(Obsoleted 07-11-94 Type 4) Service rates in this section are available for existing customers at existing locations only. Not available for new service, additions to existing service, or moves of existing service to new locations.

General

- A. The definitions, *terms and conditions* in A112.26 for ESSX service apply to these offerings except as stated following: (T)
- B. This feature will not be available to additions to existing ESSX service. The Caller ID feature in A112.26 will be utilized for any such additions. (T)
- C. Existing subscribers to this feature may convert to the flat rate Caller ID feature in A112.26. Existing customers under contract may not recast this feature at the end of their contract period. Existing customers may continue to pay these obsoleted rates until their contract expires or until such a time that the customer requests additions to their measured rate Caller ID feature. Once the customer requests additions to their measured rate Caller ID feature, they must subscribe to the new flat rate Caller ID feature for delivery of the calling telephone number for all Caller ID lines. For such conversions, the installation charge for the flat rate Caller ID feature in A112.26 will not apply. Appropriate Service Order charges from Section A4. are also not applicable. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.8 Reserved for Future Use

A112.9 Prestige Communications Package (PCP)

(Obsolete October 2, 1989, Type D)

Obsolete Service Offering. Not available for new installations or on transfers of service to a new location. Existing PCP customers may request feature changes and additions or line additions at the rates specified in this section. If the customer requires features not found in A112.9 that are available from A12.16, the entire PCP billing will be converted to rates specified in A12.16.

A112.9.1 General

- A. PCP is a central office communications system package furnished from Electronic Central Office equipment located in Company buildings. Access arrangements to PCP are provided in association with individual Business Exchange Lines, Trunks, 800 Service and/or certain types of Foreign Exchange Lines. It is offered as a customer option and may be provided subject to the availability of facilities to access arrangements except services provided through No. 1 or 1A ESS remote switching systems (RSS). All access arrangements in a PCP system must have the same billing arrangement, i.e., must be either flat or measured service.
- B. PCP service is offered in two categories, PCP I and II. PCP I provides for a system accommodating from two to six access arrangements. PCP II provides for a system accommodating from seven to thirty central office access arrangements. The billing record of toll calls on access arrangements using PCP service will not be affected by the application of the features of this service. Intercom calls between access arrangements in the same PCP system will not incur local usage charges.
- C. A customer may choose to combine access arrangements terminating at different locations into a single PCP system. All access arrangements terminating in a PCP system, however, must be served by the same central office.
- D. Six PCP features, Intercom, Call Pickup, Call Hold, Call Waiting, Call Forwarding Variable and Convenience Dialing are not available to access arrangements utilizing dial pulse signaling. All PCP features are available to access arrangements utilizing Touch-Tone signaling.¹ The rates and charges for Touch-Tone service are in addition to PCP rates and charges.
- E. The quality of transmission for calls utilizing PCP Call Forwarding Variable or Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission of such calls.

Note 1: See exceptions found in A112.9.2.B.6. following.

(C)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.9 Prestige Communications Package (PCP) (Cont'd)

(T)

A112.9.1 General (Cont'd)

- F. *PCP* standard and optional features are not compatible with existing Custom Calling Services, described in Section A13. (T)
- G. An upgrade from *PCP* I to *PCP* II service or a downgrade from *PCP* II to *PCP* I service is allowed at rates and charges as specified in A112.9.3.A.2.b.(1) following as appropriate. An upgrade from Prestige Single Line Service (PSLS) to *PCP* I or *PCP* II service or a downgrade from *PCP* I or *PCP* II to PSLS is allowed at rates and charges as specified in A112.9.3.A.2. as appropriate. (T)
- H. Suspension of *PCP* service is not allowed. (T)
- I. Feature availability and/or operation may vary depending upon the type of central office serving the *PCP* system and/or the current generic program available in the central office. (T)

A112.9.2 Service Description

A. Standard Features

1. INTERCOM¹

A user of a *PCP* I equipped access arrangement may dial up to five other access arrangements in the same *PCP* system by dialing an access code followed by two digits. A user of a *PCP* II equipped access arrangement can dial up to twenty-nine other access arrangements in the same *PCP* system by dialing an access code followed by two digits. Two user stations with the same access arrangement number cannot access each other utilizing the Intercom feature. An 800 Service access arrangement does not receive Intercom calls. (T)

2. CALL HOLD¹

A user of a *PCP* access arrangement can place any established call on hold by flashing the switchhook and dialing a code. This frees the access arrangement to originate another call or use the Call Pickup feature. (T)

