Test Activation Per Event /NR9TA/	455.00	
Service Changes Per Event /REAF6/	206.67	

RESALE SELECTIVE ROUTING (RSR)

A. DESCRIPTION

Resale Selective Routing ("RSR") is an ancillary resale service which provides a Carrier the ability to route its own Operator Services (OS) and/or Directory Assistance (DA) traffic from an Ameritech resold line, according to digits dialed, (e.g., 0+/0-, 411, 555-1212, or NPA 555-1212), to an alternate Carrier trunk group. The alternate Carrier trunk group will allow Carrier's customer originated calls to route to a Carrier selected OS and/or DA platform, or an Ameritech Traffic Operator Position System (TOPS) office for separate identification and rebranding. RSR utilizes the standard Ameritech dialing plans currently used for the Ameritech end office switch in which RSR is provided.

RSR Element

RSR provides, upon request, the option to establish any technically feasible routing by class-of-call (i.e. operator services and/or directory assistance) by developing, establishing and maintaining RSR Elements [new line class codes (LCC)] which will direct RSR calls by call type to a RSR termination as required by the Carrier.

RSR Termination

The RSR termination provides for DS1 facility/trunk group ("RSR DS1 Message Trunk") access via a 1.544 Mbps Ameritech end office switch termination. This arrangement furnishes the equivalent of 24 individual network access lines. The RSR termination is used to terminate facilities/trunks used in the completion of RSR calls.

B. DEFINITIONS

Rebranding

A service option using RSR by which calls are delivered to the Ameritech TOPS platform on a separate, identifiable RSR DS1 Message Trunk which allows those calls to be answered in a manner specified by the Carrier.

RESALE SELECTIVE ROUTING (RSR) (cont'd)

C. TERMS AND CONDITIONS

1. Carrier shall order and establish RSR for OS and/or DA message traffic in each Ameritech end office switch as identified by the switch's unique eleven digit Common Language Location Identifier (CLLI) code in which RSR is requested.
2. RSR shall be available in Ameritech end office switches where technically feasible and where Ameritech end office switch capacity permits.
3. A separate RSR element is required for each new LCC.
4. RSR elements can be purchased in increments of one RSR element per new LCC in each Ameritech end office switch where RSR is requested.
5. All Ameritech resold traffic for a Carrier customer shall have the same RSR pattern.
6. All OS and/or DA message traffic transported over RSR DS1 Message Trunks between either an Ameritech end office switch and an Ameritech TOPS office or a Carrier's own or designated third-party OS/DA platform must only be used for OS and/or DA message traffic.

RESALE SELECTIVE ROUTING (RSR) (cont'd)

C. TERMS AND CONDITIONS (cont'd)

7. When routing OS and/or DA message traffic to Ameritech's TOPS office, Carriers, in addition to subscribing to RSR, are required to subscribe to the following services:
 - Use of a minimum of one RSR DS1 Message Trunk service to route traffic from each Ameritech end office switch, serving Carrier's customers, to Ameritech's TOPS office in a non-blocking manner.
 - Use of a minimum of one RSR termination service is required to terminate facilities used in the completion of RSR calls.
 - Use of RSR Branding to announce Carrier's identity as the provider of OS and/or DA to its end users.
8. If using the Ameritech TOPS platform for rebranding, the Carrier is subject to the OS and/or DA charges as specified in Part 22, Section 11 of this tariff.
9. When routing OS and/or DA message traffic to Carrier's own or designated third-party OS/DA platform, Carriers subscribing to RSR are responsible for the following:
 - Use of a minimum of one DS1 facility/trunk between the Ameritech end office switch and the Carrier designated OS/DA platform in a non-blocking manner. The Carrier may elect to subscribe to DS1 service from Ameritech.
 - Subscription to a minimum of one RSR termination service is required to terminate facilities used in the completion of RSR calls.

RESALE SELECTIVE ROUTING (RSR) (cont'd)

Subject	Technical Reference
Bellcore Notes on the Networks	SR-2275

The Technical Reference can be obtained from:

APEx Support Team
(734) 523-7348

E. Rate Application

RSR Element:

Per each RSR Element (new LCC), per Company end office switch equipped shall be applicable when a Carrier requests RSR and is applied for each Company end office switch in which a Carrier requests the activation of RSR.

RSR Branding:

The RSR Branding rate applies when Carrier requests calls delivered to Company TOPS office, using RSR service, to be branded in a manner specified by the Carrier.

RSR Termination Charges:

The RSR Termination monthly rate applies per each installed termination per Company end office switch; the initial nonrecurring charge is applicable when RSR is ordered and the subsequent nonrecurring rate is applied when each DS1 port or termination is ordered as detailed in C. above.

RESALE SELECTIVE ROUTING (RSR) (cont'd)

F. PRICES

The following prices are applicable to installations of RSR and are in addition to all other charges for associated Ameritech services and equipment necessary to provide telecommunications service.

1. Service Elements

Description /Billing Code/	Nonrecurring Charge	Monthly Price
RSR Element, (per new LCC), per switch /NR9RY/	\$338.88	
RSR Branding	354.00	
RSR Termination		
Initial order, per occasion per DS1 port (or termination)	905.75	
per individual trunk termination on DS1	498.92	
		\$70.47

2. Other Applicable Charges and Payments

In addition to RSR rates and charges noted above, the following rates and charges as specified following may also apply:

- RSR DS1 Message Trunk (T)
- Operator Service and Directory Assistance charges
