

DIGILINE SERVICE^{/1}**A. Descriptive Summary**

DigiLine Service is a Basic Rate Interface (BRI) Integrated Services Digital Network (ISDN)-based service which offers two 64 Kilobits per second (Kbps) B channels and one 16 Kbps D channel. One or both B channels may be configured for Circuit Switching or Packet Switching^{/1}. Calls over a B channel configured for Circuit Switching may be either voice or data. The D channel carries out of band signaling for the B channel(s). DigiLine Service, when configured for Circuit Switching, provides access to and from the Public Switched Telephone Network (PSTN). DigiLine Service, when configured for Packet Switching, provides access to the Company's Public Packet Switched Network (PPSN)^{/2}.

B. General

The Company will provide DigiLine Service within a suitably equipped LATA where facilities and equipment are available. This Guidebook section does not create an obligation for the Company to construct such facilities or equipment for this service. Availability of selected optional features may be dependent upon the DigiLine serving central office switching technology.

C. Service ComponentsAdditional Call Offering

A non Electronic Key Terminal Service (EKTS) feature that notifies the user of an additional Circuit Switched Voice (CSV) call that would normally be cleared because the user's interface is busy. The method of notification to the end user is customer premises equipment dependent.

Analog Member in a Hunt Group

This feature provides for an analog interface in a DigiLine Hunt Group.

Automatic Callback

This feature enables the customer to place a call to the telephone number of the last incoming call, whether or not the call was answered or the number is known. The user can dial an activation code or press a feature button to request that the network place the call. If the number of the last incoming call is busy, the Company's equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This feature cannot be activated for calls originating from a line that is forwarded or from a line or trunk not associated with a telephone number, e.g., a multiline Hunt Group.

- /1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.
- /2/ DigiLine Packet Switching is only available for installations of B Channel Packet that do not connect to the DPN Packet Switch.

DIGILINE SERVICE^{/1/} (cont'd)**C. Service Components (cont'd)**Automatic Recall

Enables the customer to automatically redial the last outgoing number by dialing an activation code or pressing a feature button to request that the network place the call. When the recalled number is busy, the Company's equipment will monitor the status of the line being redialed for a maximum of thirty minutes, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed.

Basic Electronic Key Terminal Service (Basic EKTS) Feature Package

A Circuit Switched Voice (CSV) option that enhances normal telephone use. It consists of: Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Message Waiting Indicator, Speed Call Long or Speed Call Short, and Three-way Conference Calling. A Basic EKTS terminal supports only one call appearance per number.

Basic Rate Interface (BRI)

Provides the central office hardware, software and a 144 Kbps facility required to provide DigiLine Service.

BRI to Point of Interconnection with Another Local Exchange Company

Provides the central office hardware, software and a 144 Kbps facility required to provide DigiLine Service to the point of interconnection with another Local Exchange Telephone Company.

Bridged Call Exclusion

A Basic EKTS and Call Appearance Call Handling (CACH) EKTS feature that allows a user to prohibit other stations from picking up a call on hold or bridging onto a call that is active at that terminal.

Bridging

A Basic EKTS and CACH EKTS feature that allows the user to join an active call by pressing the active call appearance button and going off hook. This establishes a three-way call. This feature is different from basic three-way calling because the third party initiates the bridge to the active call. Bridging is inhibited if Bridged Call Exclusion is activated on a terminal engaged in the active call. Only one additional shared call appearance user may bridge to an active two-way call. Bridging cannot be activated on an existing three-way call.

Call Appearance

A button on an electronic telephone set that serves as a number designation or appearance. A single number can appear on multiple electronic sets and/or multiple times on the same electronic set. A visual indicator identifies the status of the call appearance (e.g., the lamp may flash for an unanswered call, blink for a call that has been placed on hold, remain dark for an idle call appearance, or remain steady for the currently active call).

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{/1/} (cont'd)**C. Service Components (cont'd)****Call Appearance Call Handling Electronic Key Terminal Service (CACH EKTS) Feature Package**

A Circuit Switched Voice option that allows multiple numbers and call appearances. Other service features included with this package are Bridging, Bridged Call Exclusion, Call Forwarding Don't Answer, Call Forwarding Interface Busy, Call Forwarding Variable, Intercom, Key System Coverage for Analog Lines, Message Waiting Indicator, Speed Call Long or Speed Call Short, and Three-Way Conference Calling. Additional Call Offering is inherent with this feature.