3. CALL PICKUP¹

This feature enables a user of a *PCP* access arrangement to answer a call which has been directed to another access arrangement in the *PCP* system by dialing a code. (T)

If more than one pickup group per *PCP* system is required, rates and charges as specified in A112.9.3.A.1.b.(4)(a) for additional Call Pickup groups apply as appropriate. (T)

4. USER TRANSFER¹

The user of a *PCP* access arrangement can transfer any incoming call or intercom call to another access arrangement within or outside the *PCP* system. An 800 Service access arrangement can transfer calls only within the *PCP* system. (T)

5. CONFERENCING¹

The user of a *PCP* access arrangement can hold an in-progress call and complete a second call while maintaining privacy from the first call. In addition, the user of a *PCP* access arrangement may choose to add on the previously held call into a three-way conference. An 800 Service access arrangement can conference calls only within the *PCP* system. (T)

Note 1: This feature is inherent in most customer provided PBX's. Under certain conditions, the PBX feature may take precedence over, alter, or preclude the use of this Prestige feature.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.9 Prestige Communications Package (PCP) (Cont'd)

(T)

A112.9.2 Service Description (Cont'd)

B. Optional Features

1. CALL WAITING^{1,2}

This feature provides a tone burst alert to a **PCP** user who is on an existing call that another call is waiting. Call Waiting may be provided on access arrangements that are not in rotary (arranged for hunting) or on the last access arrangement in a rotary hunt group.

(T)

2. CALL FORWARDING VARIABLE^{1,2}

This feature automatically transfers all calls made to the subscribing access arrangement to a different access arrangement, within or outside the **PCP** system.

(T)

3. CONVENIENCE DIALING^{1,2}

PCP I or II Convenience Dialing

(T)

This feature allows a user of a **PCP** access arrangement to abbreviate dialing patterns for frequently called and emergency numbers. By dialing an access code followed by one digit, a customer can dial up to 6 preprogrammed numbers. All access arrangements in a **PCP** system may be provided with their own 6-number list.

(T)

4. ALTERNATE ANSWERING^{1,2}

This feature automatically transfers incoming or intercom calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing **PCP** access arrangement to an alternate designated access arrangement within the **PCP** system. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset value. The number to which calls are transferred and the approximate number of ring cycles before a don't answer call is transferred are specified by the customer at the time the feature is ordered. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order.

(T)

5. DISTINCTIVE RINGING^{1,2}

This feature allows the subscriber to distinguish between incoming calls from the exchange and calls from inside the **PCP** system by providing a distinct ringing pattern for each type call.

(T)

6. INWARD ONLY TERMINATION

This feature allows an inward only line (800 Service) to be assigned the standard Prestige features with certain restrictions found in A112.9.2.A.1. and A112.9.2.A.4. and 5. preceding. No other optional features are compatible with 800 Service access arrangements.

(T)

A112.9.3 Rates And Charges

A. The following rates and charges are for **PCP** service only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for access arrangements lines and other services or equipment with which they are associated.

(T)

Note 1: This feature is inherent in most customer provided PBX's. Under certain conditions, the PBX feature may take precedence over, alter, or preclude the use of this Prestige feature.

Note 2: See exceptions found in A112.9.2.B.6. following.

3. Service Charges

a. Establishment of Service

- (1) When established at the same time as the associated access arrangement(s), no additional service charge is applicable.
- (2) When established subsequent to the establishment of the associated access arrangement(s), appropriate service charges (including Simple Premises Work Charges) as specified in Section A4. apply.

b. Feature Changes or Additions

- (1) Service charges (including Simple Premises Work Charges) as specified in Section A4. are applicable to the following changes in an established PCP system.
 - Addition of optional feature(s) to an existing PCP arrangement.
 - Changes to the customer specified parameters associated with PCP Alternate Answering.
 - Changing the assignment of Intercom codes.
 - Upgrades from PCP I service to PCP II service.
 - Downgrades from PCP II service to PCP I service.
 - Upgrades from PSLS to PCP I or PCP II
 - Downgrades from PCP I or PCP II service to PSLS

A112.10 Prestige Single Line Service (PSLS)

(Obsoleted October 2, 1989, Type B)

A112.10.1 General

A. PSLS provides central office calling features for Business Flat, Measured or Message Rate Services and is furnished only from central offices equipped to provide this service. It is offered only on a single exchange line basis as a customer option and is provided subject to the availability of facilities. PSLS is not available for lines equipped with Rotary (Grouping) arrangements, ESSX or Coin Telephone Services. Custom Calling Service (CCS) options specified in A13.20. are not compatible with PSLS and may not be combined with PSLS features on the same line.

