiving calls only.
- One-Way Logical Channel Outgoing
Logical channel capable of transmitting calls only.
- Two-Way Logical Channel
Logical channel capable of transmitting & receiving calls.

Call Acceptance Packet

Packet sent from terminating NTN in response to call setup packet, indicating terminating NTN is ready to accept data transfer from the originating NTN.

Call Clear Packet

Packet used to terminate a call. This packet may be initiated by either the originating or terminating NTN, or by the network.

Call Setup Packet

The first packet in each session containing the call request and call answer information.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**E. General Definitions (cont'd)****Closed User Groups**

Closed User Groups (CUGs) provide a mechanism for creating private networks that restrict communications between group members and non-members in various ways. The standard CUG permits members to communicate with each other but precludes communication with non-members. The standard CUG feature may be modified to allow CUG members to communicate with other CUGs or network users and to restrict calling within a CUG. The standard CUG modification options include:

- Incoming Calls Barred (within CUG) - prohibits certain members from receiving incoming calls from others in the same CUG.
- Outgoing Calls Barred (within CUG) - prohibits certain members from placing outgoing calls to others within the CUG.
- Incoming Access (other CUG members or network users) - permits CUG members to communicate with one another and to receive calls from PSN customers who do not belong to any CUG, or from PSN customers who belong to other CUGs with outgoing access capability.
- Outgoing Access (other CUG members or network users) - permits CUG members to communicate with each other and to originate calls to other PSN customers who do not belong to any CUGs or PSN customers who belong to other CUGs with incoming access capability.

Data Terminal Equipment (DTE)

Customer provided equipment used to transmit and receive data over a communications network. Examples include data terminals, control units, personal computers and host computers.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)

E. General Definitions (cont'd)

Dedicated Access

A dedicated, full time connection to the PSN by means of a dedicated private line digital facility.

Exchange Termination

A central office cross-connection between a customer's access line and a PSN port interface. An Exchange Termination also provides modem functions for analog access lines and data service unit (DSU)/channel service unit (CSU) functions for digital access lines.

Fast Select Packet

Allows for call request, transmission of data and call clearing in a single exchange of packets. Fast Select Packets may contain up to 128 data octets in addition to the call request/clear information.

ISDN

ISDN is a local exchange telecommunication service available to residence and business customers. This service provides customers access to Circuit Switched Voice, Circuit Switched Data and Packet Switched Data subject to technical limitations, availability of facilities, and compatibility of serving digital central office technology.

ISDN Interface

ISDN Interface provides an X.75 access from an integrated packet handler in an ISDN office to another network. Only the ISDN lines served from that packet handler will have access to that particular access line.

Kilosegment

One thousand segments.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**E. General Definitions (cont'd)****Local Access and Transport Area (LATA)**

One of the United States' 161 telephone serving areas. Established as a result of the Bell System divestiture, LATA's are used to distinguish local from long distance telephone service. Service with both end points within the LATA (intra-LATA) is generally the sole responsibility of the local telephone company, while service that crosses outside the LATA (inter-LATA) is passed on to interexchange carriers.

Network Terminal Number (NTN)

Numeric character string used to identify DTE addresses on the PSN. Terminal Numbers are the data equivalent to voice telephone numbers. Customers are required to "dial" NTN's to place calls on the PSN, unless otherwise using the Permanent Virtual Circuit or Direct Call features.

Network User Identification (NUI) Code

A character string, with structure defined by the Company, used as a log-in ID.

Octet

A continuous sequence of eight binary digits (bits) of information. In most cases an octet is equivalent to a character or byte.

Packet

A group of bits including data and control elements which is switched and transmitted as a composite whole. The data and control elements and error control information are arranged in a specified format.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)

E. General Definitions (cont'd)

Packet Switch

A central office based, computer-controlled network node that performs routing, switching and customer interface functions for the PSN.

Packet Switched Network (PSN)

A packet switching network that provides economical intra-LATA data transport. The network is (T) designed to carry data in the form of packets.

Port Termination

A communications interface through which a customer obtains access to the PSN.

Protocol

The set of rules controlling and facilitating data exchange between DTEs in a data communication system. Protocols establish a formal set of conventions governing the format and relative timing of message exchange.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)

E. General Definitions (cont'd)

Segment

A continuous sequence of binary digits (bits) of information contained within a packet. A segment has a billable length of 64 octets of customer information. For example, a data packet with 64 or fewer octets is billed as one segment, a data packet with 65-to-128 octets is billed as two segments; and so on.