Call Forwarding Don't Answer

Directs incoming calls to a preselected number when the called number is not answered after a customer specified number of rings.

Call Forwarding Interface Busy

A feature that permits calls reaching a busy number to be redirected to another number.

Call Forwarding Variable

A feature that allows a user to redirect incoming calls to another number.

Call Pickup

Allows a user to answer an incoming call to another party's telephone in the same user pickup group.

Call Transfer Disconnect

Allows a DigiLine customer to transfer a call to another number and then hang-up, leaving the two remaining parties connected. The DigiLine customer would then be free to accept another call.

Caller ID

Provides the user who is receiving a call with the number of the calling party and the name associated with that number. Upon special request from a customer, the Company will configure this feature to provide either the number or name, instead of both. This modification is provided at the same rate as the standard Caller ID feature.

Customer-Originated Trace

Allows a customer to initiate an automatic trace of the last Circuit Switched Call received by dialing an activation code or pressing a feature button. If the trace is successful, the Company's equipment will record the incoming call detail (not the conversation). The results of the trace will not be provided to the customer directly. For further action to be taken, the customer is required to contact the Company's Service Center during normal business hours.

Delayed and Abbreviated Ringing

A Basic Electronic Key Terminal Service (EKTS) and Call Appearance Call Handling (CACH) EKTS feature that alerts a terminal for a predetermined interval (abbreviated ringing) before ringing another designated EKTS terminal (delayed ringing). The customer can choose from several options for the type of audible and/or visual alerting to be given at each station.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{/1/} (cont'd)**C. Service Components (cont'd)**Detailed Call Report

Provides customers subscribing to the Measured Rate Equivalent usage option a monthly report detailing all completed local Circuit Switched calls during the billing period.

DigiLine Service Area

A Company Exchange with one or more DigiLine-equipped central offices, plus all other Company exchanges and/or zones included in an equipped central office's non-optional local calling area as defined in Part 4, Section 1.

Digital Packet Switching Usage^{/2/}

Provides for use of the Company's Public Packet Switched Network. This service is limited to customers who have purchased a Packet Switched Data option. Digital Packet Switching Usage is not available on a standalone basis.

Detailed Report

Provides a printout of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by customer account.

Kilosegment

A segment is a means of measuring the volume of transmitted information. The segment size is the number of octets of call user data contained in a packet segment. The standard Company segment size is 64 octets. The number of segments in a packet is determined by dividing the number of octets of call user data in a packet by 64 and rounding up. A kilosegment is one thousand segments.

Packet Directory Number

This is the "E-164 address" associated with packet capability on the customer ISDN-based service. The number identifies customers originating calls on the Packet Switching Network.

Packet Switching Network

Consists of the packet switches and interswitch facilities within a LATA.

Session

The time that common control network facilities are allocated to a specific switched call. It begins with call set up and continues until the common control network facilities are released for reuse by the network.

Summary Report

Provides a monthly total, on paper only, of information associated with each session including, but not limited to, call set-ups, connect time and kilosegments transmitted and received by either user identification or originating city.

- /1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.
- /2/ Packet Switching is only available for installations of B Channel Packet that do not connect to the DPN Packet Switch.

DIGILINE SERVICE^{/1/} (cont'd)**C. Service Components (cont'd)**Distinctive Ringing

Provides distinctive alerting for up to six specific numbers.

Hunt Group for Circuit Switched Data (CSD)

Provides for a predefined search (circular, linear or uniform) for an idle directory number to which a CSD call can be offered.

Hunt Group for Circuit Switched Voice (CSV)

Provides for a predefined search (circular, linear or uniform) for an idle directory number to which a CSV call can be offered. Directory numbers subscribing to hunting may not have multiple call appearances.

Hunt Group Transfer for CSD

Transfers Circuit Switched Data calls that terminate to a Circuit Switched Data Hunt Group to a backup Circuit Switched Data Hunt Group.