B. The billing record of any local or toll calls on lines using PSLS will not be affected by the application of the features of this service.

C. Four PSLS features, Call Hold, Call Forwarding, Convenience Dialing and Speed Dialing-Thirty are not available to lines utilizing dial pulse signaling. All PSLS features are available to lines utilizing Touch-Tone signaling. The rates and charges for Touch-Tone service are in addition to PSLS rates and charges.

D. The quality of transmission for calls utilizing PSLS's User Transfer, Call Forwarding or Conferencing features may vary depending on the distance and routing of the calls involved. The Company makes no representation as to the quality of the transmission of such calls.

E. Suspension of PSLS service is not allowed.

F. The initial service period for PSLS is one month commencing with the date of installation of the service.

(C)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.10 Prestige Single Line Service (PSLS) (Cont'd)

A112.10.1 General (Cont'd)

- G. PSLS is considered a miscellaneous service and as such is not subject to any concession rate treatment provisions that may be specified in this *Guidebook*. (T)
- H. Feature availability and/or operation may vary depending upon the type of central office serving PSLS and/or the current generic program available in the serving Electronic Central Office.

A112.10.2 Service Description

A. Standard Features

1. Call Hold

A user of PSLS can place any established call on hold by flashing the switchhook and dialing a code. This frees the line to originate another call.

2. User Transfer

A user of PSLS can transfer an incoming call to another exchange line.

3. Conferencing

A user of PSLS may hold an in-progress call and complete a second call while maintaining privacy from the first call, or may add on the previously held call for a three-way conference.

B. Optional Features

1. Call Waiting

This feature provides a tone burst alert to a PSLS line user who is on an existing call that another call is waiting.

2. Call Forwarding

This feature provides a PSLS user the ability to have all incoming calls forwarded to a different telephone number by dialing a code and the telephone number where calls are to be forwarded.

3. Convenience Dialing

This feature provides a PSLS user the ability to place a call by dialing a code plus one digit, to any one of six telephone numbers preprogrammed by the customer.

4. Speed Dialing-Thirty

This feature is available in certain offices where PSLS is offered. When available, this feature provides a PSLS user the ability to place a call by dialing a code plus two digits, to any one of thirty telephone numbers preprogrammed by the customer.

A112.10.3 Rates And Charges

The following rates and charges are for PSLS only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for the exchange access line and other services or equipment with which it is associated.

A112.13 Digital ESSX Service

A112.13.8 Digital ESSX Service – VS and 200

(Obsoleted 07-11-94 Type 4) Service rates in this section are available for existing customers at existing locations only. Not available for new service, additions to existing service, or moves of existing service to new locations.

General

- A. The definitions, *terms and conditions* in A112.28 for Digital ESSX service apply to these offerings except as stated following: (T)
- B. This feature will not be available to additions to existing Digital ESSX service. The Caller ID feature in A112.28 will be utilized for any such additions. (T)
- C. Existing subscribers to this feature may convert to the flat rate Caller ID feature in A112.28. Existing customers under contract may not recast this feature at the end of their contract period. Existing customers may continue to pay these obsoleted rates until their contract expires or until such a time that the customer requests additions to their measured rate Caller ID feature. Once the customer requests additions to their measured rate Caller ID feature, they must subscribe to the new flat rate Caller ID feature for delivery of the calling telephone number for all Caller ID lines. For such conversions, the installation charge for the flat rate Caller ID feature in A112.28 will not apply. Appropriate Service Order charges from Section A4. are also not applicable. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Prestige Deluxe Service

(Obsoleted April 15, 1993, Type 4) Not available for new installations or on transfers of service to a new location. Existing customers may request changes and additions at the rates specified in this section of this *Guidebook*. (T)