Virtual Circuit

A logical connection established as a result of call origination between two NTNs, that exists for a period of time until either DTE initiates the call termination.

X.25 Protocol

A CCITT communications protocol recommendation that defines the interface between a switched data network (DCE) and a user terminal or host computer (DTE).

X.75 Protocol

A CCITT communications protocol recommendation that provides the foundation for interconnecting packet switched data networks.

4. PACKET SWITCHED NETWORK (PSN) SERVICES – ISDN X.25 and Dedicated X.75 (cont'd)**F. Rates**

The charges specified herein are for PSN – ISDN X.25, and Dedicated X.75 service. These charges are in addition to all other charges for associated services and equipment necessary to provide telecommunication service.

5. DIGITAL TRANSPORT SERVICE - ENHANCED (DTS-E)

Digital Transport Service-Enhanced (DTS-E) will no longer be available to new customers (no current contract or service) on or after June 30, 2016. However, the Service will remain available for 9-1-1 Public Safety Answering Point (PSAP) customers that require channelization of their 9-1-1 trunking. It will be available to existing 9-1-1 PSAP users of the Service as well as new 9-1-1 PSAP customers needing the Service. With the noted 9-1-1- PSAP exception, customers having this service or who have placed orders which were accepted by the Company prior to this date, may continue such service from their present location, subject to the following conditions: new requests for physical changes to DTS-E, including the upgrade or downgrade of access/port speed, installation of new service, or moves to different service addresses will not be provisioned.

A. Description

Digital Transport Service - Enhanced (DTS-E) delivers voice grade service from a Company serving central office to a customer's premises. DTS-E is available in four serving arrangements, also known as Modules (see Paragraph D. in this Guidebook. DTS-E Modules 1, 2, and 3 are provided in conjunction with DS1 Service (1.544 Mbps). DTS-E Module 4 (Access Advantage Plus) is provided in conjunction with Access Advantage Plus (AA+) Transport. The 24 channels may be used for the transport of services for termination on customer provided equipment.

B. DefinitionsDS1 Service

DS1 Service denotes the channelized 1.544 Mbps DS1 facility between a customer premises and the serving central office for that location. This element is used in conjunction with Modules 1, 2, and 3, and is purchased from the Guidebook, Part 15, Section 3.

(D)

(D)

(D)

(D)

(D)

5. DIGITAL TRANSPORT SERVICE - ENHANCED (DTS-E) (cont'd)

/3/

B. Definitions (cont'd)Integrated Voice Access Trunk

This element is offered only in connection with DTS-E Module 4 (Access Advantage Plus Transport). It provides PBX customers access to the public switched telecommunications network through the Access Advantage Plus (AA+) Transport. This rate element entitles customers to the calling capabilities available for their serving central office as stated in Part 4, Section 2 of this Guidebook.

Term Payment Plan ^{/1/,/2/}

A period of time selected by the customer from among those currently offered by the Company, over which the customer agrees to pay a specified price for a product/service.

/1/ Effective August 31, 2011, 36 Month and 60 Month Term Payment Plans are no longer available for new installations or renewals of DTS-E Modules 1, 2 and 3. DTS-E Module 1, 2 or 3 customers currently on a Term Payment Plan may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12 Month TPP agreement at the then current applicable 12 Month TPP rates. If the customer does not enter into a new 12 Month TPP agreement, or request discontinuance of the service, the month-to-month tariff rates in effect at such time will automatically apply.

/2/ Effective December 1, 2015, customers may not establish new Term Payment Plans (TPP) of any length for DTS-E Modules 1, 2 or 3, and existing TPPs may not be renewed. For new service, or for existing service after any TPP expires, service will be provided only on a month-to-month basis.

/3/ Material previously appeared in Part 6, Section 7.