Intercom

Allows a CACH EKTS user to call other terminals in the CACH EKTS group with one or two-digit dialing or by activating a button on the CACH EKTS set.

Integrated Services Digital Circuit Switched Voice (CSV)/Circuit Switched Data (CSD) Transport Options

Provides for the Circuit Switched local use of the PSTN.

Key System Coverage for Analog Lines

Allows an analog station set to share calls with a CACH EKTS set.

Link Extension Equipment

Provides the additional central office hardware required to provide DigiLine Service to a customer located outside a DigiLine Service Area or as a Foreign Serving Office/Foreign Exchange (FSO/FX) arrangement.

Link Extension Facility

A 144 Kbps facility that extends from the customer's normal serving central office to their Company designated DigiLine serving office. This rate element is only applicable when the customer's exchange is not located within a DigiLine Service Area and the customer is served from a Company designated DigiLine serving office.

Logical Channel^{/2/}

A Packet Switched Data communication path which allows two-way simultaneous transmission of data packets through the network.

- /1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.
- /2/ DigiLine Packet Switching is only available for installations of B Channel Packet that do not connect to the DPN Packet Switch.

DIGILINE SERVICE^{/1/} (cont'd)**C. Service Components (cont'd)**Message Waiting Indicator

Provides the user of a message service with a visual indication that a message is waiting.

Multiple B Channel Terminals on a BRI

Allows a user to place more than two B channel terminals on a BRI. Because there are only two B channels on a BRI, only two terminals can use the B channels simultaneously. The maximum number of terminals is eight per BRI. When there are two users on a BRI, it would be possible for one user to engage both B channels and, thus, leave the other user without access to a B channel. To prevent this from occurring, Associated Groups may be defined. The first user is assigned to one Associated Group and the other user is assigned to a second Associated Group. Each Associated Group is allowed access to one B channel at any particular time. Both users are allowed access to the D channel. These capabilities are available without additional charge.

Permanent PSD B Channel^{/2/}

Packet Switching Virtual Circuit over a B channel (up to 64 Kbps) using X.25 Packet Switched Data.

Remote Access To Call Forwarding

Allows a customer at a remote location to activate/deactivate the Call Forwarding features. If a DigiLine station CPE is equipped with feature buttons and feature status lamps, the call forwarding status lamp lights when Call Forwarding is activated using remote access.

Secondary Only Number

A Circuit Switched option that allows any number other than a primary number, to be assigned to a DigiLine station. A Secondary-Only number does not have to be a primary number at another station. A DigiLine station can have one or more Secondary Only Numbers. Each Secondary Only Number can have multiple call appearances. A Secondary-Only Number can be shared among the same DigiLine customer's DigiLine stations.

Selective Call Forwarding

Allows a customer to forward selected calls to another number. A screening list of up to six numbers is created by the user via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding number only if the calling number can be obtained and is found to match a number on the screening list. If the user also subscribes to Selective Call Rejection and the same number is entered on both screening lists, the Selective Call Rejection feature must be deactivated to allow the call to be forwarded. This feature will not work if the incoming call is from a number in a multi-line hunt group unless the number is the main number of the Hunt Group, or is the number identified.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ DigiLine Packet Switching is only available for installations of B Channel Packet that do not connect to the DPN Packet Switch.

DIGILINE SERVICE^{/1/} (cont'd)**C. Service Components (cont'd)**Selective Call Rejection

Allows a customer to reject calls from up to six different numbers. When a call is placed to the user's number from a number on the screening list, the caller receives an announcement indicating that the party he/she is attempting to call does not wish to receive calls at this time. If the user also subscribes to Selective Call Forwarding and/or Distinctive Ringing and the same numbers appear on those screening lists, Selective Call Rejection takes precedence. This feature will not work if the incoming call is from a number in a multi-line Hunt Group unless the number is the main number of the Hunt Group, or is number identified.

Six-Way Conference Calling

A Circuit Switched Voice option that allows the user to set up a conference call for up to six parties.

Speed Call Long

Allows a user to dial a pre-assigned number by pressing the feature button assigned to speed calling and dialing two digits, or via an interactive dialing sequence. This feature allows for up to thirty numbers in the speed call list.

