A18. LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

A18.1 Application

This Guidebook applies to Long Distance Message Telecommunications Service (MTS) furnished or made available by the Company and its connecting companies between points within the state of Kentucky, and within the same LATA where the respective rate centers of such points also are located in said state and the same LATA.

A18.2 General

- A. Long Distance Message Telecommunications Service is that of furnishing facilities for communications between stations in different rate centers for either two-point or conference service.
- B. Rates for service between points are based on airline mileage between rate centers. In general, each point is designated as a rate center except that certain small towns or communities are assigned adjacent rate centers with which they are closely associated for communication purposes or by community of interest. Airline mileages between rate centers are determined as provided in A18.5.
- C. Long Distance MTS is provided for use by the customer and may be used by others when so authorized by the customer. Use of the service is subject to Terms and Conditions in Section A2, with the exception of A2.2.1.A and A2.2.1.B, which restrict the use of service and prohibit payment to the customer by another for use of the service and which remain applicable to Rates for Hearing or Speech Impaired Customers as described in A18.3.1.G.

A18.3 Two-Point Service

A18.3.1 Service Between Land Wire Telephones

- A. Classes of Service
Service is offered on a Station-to-Station basis, as either Dial or Operator. These classes of calls are defined in Section A1, Definition of Terms, under "Long Distance Message Telecommunications Services".
- B. Rates and Charges
 1. Residence
 - a. Charges for each Long Distance MTS message between any two points within the state and within the same LATA and originated from a residence class of service are determined as follows:
 - (1) All messages are rated in full minute increments. Initial and additional minute basic rates are specified in the Basic Rate Schedule following. Initial minute rates are for connections of one minute or any fraction thereof. Additional minute rates are for each additional minute or any fraction thereof that the connection continues beyond the first minute.
 - (2) (DELETED)
 - (3) For any Operator Station, the surcharge specified in A18.3.1.B.3 is added to the Basic Rate Schedule charge.
 - (4) All real-time rated calls are rounded and rated in whole minutes. Real-time rated calls are calls that require quotation of charges before or after a call is completed (1+ Hotel or Time and Charges).
 - b. Basic Rate Schedule
 - (1) The following table contains the initial minute and additional minute rates for all call classes. These rates are based on chargeable time (duration) of the message, as specified in A18.3.1.C, and the airline mileage between the rate centers of the two stations connected, as specified in A18.5.
 - (2) Distance band rates

A18.5 Airline Mileage Between Rate Centers

A18.5.1 General

For the purpose of determining airline mileages vertical and horizontal grid lines have been established across the State of Kentucky. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. This unit is the square root of 0.1, expressed in airline miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in A18.5.2. following.

A18.5.2 Determination Of Airline Mileages

- A. To determine the rate distance between any two centers proceed as follows:
1. Obtain the "V" and "H" coordinates for each rate center.
 2. Obtain the difference between the "V" coordinates of the two rate centers. Obtain the difference between the "H" coordinates. The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.
 3. Divide each of the differences obtained in A18.5.2.A.2. by three rounding each quotient to the nearer integer.
 4. Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in A18.5.2.A.3. by three and repeat A18.5.2.A.4. Repeat this process until the sum of the squares obtained in A18.5.2.A.4. is less than 1778.
 5. The number of successive divisions by three in A18.5.2.A.3. and 4. determines the value of "N". Multiply the final sum of the two squares obtained in A18.5.2.A.4. by the multiplier specified in the following table for the value of "N" preceding.

N		Multiplier	Minimum Rate Mileage
1		0.9	-
2	8.1		41
3	72.9		121
4	656.1		361
5	5,904.9		1,081
6	53,144.1		3,241

A18.5 Airline Mileage Between Rate Centers (Cont'd)**A18.5.2 Determination Of Airline Mileages (Cont'd)**

A. To determine the rate distance between any two centers proceed as follows: (Cont'd)

6. Obtain square root of product in A18.5.2.A.5. and with any resulting fraction, roundup to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in A18.5.2.A.5. preceding, the minimum rate mileage corresponding to the "N" value is applicable.

a. Example:

The message rate distance is required between Louisville, Kentucky and Sadieville, Kentucky

	V	H
(1) Louisville	6529	2772
Sadieville	6398	2605
(2) Difference	131	167
(3) Dividing each difference by three and rounding to nearer integer = 44 and 56.		
(4) Squaring integers and adding,	44 x 44 = 1936	
	56 x 56 = 3136	
Sum of Squared integers		5072
(5) Sum of squared integers is greater than 1777 so divide integers in A18.5.2.A.6.a.(3) by three and repeat (4).		
(6) Dividing integers in A18.5.2.A.6.a.(3) by three and rounding = 15 and 19.		
(7) Squaring integers and adding,	15 x 15 = 225	
	19 x 19 = 361	
Sum of squared integers		586
(8) This sum of squared integers is less than 1778 and was obtained after two successive divisions by three; therefore "N" = 2.		
(9) Multiply final sum of squared integers by factor 8.1 (corresponding to "N" =2)		586
		x 8.1
		4747.0
(10) Square root of 4747.0 = 68 and a fraction which is rounded up to 69 miles (fractional miles being considered full miles). The 69 miles is larger than the minimum of 41 rate miles applicable when "N" = 2, so the message rate mileage is 69 miles.