/3/
(N)

5. DIGITAL TRANSPORT SERVICE - ENHANCED (DTS-E) (cont'd)

/1/

C. Terms and Conditions

1. Digital Transport Service - Enhanced is offered from central offices where the Company has arranged for facilities for such service. At the request of the customer and at the discretion of the Company, DTS-E may be extended to central offices within the same Local Access Transport Area (LATA) through the application of DS1, DS3 Service, OC-n Point-to-Point Service, OC-n Dedicated Ring Service or other suitable Company services. This arrangement is not available in Independent Telephone Company serving areas.
2. The availability, functionality and capabilities of DTS-E features may vary based on the serving central office.
3. The Company reserves the right to determine when trunk-side or line-side terminations are required and whether or not DTS-E may be provisioned with the customer's service and equipment. Serving central office limitations may require restricting certain customer applications to only trunk-side terminations.
4. Clear Channel capability is an optional DS1 feature that may be used in conjunction with DTS-E. Clear Channel allows the customer to transport 1.536 Mbps on a 1.544 Mbps line with no constraint on the quantity or bit sequence. Clear Channel nonrecurring charges, as noted elsewhere in this Guidebook, are applicable only when Clear Channel is ordered subsequent to initial installation of this service.
5. When a DTS-E subscriber is also the customer of record for the Company's high speed transport services, the DTS-E customer may request provisioning of DTS-E over their high speed transport service's vacant bandwidth.
6. The same customer of record is required for both DTS-E and the associated Company DS1 facility. Sharing of common transport or DTS-E arrangements between multiple customers is not permitted.
7. Base Rate non-switched 56 Kbps service may be limited by certain combinations of switch type, signaling and frame format, to a maximum of twelve channels per DTS-E DS1 facility.

/1/

/1/ Material previously appeared in Part 6, Section 7.

(N)

5. DIGITAL TRANSPORT SERVICE - ENHANCED (DTS-E) (cont'd)**D. Features**

DTS-E is available in three serving arrangements and is furnished where facilities permit. (C)
Availability and functionality of DTS-E and its features may vary by serving central office and switch type.

Module 1

Module 1 is an arrangement that supports Business Trunk Service (e.g. 1-Way in non-DID, 2-Way Combination); toll terminals; Custom Dedicated 800 Service; and Foreign Exchange Service. Toll billing exclusion service and 900/976 Call Blocking Service are also available with Module 1.

Module 2

Module 2 is an arrangement that supports all the services contained in Module 1 plus Direct Inward Dialing (DID) Service.

Module 3

In addition to services supported in Module 1 and Module 2, Module 3 supports the following: Business Exchange Access Service; Base Rate non-switched 56 kbps Service; Direct Inward Dialing with Call Transfer Service; and Off Premise Extension Service. Call Waiting, Call Forwarding Variable, and Three Way Calling Service are available with Business Basic Exchange Service.

F. Prices (cont'd)**2. Other Applicable Charges and Payments**

In addition to the DTS-E rates and charges noted above, the following rates and charges as specified elsewhere in this Guidebook are also applicable:

- Base Rate channel mileage, channel mileage termination charges, and local distribution channel charges for the terminating equipment.
- Custom 800 usage charges
- DS1 recurring and nonrecurring charges
- DS1 Clear Channel nonrecurring charges
- DID Station Number recurring and nonrecurring charges
- Foreign Exchange channel mileage charges
- Primary Interexchange Carrier Charge (PICC)
- End User Common Line charges

Where both a trunk-side and line-side connection is requested an Additional Equipment Charge as noted in PRICES F.1 is applicable.

The Per Channel Subsequent Addition/Rearrangement Charge as noted in PRICES F.1, in addition to any applicable service connection charges normally associated with the installation or rearrangement of module services or features.

Usage charges for Message Rate Service will be charged for at the rates specified in Part 4, Section 2 of this Guidebook.

A Business Service Request Charge as specified in Part 3, Section 1 of this Guidebook is applicable in addition to a Module Install Charge.

F. Prices (cont'd)**3. Termination Charges^{/1,2/}**

Customers subscribing to DTS-E under the Term Payment Plan (TPP) requesting termination of service prior to the expiration date of the TPP term will be liable for a termination charge, which shall upon any such termination immediately become due and payable in its entirety.

1. The termination charge for all TPP terms will be calculated as follows:
 - in addition to any unpaid Special Construction or Nonrecurring Charges (excluding waived charges), customer termination liability for cancellation of DTS-E Service shall be equal to fifty percent (50%) of all recurring charges for the remaining months of the customer's TPP term.
2. Termination charges are applicable for Optinet DS1 Service used in conjunction with DTS-E Service as specified in Part 15, Section 3 of this Guidebook.