Speed Call Short

Allows a user to dial a pre-assigned number by pressing the feature button assigned to speed calling and dialing one or two digits, or via an interactive dialing sequence. This feature allows for up to six or ten numbers in the speed call list, depending on the serving office.

Three-Way Conference Calling

A Circuit Switched Voice feature that allows the user to establish a conference call for up to three parties.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{/1} (cont'd)**D. Technical Specifications**

1. Technical equipment guidelines for ISDN customer access to DigiLine serving offices are found in SR-NWT-002661, ISDN Basic Rate Interface Generic Guidelines for Customer Premises Equipment. This document may be obtained from:

Telcordia Document Register
445 South Street, Room 2 J-125
Morristown, NJ
Telephone: 1-800-521-2673

2. DigiLine Service is designed to all relevant International Telecommunications Union-Telephony (ITU-T) standards.
3. The transmission characteristics of DigiLine Service support 64 Kbps Clear Channel Capability.
4. Due to technical limitations, some analog optional features (such as, but not limited to, Call Waiting) may not work properly when a customer chooses to combine an analog local exchange access service with a DigiLine Service arrangement.
5. When DigiLine Service is provided from a central office other than the customer's normal serving office, calls to Universal Emergency Number Service (911) originated over the DigiLine Service may route to a different answering point than 911 calls originating from access lines served by the customer's normal serving office. If so routed, the different answering point may not have the information available to respond to the call as efficiently as possible.

E. Regulations

1. The following regulations apply in addition to those in other service publications of the Company. Where other regulations apply on a per line basis, they shall be interpreted to apply per Circuit Switched Voice (CSV)/Circuit Switched Data (CSD) B channel.
2. DigiLine Service requires compatible registered CPE under FCC Part 68.
3. Ancillary Services compatible with DigiLine Service will be furnished under the business or residence rates and regulations based on the classification of the DigiLine customer's account (as defined in Part 2, Section 2). A business or residence listing will be provided in the Listing Information System for the DigiLine serving office according to the regulations provided in Part 11, Section 2. Customers may combine an analog local exchange access service at residential or business rates with a DigiLine Service arrangement. These restrictions do not prevent customers from combining an analog local exchange access service at residential or business rates with a DigiLine Service arrangement. Since DigiLine Service provides ISDN signaling, Touch-tone Calling Service charges are not applicable.

(C)
(C)

^{/1}/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{/1/} (cont'd)

E. Regulations (cont'd)

4. Resale of DigiLine Service is prohibited.
5. Upon subscribing to DigiLine Service, the customer may be required to change the existing number.
6. DigiLine Service is physically provisioned from the DigiLine serving office designated by the Company. The Company will determine a customer's designated serving office based on the location and capacity of DigiLine equipped central offices.
 - a. If the customer's normal serving office is located within a DigiLine Service Area, the customer may be provided DigiLine Service from the designated DigiLine serving office at the rates and charges listed in paragraph L., and Foreign Serving Office (FSO) or Link Extension Equipment and Link Extension Facility charges will not apply.
 - b. If the customer's normal serving office is not located within a DigiLine Service Area, the customer may be provided DigiLine Service from a DigiLine equipped central office in a DigiLine Service Area within the customer's LATA, if agreed to by the Company. In such cases the charges for the Link Extension Equipment and Link Extension Facility specified in paragraph L will apply in addition to the other charges for DigiLine Service.
 - c. If, in case a., a new central office becomes the designated DigiLine serving office for a customer's location, their existing DigiLine Service will continue to be provided from their original DigiLine serving office if technically possible. If necessary, the Company may require that the customer move the existing DigiLine Service to the new designated serving office and, in conjunction therewith, waive the move charges. Such a move may require the customer to change number(s). If the move to the new designated serving office is at the customer's request, the provisions and charges specified in this Guidebook for moves will apply.
 - d. In case b., when a central office is equipped so that the customer's normal serving office becomes part of a DigiLine Service Area, the customer's DigiLine Service may be moved from their original DigiLine serving office to the customer's new designated DigiLine serving office. Such a move may require the customer to change number(s), and in conjunction therewith, the Company will waive the provisions and charges for moves specified in paragraph H. The Link Extension Equipment and Link Extension Facility charges will no longer apply. However, if agreed to by the Company, the customer may request that their DigiLine Service not be moved to the new designated serving office. In such cases, the Link Extension Equipment and Link Extension Facility charges will continue to apply.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{/1/} (cont'd)**E. Regulations (cont'd)**