A112.14.1 General

- A. Prestige Deluxe Service is an expanded group of central office features that may be provided in association with individual Flat Rate or Measured Rate Business exchange lines served by electronic switching equipment located in Company buildings.
- B. Prestige Deluxe Service is offered to subscribers having a minimum of two and a maximum of thirty Individual Business exchange access lines.
- C. Prestige Deluxe Service is offered subject to the availability of facilities. The rates and charges for Prestige Deluxe, as applicable, are in addition to rates and charges for the individual exchange access lines in Section A3. (T)
- D. Exchange Access lines terminating at different Prestige Deluxe locations may be combined into a single Prestige Deluxe arrangement for the same customer if the lines are all served by the same central office.
- E. Prestige Deluxe lines will utilize Touch-Tone signaling. The rates and charges for Touch-Tone service will apply as appropriate in Section A13. (T)
- F. The billing record of toll calls on lines using Prestige Deluxe Service will not be affected by the application of the features of this Service.
- G. Prestige Deluxe standard and optional station features, and optional system features are not permitted on the same line with existing Prestige or Custom Calling Service described in other sections of this *Guidebook*. (T)
- H. Service availability and/or operation may vary depending upon the type of central office serving the Prestige Deluxe arrangement, and the capabilities of that office. In addition, those features which require activation by switchhook flash may conflict with the operation of customer owned electronic key premises equipment.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.10 Prestige Single Line Service (PSLS) (Cont'd)

A112.10.3 Rates And Charges (Cont'd)

C. Service Charges

1. Establishment of Service
 - a. When PSLS is established at the same time as the associated exchange access line, no additional service charge is applicable.
 - b. When PSLS is established subsequent to the establishment of the associated exchange access line, service charges as specified in Section A4. apply. (T)
2. Feature Additions
 - a. Service charges as specified in Section A4. are applicable to the addition of optional features to an exiting PSLS arrangement. (T)

A112.11 Reserved For Future Use

A112.12 Reserved For Future Use

A112.13 Digital ESSX Service

A112.13.8 Digital ESSX Service - VS and 200

(Obsoleted 07-11-94 Type 4) Service rates in this section are available for existing customers at existing locations only. Not available for new service, additions to existing service, or moves of existing service to new locations.

General

- A. The definitions, *terms and conditions* in A112.28 for Digital ESSX service apply to these offerings except as stated following: (T)
- B. This feature will not be available to additions to existing Digital ESSX service. The Caller ID feature in A112.28 will be utilized for any such additions. (T)
- C. Existing subscribers to this feature may convert to the flat rate Caller ID feature in A112.28. Existing customers under contract may not recast this feature at the end of their contract period. Existing customers may continue to pay these obsoleted rates until their contract expires or until such a time that the customer requests additions to their measured rate Caller ID feature. Once the customer requests additions to their measured rate Caller ID feature, they must subscribe to the new flat rate Caller ID feature for delivery of the calling telephone number for all Caller ID lines. For such conversions, the installation charge for the flat rate Caller ID feature in A112.28 will not apply. Appropriate Service Order charges from Section A4. are also not applicable. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Prestige Deluxe Service (Cont'd)

A112.14.2 Service Description (Cont'd)

B. Optional Station Features

1. Alternate Answering

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) on the subscribing Prestige Deluxe line to an alternate designated line within the Prestige Deluxe arrangement. Because of technical limitations, the actual number of ring cycles before a don't answer call is transferred may vary slightly from the preset number. The destination telephone number and the approximate number of ring cycles before the call is transferred are specified by the customer at the time this feature is ordered. This feature is in operation on a continuous basis and cannot be activated or deactivated by the customer. Changes to the feature must be requested from the Company by service order.

2. Automatic Callback

This feature permits an exchange line user who attempts a Station-to-Station (standard feature) dialed call to a busy exchange line to be automatically connected to that line when both called and calling lines are subsequently idle. The originator activates a request by dialing a specified code after a busy tone is encountered. Automatic Callback applies only to Station-to-Station dialed calls between exchange lines in the same Prestige Deluxe arrangement. A calling exchange line is permitted only one Automatic Callback request at a time, as well. Once activated, an Automatic Callback request remains in effect for a period of approximately 30 minutes unless it is deactivated by the calling exchange line. The request may be deactivated by dialing a specified code. Availability is subject to the type of central office and/or the current program operating in that central office.

3. Call Forwarding - Busy Line

This feature automatically re-routes calls intended for an equipped exchange line when that line is busy. The calls are routed to a preselected exchange line (destination) within the Prestige Deluxe arrangement. The destination telephone number is specified by the customer at the time this feature is ordered. A change in the destination telephone number must be requested from the Company by service order.

4. Call Forwarding Variable

This feature automatically transfers all calls made to the subscribing line to any other line, within or outside the Prestige Deluxe arrangement.