/1/ Effective August 31, 2011, 3 Year and 5 Year Term Payment Plans are no longer available for new installations or renewals of DTS-E Modules 1, 2 and 3. DTS-E Module 1, 2 or 3 customers currently on a Term Payment Plan may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 1 Year TPP agreement at the then current applicable 1 Year TPP rates. If the customer does not enter into a new 1 Year TPP agreement, or request discontinuance of the service, the month-to-month tariff rates in effect at such time will automatically apply.

/2/ Effective December 1, 2015, customers may not establish new Term Payment Plans (TPP) of any length for DTS-E Modules 1, 2 or 3, and existing TPPs may not be renewed. For new service, or for existing service after any TPP expires, service will be provided only on a month-to-month basis.

(N)

5. DIGITAL TRANSPORT SERVICE - ENHANCED (DTS-E) (cont'd)**F. Prices (cont'd)****3. Termination Charges (cont'd)**

Termination charges are not applicable if the customer converts their DTS-E Module 1, 2, or 3 service to another Company provided business exchange voice service that utilizes a Company provided DS1 or DS1 equivalent transport service as a part of the service offering. The following terms and conditions apply to this termination charge waiver:

- the customer must agree to a TPP^{/1,2/} that equals or exceeds the number of months remaining on the existing DTS-E Module 1, 2, or 3 TPP
- the number of circuits on the new TPP must be equivalent to or exceed the number of circuits under the existing TPP
- the new TPP shall begin immediately upon conversion from the existing TPP
- the new service must be provided between the same customer locations and with the same customer of record as the disconnected service
- nonrecurring charges for the new service will apply.

|
(D)

/1/ Effective August 31, 2011, 36 Month and 60 Month Term Payment Plans are no longer available for new installations or renewals of DTS-E Modules 1, 2 and 3. DTS-E Module 1, 2 or 3 customers currently on a Term Payment Plan may continue service at their existing TPP rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service by entering into a new 12 Month TPP agreement at the then current applicable 12 Month TPP rates. If the customer does not enter into a new 12 Month TPP agreement, or request discontinuance of the service, the month-to-month tariff rates in effect at such time will automatically apply.

/2/ Effective December 1, 2015, customers may not establish new Term Payment Plans (TPP) of any length for DTS-E Modules 1, 2 or 3, and existing TPPs may not be renewed. For new service, or for existing service after any TPP expires, service will be provided only on a month-to-month basis.

(D)

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE

/2/

Effective November 30, 2018, Customized Switched Metro Ethernet (CSME) Service will no longer be available for purchase by new or existing customers. The Company will no longer accept orders for adds, moves, changes or new term plans for CSME Service, and existing term plans may not be renewed, converted or extended. Following the expiration of a customer's existing CSME term agreement, service will be provided on a month-to-month basis at the applicable monthly extension rates until the service is discontinued.

(N)

(N)

A. Description

/2/

Customized Switched Metro Ethernet (CSME) Service is a switched Layer 2 Ethernet network allowing for basic metropolitan Ethernet connectivity. CSME Service allows businesses to interconnect multiple customer locations within a LATA as if they were segments on the same LAN using packet-based switching technologies. Connections at the customer premises are made using Native Ethernet interfaces and traverse the MAN over fiber facilities. CSME Service provides bandwidth of either 10 Mbps, 100 Mbps or 1 Gbps^{/1/}.

Customers connect to CSME Service via one of the following standard connections, as requested by the customer:

- 10/100 Base T (10 Mbps or 100 Mbps)
- Gigabit Ethernet (1000 Base SX, 1000 Base LX/LH or 1000 Base ZX)

Customers may connect multiple locations together, as long as they are in the same LATA or MAN and the service is available. This service acts as an Ethernet bridge supporting LAN-to-LAN connections.

CSME Service includes the connection from the customer's premise to the Ethernet network, a port on the Ethernet network and the bandwidth that will be used across the network. An optional feature is the ability to segregate customer traffic, as deemed necessary by the customer. This traffic segregation is accomplished using Ethernet Virtual Connections (EVCs), at an additional charge.

/2/

/1/ Bandwidth is inclusive of allowances for overhead within the Ethernet network. If a customer orders 1 Gbps of bandwidth on a single port, the Company reserves the right to use up to 10% of the bandwidth for traffic management.