6. (cont'd)

- e. If a customer requests DigiLine Service to be provisioned from an office in their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph L will apply in addition to the charges for Foreign Serving Office (FSO) Service as described in Part 4, Section 3. FSO charges will apply per B channel.
- f. If a customer requests DigiLine Service to be provisioned from an office outside of their exchange other than the DigiLine serving office designated by the Company, and if agreed to by the Company, the DigiLine Link Extension Equipment charge found in paragraph L will apply in addition to the charges for Foreign Exchange (FX) Service as described in Part 4, Section 3. FX Service charges shall apply per B channel.

7. Caller ID

Customers shall use Caller ID solely for the purposes of call processing, billing, and account management and shall not publicize or disclose any calling party number without written permission from the party to whom the number has been assigned. By way of illustration, and not limitation, the customer shall not use any calling party number or name of such party for telemarketing or list-generation efforts without written permission. Additional restrictions and descriptive information regarding this feature are detailed in Part 7, Section 1.

- 8. The regulations specified in Part 2, Section 2, Paralleling Service, shall not apply when DigiLine Service and Local Exchange Services are furnished at the same premises.
- 9. Digital Packet Switching Usage^{/2/}

The following rules and regulations are in addition to the rules, regulations, and rates in other service publications:

- a. The customer will be responsible for all charges to their Packet Directory Number.
- b. The Company reserves the right to determine the facilities used to provide service and to modify or change such equipment and facilities.
- c. No credit will be made for interruptions due to negligence or failure of customer-provided equipment.
- d. The printed reports will be provided to the customer via first-class U.S. Mail Service unless otherwise agreed upon between the customer and the Company.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ DigiLine packet switching is only available for installations of B channel packet that do not connect to the DPN packet switch.

DIGILINE SERVICE^{/1/} (cont'd)**F. Service Terms**

1. All DigiLine Service components have a minimum service term of one month.
2. Basic Rate Interface (BRI) Service Term Agreements^{/2/}

Term pricing options are available with the BRI^{/2/}. These options are in addition to the typical month-to-month payment option for the BRI. If a customer commits to retain this service component at one location for a specific term, the customer will not be charged the full Installation Charge for the BRI. Additionally, the monthly rate will not increase during the term of an agreement. If Guidebook changes become effective lowering the rate for a DigiLine BRI for a particular service term agreement pricing option, the Company will also lower this rate for any customer with an unexpired service term agreement. Coterminous additions are not permitted for the service term options. If a customer chooses a service term and then disconnects the BRI prior to the expiration of that term, a termination charge will be due. Payment of the termination charge does not release the customer from other previous amounts owed to the Company. The termination charge for all service terms will be calculated as follows:

In addition to any unpaid Special Construction or Nonrecurring Charges (excluding waived charges), customer termination liability for cancellation of DigiLine service shall be equal to fifty percent (50%) of all recurring charges for the remaining months of the customer's service term.

3. If a customer chooses to disconnect DigiLine Service in order to convert to Company digital service of equal or greater speed, the Company will waive the termination charge associated with the term agreement if:
 - a. the customer has had DigiLine Service for at least six months and
 - b. the customer enters into a new service term agreement for a comparable quantity of service for a period greater than or equal to the number of months remaining on the DigiLine agreement.
4. Upon the expiration of the 12- or 24-month service term^{/2/}, the customer may:
 - a. Continue service on a month-to-month basis at the current month-to-month rate, with no additional service commitment. This rate will be subject to Company-initiated rate changes.
 - b. Discontinue the Service.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

DIGILINE SERVICE^{/1/} (cont'd)**G. Special DigiLine Service Requests**

DigiLine Service will be furnished at the rates contained in this Guidebook section, provided facilities are available. Where facilities are not available or unusual expenditures are involved in making them available, the customer may be required to pay additional charges under Part 2, Section 5 to cover the unusual expenditure, or to contract for services beyond the service term, or both.