5. Call Forwarding Variable With Ring Reminder

This feature automatically transfers all calls made to the subscribing line to any other line, within or outside the Prestige Deluxe arrangement. Ring reminder provides a short burst of ringing on a line when that line is in the call forwarded state and a call is placed to that line.

6. Call Pickup

This feature allows an exchange line user, by dialing a specified answer code, to pick up an unanswered call to another exchange line in the same Call Pickup group. If the exchange line being rung has already answered, busy tone will be returned to the line user dialing the answer code.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Prestige Deluxe Service (Cont'd)

A112.14.2 Service Description (Cont'd)

B. Optional Station Features (Cont'd)

7. Call Waiting Terminating

When a Prestige Deluxe station user is on an existing call, this feature provides a tone burst alert indicating that a call is waiting. Call Waiting may not be provided on an individual line that is in rotary (arranged for hunting) unless the line is the last line in a rotary hunt group.

8. Cancel Call Waiting

This feature allows the customer with Call Waiting (Terminating) service to inhibit the operation of call waiting for one call. The customer dials the Cancel Call Waiting code, obtains recall dial tone, and places a call normally. During this call, Call Waiting service will be inactive. Anyone calling the Call Waiting customer will receive the normal busy treatment, and no Call Waiting tones will interrupt the customer's call.

9. Distinctive Ringing and Call Waiting Tone

Distinctive Ringing and Call Waiting Tone are furnished in two classes which permit a Prestige Deluxe exchange line user to identify the source of a call:

- Intercommunication (call from within the Prestige Deluxe system originated via the Station-to-Station Dialing feature).
- Direct Inward Dialed local and toll (call from outside the Prestige Deluxe System or non station-to-station dialed call originated within the Prestige Deluxe System).

Distinctive ringing is furnished to indicate the source of calls to idle exchange lines. Distinctive tone is furnished to indicate the source of calls to busy exchange lines equipped for the optional Call Waiting feature.

A distinctive ring or tone is furnished for each class and is used to identify all call sources within that class.

10. Ring Reminder - Inhibit

Ring Reminder - Inhibit will prohibit a short burst or ringing on a line when that line is in the call forwarded state and a call is placed to that line.

11. Speed Call Short, Customer Changeable List

This feature allows the Prestige Deluxe station user to place a call by dialing a one digit code to any one of six telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes.

12. Speed Call 30, Individual, Customer Changeable List

This feature allows the individual Prestige Deluxe station user to place a call by dialing a two digit code to any one of 30 telephone numbers listed by the customer. The station user can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes. This optional feature may not be available in all central offices.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.14 Prestige Deluxe Service (Cont'd)

A112.14.2 Service Description (Cont'd)

B. Optional Station Features (Cont'd)

13. Speed Call 30, Group, Customer Changeable List

This feature allows the individual Prestige Deluxe station user, in a group, to place a call by dialing a two digit code to any one of 30 telephone numbers listed by the group of customers. The controlling line can change the telephone numbers on the list by dialing a specified code plus the new telephone number desired. Each telephone number on the list is limited to a maximum of 16 digits including access and routing codes. Either Speed Call 30, Individual or Group, will be available to the customers, not both on the same line.

C. Optional System Features

1. Loudspeaker Paging Access

The Loudspeaker Paging feature, where facilities are available, allows Prestige Deluxe station users to dial access loudspeaker paging equipment. Capabilities are provided to allow multizone paging where a separate access code is provided for each zone within the customer's location. The customer is responsible for providing all paging equipment, including the paging interface that may be required on the premises.

2. Miscellaneous Line Terminations

The Miscellaneous Line Termination feature provides station user dial access to such lines as WATS, FX and Tie Lines. The Inward Only Termination Feature allows an Inward Only Line ('800' Service) to be assigned in the standard Prestige Features.

3. Prestige Access Management

This feature allows the station user dial access to certain miscellaneous lines and other customer oriented facilities by means of treatment codes. The feature does not prevent intra-Prestige Deluxe station calling.

4. Prestige Conference

The Prestige Conference feature will allow a Prestige Deluxe line to establish a conference of up to six conferees including the originator.

A112.14.3 Rates And Charges

A. The following rates and charges are for Prestige Deluxe service only and are in addition to the applicable service charges, monthly rates and nonrecurring charges for exchange access lines and other services or equipment with which they may be associated.

B. Feature Establishment Charges will apply as specified, when an optional feature is entered or changed. These charges apply in addition to other applicable nonrecurring charges.