/2/

/2/

/2/ Material formerly appeared on Part 6, Section 9, Sheet 28.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

B. Terms and Conditions

In addition to regulations set forth elsewhere in this Guidebook, the following regulations apply to CSME Service:

1. CSME Service is provided at the option of the Company where equipment and facilities permit. If appropriate facilities are not available, Special Construction charges may apply.
2. The customer provided equipment (CPE) must deliver the data signal for the CSME transport within the industry specification for the subscribed data service. See *Technical References* following.
3. CSME Service supports full duplex communication.
4. If a customer connects to the CSME network using a bridge or switch for Layer 2 connectivity, only 150 MAC addresses can be used per Layer 2 device, per port. Any additional addresses over the first 150 will be assessed an additional charge, with a limit of 200 MAC addresses total per port. An additional charge will be assessed per block of 151-200 addresses. See *Prices* following.
5. CSME Service is distance limited, based on circuit configuration as determined by the Company. A repeater may be used to extend the transmission of CSME Service. See Repeater under *Features (Optional)* following for further definition. See *Prices* following.

/1/

/1/ Material formerly appeared on Part 6, Section 9, Sheet 29.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

B. Terms and Conditions (cont'd)

6. Should the customer wish to segregate traffic, a total of 8 Ethernet Virtual Connections (EVCs) may be configured per 10/100 Base T connection. A total of 64 EVCs may be configured per 1 Gbps connection. Should the customer request more than 64 EVCs on a 1 Gbps connection, a technical review will need to be conducted to determine whether the network will support more than 64 EVCs.
7. If a customer desires that service be provided on a due date less than the standard interval, the customer may request that service be provided on an expedited basis. If the Company determines that service can be provided on the requested expedited date and spare facilities are available, the Expedite Order Charge (per port, per location) will apply. See *Prices* following.
8. If the customer cancels service prior to installation being completed, a Service Order Cancellation charge (per port, per location) will apply. See *Prices* following. The customer's intent to cancel service must be made in writing.
9. CSME Service may be available in a meet-point billing arrangement involving another Incumbent Local Exchange Carrier (ILEC) (sometimes also referred to as an Independent Company or ICO), where suitable facilities exist and where appropriate procedures for such arrangements have been put in place between the Company and the other ILEC. When the Company and another ILEC jointly provision CSME Service with the other ILEC's service, the ILEC involved shall bill the customer at that ILEC's applicable rates for their portion of the service located in their operating territory. Ordering and provisioning procedures may vary, and therefore Meet-Point rate elements and charges may not be applicable, when the other ILEC involved in the Meet-Point arrangement is an AT&T ILEC.
10. Service Level Agreements are not offered with this service. However, Credit Allowances are applicable. See *Prices* following.
11. If the 10 Mbps or 100 Mbps connection is ordered, it will only be provisioned using the 10/100 Base T connection.

/1/

/1/ Material formerly appeared on Part 6, Section 9, Sheet 30.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

B. Terms and Conditions (cont'd)

13. The responsibility of the Company shall be limited to furnishing the CSME network. Subject to this responsibility, the Company shall not be responsible for the through transmission of signals generated by CPE or for the quality of, or defects in, such transmission or the rejection of signal by CPE. The Company shall not be responsible for installation, operation, maintenance or adapting CSME to the technological requirements of specific CPE. In addition, the Company shall not be responsible to the customer if changes in any of the equipment, operations or procedures of the Company used in the provisioning of CSME render any facilities provided by the customer obsolete; or require modification or alteration of such equipment or system; or otherwise affect its use or performance, provided the Company has met all applicable information disclosure requirements otherwise required by law.
14. Customers will be permitted to move from a 10 Mbps or 100 Mbps Connection to a 1 Gbps Connection, however, the Nonrecurring Charge associated with the new 1 Gbps Connection will apply. See *Prices* following.
15. The Company will use controls to limit the amount of multicast and broadcast traffic to protect the CSME network against traffic storms. The maximum throughput of multicast traffic will be set at 1 Mbps per customer port, while the maximum throughput of broadcast traffic will be set at 200 packets per second per port. The Company recommends that customers enable controls for multicast, broadcast and unknown unicast traffic within the customer network(s).

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

C. Features

1. Standard Features

Usage, Port, Transport and Interface

Provides for the physical connection between the customer's premise and the serving wire center, as well as the bandwidth that will be used by the customer at each location. Several interface protocols are available: 10/100 Base T and Gigabit Ethernet (1000 Base SX, 1000 Base LX/LH or 1000 Base ZX).