H. Moves

1. A Move Charge, as specified in this Guidebook, will apply when a customer moves DigiLine Service from one location to another within the Company's jurisdiction in Kansas, except as described in the following paragraphs. If the customer is moving the service prior to the expiration of a service term^{/2/}, the move will not be considered a disconnect for the purpose of calculating a termination charge if:
 - a. the service at the new location is ordered at the same time the customer requests the disconnect at the current location, and
 - b. the customer agrees to complete the unexpired term at the new location.
2. If the customer requests a move prior to the expiration of a BRI Installation Charge service term agreement and the customer elects to move the same quantity of BRIs to another location in Kansas served by the Company, the customer may complete the remainder of the original service term at the new location. The Move Charge will apply.

I. Supersedures

DigiLine Service may be transferred to a new customer at the same premises upon written concurrence of the Company. The customer to whom service is transferred must accept all past indebtedness, liabilities, minimum term provisions and equipment configurations in effect for the previous customer at the time of the transfer.

J. Suspension of Service

1. Customer-Initiated Suspension of Service
Vacation Service (Part 2, Section 4) is not offered for DigiLine Service.
2. Company-Initiated Suspension of Service
When service is suspended by the Company, the restoration charge applies per B Channel.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

DIGILINE SERVICE^{/1/} (cont'd)**K. Rate Application**

1. General
 - a. If the customer cancels an order for service before installation of the equipment and facilities is complete, the customer agrees to pay all expenses incurred by the Company before receipt of notice of cancellation. This charge shall not exceed all charges which would have applied had the service been installed.
 - b. DigiLine customers may elect to spread the payment of all installation and nonrecurring charges, through a series of equal monthly payments over a twelve-month period. To compute the value of the monthly deferred charge payment, the installation and nonrecurring charges are multiplied by the appropriate annuity factor. A table of annuity factors is listed in Part 2, Section 2. If the service is terminated prior to payment of the deferred charges, a charge equal to the sum of the remaining payments will be due.
 - c. Distance-Sensitive Rates and Calling Scopes
 1. The application of any distance-sensitive rates for services associated with DigiLine Service (e.g., toll rates, private lines, etc.) will be based upon the V & H coordinates of the customer's DigiLine serving office or the customer's normal serving office.
 2. The local calling scope and the optional calling plans available for DigiLine customers will be determined by the customer's DigiLine serving office or the customer's normal serving office. (See Part 4, Section 1 for information on calling scopes per exchange.)
2. Integrated Services Digital Circuit Switched Voice (CSV)/Circuit Switched Data (CSD) Transport Option - Usage Options
 - a. DigiLine Service provides for usage of the Public Switched Telephone Network (PSTN) on either a Flat-Rate or Usage-Sensitive basis per Basic Rate Interface (BRI) or per BRI to Point of Interconnection with another Local Exchange Company. The Flat-Rate Usage Charge applies per B channel activated for CSV/CSD. Customers opting for the Usage-Sensitive Option must select a Usage Package which applies on a per BRI basis. Customers may not combine a Flat CSV/CSD Option with a Usage-Sensitive CSV/CSD Option on the same BRI.
 - b. The customer may opt to switch Usage Options or Usage Packages upon notification to the Company. Billing under the newly selected Usage Option or Usage Package will commence with the beginning of the customer's next billing period. The Change a Network Rate Element charge will apply for customers switching Usage Options or Usage Packages.

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{/1/} (cont'd)**K. Rate Application (cont'd)**

3. DigiLine Service Provided With Other Local Exchange Companies
 - a. Customers located in a Kansas exchange outside the Company's serving territory may request that their Local Exchange Company make arrangements to provide DigiLine Service from a Company DigiLine serving office. The Company will designate the DigiLine serving office for each arrangement.
 - b. When another Local Exchange Company arranges for the Company to provide DigiLine Service for one of its end users, the Company will charge the end user the "BRI to Point of Interconnection with Another Local Exchange Company" rate listed in paragraph L.1. The Company will also charge the end user for Network Rate Elements, optional features, ancillary services, toll and any other Company charges related to the DigiLine Service provided at the Company serving office. Rate elements or regulations that apply to the BRI also apply to the BRI to Point of Interconnection with a Local Exchange Company.
 - c. Regular BRI, Link Extension Equipment, Link Extension Facility, and Foreign Exchange (FX) rates and charges do not apply when DigiLine Service is provided to a customer located outside the Company's serving territory. The Company will not bill for any DigiLine Service-related charges assessed by the other Local Exchange Company. The Company is only responsible for service and billing on the Company's side of the point of interconnection.
 - d. All rules and regulations listed or referenced within this Guidebook apply when the Company provides DigiLine Service to customers located in other Local Exchange Companies' territories. The "Move" provisions for service term agreements are applicable only when both the old and new locations are served by Company DigiLine serving offices.