2. Optional Features

Additional MAC Addresses

Media Access Control (MAC) Addresses denote a data link layer protocol used for Layer 2 connectivity. If a customer connects to the CSME network using a bridge or switch for Layer 2 connectivity, only 150 MAC addresses can be used per Layer 2 device, per port. Any additional addresses over the first 150 will be assessed an additional charge, with a limit of 200 MAC addresses total per port. An additional charge will be assessed per block of 151-200 addresses.

Ethernet Virtual Connections (EVC)

An Ethernet Virtual Connection is a logical point-to-point connection between two customer locations, and goes from the customer demarcation point at one location through the network to terminate at the demarcation point at the second customer location. Customers use EVCs if they desire traffic segregation, but EVCs will not provide for traffic prioritization. EVCs may be ordered to establish additional virtual connections over the same physical connection. When EVCs are ordered, the customer must designate the amount of bandwidth to be assigned to each EVC. EVCs can be set in 1 Mbps increments from 5 Mbps to 1 Gbps.

/1/

/1/ Material formerly appeared on Part 6, Section 9, Sheet 32.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

C. Features (cont'd)

2. Optional Features (cont'd)

Repeater

For those customers who are located outside normal transmission parameters, service can be provided using a repeater to be placed in Company wire centers. An engineering study will be completed to ensure transmission parameters can be met using a repeater, and the Company will determine when Repeaters are necessary. Additional charges will apply. Provisioning of CSME Service is subject to the availability and operational limitations of the equipment and associated facilities.

Meet-Point Billing Options

Meet-Point is available in two configurations:

Direct LEC Connection is provisioned using a standard CSME Connection, plus Mileage. The mileage is measured in airline miles from the CSME switch location to the ILEC (ICO) meet-point location.

GigE ICO Trunking Arrangement applies an ICO Trunk Connection Charge between the CSME switch location and the ICO meet-point location that is shared with the ILEC (ICO) Ethernet switch. The ICO Trunk Connection Charge is applied to each customer Ethernet Virtual Connection (EVC) that is transported on the GigE trunk backbone to the ICO meet-point. The ICO Trunk Mileage charge is applicable to each customer Ethernet Virtual Connection (EVC) transported across the GigE trunk when mileage exceeds 10 miles. Mileage is calculated from the CSME switch location to the ICO meet-point location.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/2/

E. Prices (cont'd)**2. Payment Plans**

- Term Payment Plans

CSME Service is only available under the Term Payment Plan (TPP) whereby customers must select either a 36- or 60^{/1/}-month period. Decreases in CSME monthly recurring charges will be passed onto customers who participate in a TPP. After the selected Term Payment Plan period is satisfied, the Monthly Extension Price in effect at the time of contract expiration will apply unless a new TPP is selected. Refer to *Term Payment Plans* in Part 2, Section 3.

- Single Payment Option (SPO)

A single payment option is available for this service. Refer to Term Payment Plans in Part 2, Section 3 for calculating Single Payment Options.

3. Termination Charges

Termination Charges will apply to service terminated prior to the contracted period. In addition to any unpaid Special Construction or nonrecurring charges (excluding any waived charges), Termination Charges will be equal to:

- 50 percent (50%) of all recurring charges for the remaining months of the customer's term.

/2/

/1/ Effective November 15, 2013, customers may not establish new term plans greater than 36 months for CSME Service, and existing term plans greater than 36 months may not be renewed or extended for a term greater than 36 months.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

E. Prices (cont'd)**3. Termination Charges (cont'd)**

Customer may move their existing service to a new location without incurring Termination Charges provided all of the following conditions are met:

- The customer maintains the existing TPP at the new location or establishes a new TPP equal to or greater than the old location;
- During the TPP, a customer may move a CSME Service location to another premises in the same LATA and keep the TPP in force without assessment of Termination Charges, provided no lapse in billing occurs;
- The customer's request for disconnect at the existing location and the request for service at the new location are received at the same time, and the customer's disconnect order for the existing service references the new connect order for the new service;
- Moves of one location to a premise in a different serving office may result in a change in the monthly charges. Nonrecurring charges as appropriate are applicable;
- If the customer moves more than one location of the service concurrently, the customer will be liable for Termination Charges, as this is considered a complete disconnect of the service.