^{/1/} DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

DIGILINE SERVICE^{1/} (cont'd)**L. Rate Schedule**

<u>Service Components</u>	<u>USOC</u>	<u>Monthly Rate</u>	<u>Installation Charge</u>
1. Facility and Equipment Rate Elements			
Basic Rate Interface, each	/Z23/ /Z22/		
Month-to-Month payment option		\$1,575.00(I)	\$250.00
12 Month payment option ^{2/}		49.95	125.00
24 Month payment option ^{2/}		49.95	--
Link Extension Equipment per BRI, each	/NC1/	36.00	--
Link Extension Facility per BRI, each	/OTVXX/	30.00	--
Basic Rate Interface to Point of Interconnection with another Local Exchange Company, each ^{3/}	/Z2F/ /Z2M/		
Month-to-Month payment option		80.00	250.00
12 Month payment option ^{2/}		80.00	125.00
24 Month payment option ^{2/}		80.00	--

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ Effective August 31, 2011, Service Term Agreements are no longer available for new installations or renewals of DigiLine Service. DigiLine Service customers currently on a Service Term Agreement may continue service at their existing rate until the contract term expires. Upon completion of the current contract term, customers may continue receiving the service at the then current month-to-month rates. If the customer does not request discontinuance of the service, the month-to-month rates in effect at such time will automatically apply.

/3/ See paragraph K.3 for regulations impacting rate application for customers located in another Local Exchange Company's serving territory.

2. Network Rate Elements

Integrated Services Digital Circuit Switched Voice/Circuit Switched Data Transport Option (CSV/CSD)^{2/}

The following rate elements provide for digital CSV/CSD transport through central office switching equipment. These rate elements are for Local Exchange usage. Each rate element shall constitute a local exchange access arrangement and shall be counted in combination with those of Part 4, Section 2. These CSV/CSD local service elements are offered only in connection with services provided under this Guidebook, and not offered on a stand-alone basis.

<u>Service Components</u>	<u>Rate Group</u>	<u>USOC</u>	<u>Monthly Rate</u>
One-Party Flat Rate Equivalent, Flat Rate Usage DigiLine Service Compatible, Payment Option 1, each B channel ^{3/4/}	All ^{5/}	/UFB1/ /UFB2/	\$334.00 (I)
One-Party Flat Rate Equivalent, Message/Measured Monthly Rates ^{4/} DigiLine Service Compatible, Payment Option 2' each Basic Rate Interface ^{6/}			
Usage Package A Includes up to 600 minutes of local usage per month	All ^{5/}	/OUOXA/	0.00
\$0.04 Per Minute, or fraction thereof, in excess of 600 minutes of local usage allowance			

/1/ DigiLine Service is obsolete for residential subscribers, effective November 1, 2012. No further installations, moves, rearrangements, or changes of any type will be made to DigiLine Service for residential subscribers as of the effective date. Residential subscribers of record on the effective date may continue their DigiLine Service as long as such service remains at the location at which it was being furnished on the aforementioned date.

/2/ There is no separate Installation Charge associated with Integrated Services CSV/CSD Transport Options which are installed at the same time as the associated Basic Rate Interface (BRI). The Add, Change or Rearrange-a-Network Rate Element charge (listed in paragraph L.5) applies to activity that occurs subsequent to the initial installation of the BRI.

/3/ The rates for main service do not include a Company provided instrument.

/4/ This service offering is subject to the availability of necessary facilities.

/5/ For Rate Group Classifications, see Part 4, Section 2.

/6/ Each B channel configured for CSV/CSD shall constitute a local exchange access arrangement.