/1/

/1/ Material formerly appeared on Part 6, Section 9, Sheet 39.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

E. Prices (cont'd)**3. Termination Charges (cont'd)**

Customers will be permitted to upgrade from CSME Service to a higher-speed service provided by the Company, without incurring Termination Charges, given all of the following conditions are met:

- An upgrade is considered an increase in speed or capacity when comparing CSME Service to the new service.
- The customer must issue a disconnect order for the existing CSME locations and place a service order for the new higher-speed service at the same locations such that there is no more than 90 days overlap in service. Termination Charges for CSME Service at the current locations will be waived.
- The term of the new higher-speed service contract must be equal to or greater than the remaining time left on the existing CSME contract.
- The existing CSME Service must have been in service for a minimum period of 15 months for a 3-year contract or 18 months for a 5-year contract.
- For customers upgrading from CSME to OPT-E-MAN® Service, the customer's network configuration must remain the same (i.e. multipoint CSME to multipoint OPT-E-MAN). The number of OPT-E-MAN locations must be greater than or equal to the current number of CSME locations.
- For customers upgrading CSME to OPT-E-MAN Service, a minimum of 50% of the connection speed for each individual connection must be maintained:
 - If customer has a 1 Gbps CSME connection, then customer must purchase a minimum 500 Mbps OPT-E-MAN connection
 - If customer has a 100 Mbps CSME connection, then customer must purchase a minimum 50 Mbps OPT-E-MAN connection
 - If customer has a 10 Mbps CSME connection, then customer must purchase a minimum 5 Mbps OPT-E-MAN connection

/1/

/1/ Material formerly appeared on Part 6, Section 9, Sheet 40.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

E. Prices (cont'd)**3. Termination Charges (cont'd)**Migration to AT&T Switched Ethernet ServiceSM

Customers subscribing to CSME Service may migrate to AT&T Switched Ethernet Service provided by the Company without incurring termination liability, subject to the following conditions:

- The new AT&T Switched Ethernet Service and the existing CSME Service must be billed to the same customer of record at the same customer locations.
- The customer's existing service must have been in place for at least 12 months.
- The minimum term for the new service must be at least 12 months and must be equal to or greater than the number of months remaining in the customer's existing Term Payment Plan (TPP) term.
- The speed (capacity/bandwidth) of the new service must be equal to or greater than that of the existing service.
- The customer must issue a disconnect order for the replaced CSME Service to be effective within 90 days after the AT&T Switched Ethernet Service installation date. The disconnect and new orders must be coordinated through the Company.
- If overlapping service is required, the period will be limited to not more than 90 days and billing will apply to both services during the time both services are available.

/1/

SM AT&T Switched Ethernet Service is a service mark of AT&T Intellectual Property

/1/ Material formerly appeared on Part 6, Section 9, Sheet 40.1.

CUSTOMIZED SWITCHED METRO ETHERNET (CSME) SERVICE (cont'd)

/1/

E. Prices (cont'd)**4. Credit Allowance**

In case of an interruption to service, allowance for the period of interruption, if not due to the negligence of the customer or the customer's end user, shall be as follows: no credit shall be allowed for an interruption of less than 10 seconds. The customer shall be credited for an interruption of 10 seconds or more as follows: the credit shall be at the rate of 10/8640 of the monthly charges for the service for each period of 5 minutes or major fraction thereof that the interruption continues. The credit allowance(s) for service interruptions shall not exceed 100% of the applicable monthly rates.

The Company will be excluded from providing a Credit Allowance should any of the following conditions occur:

- Force majeure events such as, but not limited to, an earthquake, hurricane, flood, fire, storms, tornadoes, explosion, lightning, power surges or failure, fiber cuts, strikes or labor disputes, acts of war, civil disturbances, acts of civil or military authorities or public enemy, governmental orders, civil commotion, criminal actions taken against the Company, acts of God and other circumstances beyond the Company's reasonable control.
- The failures of any components beyond the local facility including the Network Interface (NI), the CSU/DSU/Channel band/Extended Demarcation are excluded from the service outage calculation.
- Data loss during the Company's scheduled maintenance window.
- Failures attributed to facilities or equipment provided by customer or its contractors, equipment vendors, another local exchange carrier or inter-exchange carrier.

/1/

/1/ Material formerly appeared on Part 6, Section 9, Sheet 41.