A112.18 ESSX ISDN Service Feature Calling/Called Number Display, All

(Obsoleted 07-11-94, Type D) Service and rates in this section are available for existing customers at existing locations only. Not available for new service, additions to existing service, or moves of existing service to new locations.

A112.18.1 General

- A. The definitions, *terms and conditions* in A112.31 for ESSX ISDN service apply to these offerings except as stated following. (T)
- B. This feature will not be available to additions to existing ESSX ISDN service. The Calling/Called Number Delivery features in A112.31 will be utilized for any such additions.
- C. Existing subscribers to this feature may convert to the flat rate Calling/Called Number Delivery feature in A112.31. Existing customers under contract may not recast this feature at the end of their contract period. Existing customers may continue to pay these obsoleted rates until their contract expires or until such a time that the customer requests additions to their measured rate Calling/Caller Number feature. Once the customer requests additions to their measured rate Calling/Called Number feature, they must subscribe to the new flat rate Calling/Called feature for delivery of the calling telephone number for all Calling/Called Number Delivery lines. For such conversions, the installation charge for the flat rate Calling/Called Number feature in A112.31 will not apply. Appropriate Service Order charges from Section A4. are also not applicable.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service

(Obsoleted 6-03-04, Type D) Obsolete service offering. Service rates and charges are available for inward activity of existing subscribers only as specified following. Not available for new service/system or entire moves of existing service to new locations.

A112.20.1 General

- A. MultiServ service (previously marketed as ESSX service and Digital ESSX service) provides an arrangement of switching equipment and station lines for intercommunicating among the station lines and for connection through the local and long distance message network to other subscribers on a dial basis. MultiServ service is furnished from 1AESS, DMS-100, 5ESS and EWS/central office equipment located on Company premises and associated facilities arranged to provide the following basic service capabilities/features:
 - 1. Exchange and long distance message network calls may be made to main stations by dialing the number associated with that main station line or attendant position.
 - 2. Exchange and long distance message network calls may be made from main stations via direct outward dialing.
 - 3. Station-to-station intercommunication via two to seven-digit dialing between stations of the subscriber's system.
 - 4. Outgoing long distance message calls dialed by a main station will be identified by the seven-digit station number. Only calls billed to the subscriber by the Company will be provided this identification.
 - 5. Basic station line hunting.
 - 6. Touch-Tone service.
 - 7. Common recorded announcement interception of calls to unassigned station numbers.
 - 8. Unconditional Satisfaction Guarantee.
- B. MultiServ service will be furnished to subscribers requesting one (1) or more main station lines served by the same central office equipment.
- C. A subscriber's system may be comprised of the following components:
 - Station Links
 - Feature Groups
 - Optional Capabilities
- D. Subscribers to ESSX service from DMS-10, 2BESS and Stromberg Carlson offices will be allowed to retain their service until the central office is converted to a MultiServ service supported switch type or until their ESSX service period of rate stability expires, whichever occurs first. If the central office is converted to a MultiServ service supported switch type prior to expiration of the ESSX service payment period, conversion will proceed as in A112.20.5 following.

A112.20.2 Terms and Conditions

- A. MultiServ service is furnished subject to the availability of facilities and features from central office equipment located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions.
- B. Each system established must consist of a minimum of one (1) main station line.
- C. Main station lines will be comprised of the Station Link (or equivalent) and Feature Groups which include access to the serving central office equipment. Access to the exchange network will be included in the Station Link.
- D. MultiServ service systems must include exchange access and main station lines.
- E. MultiServ service will not be offered in a manner which provides for intercommunication only.

(T)

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.2 Terms and Conditions (Cont'd)

- F. Facilities may be used for direct connections between a subscriber's MultiServ service and other systems primarily for communication between stations of the two systems. Rates and charges for these connection facilities are specified in either Section A13. or Section B3. of the Private Line *Guidebook*. Private facility access charges apply. These facilities, connecting MultiServ service, may be arranged to provide completion of incoming or outgoing exchange and long distance message network through the subscriber's MultiServ service system to or from other systems, provided such connections to the exchange or long distance message network are only made one system at a time. (T)
- G. Feature Groups as listed in A112.20.10 may require customer-provided compatible terminal equipment. (T)
- H. If the subscriber of MultiServ service elects a Measured Rate service, usage charges as specified in Section A3. are applicable on calls to locations outside the subscriber's system in addition to rates and charges in this and other *guidebook* sections for MultiServ service and other associated services. Usage charges are not applicable on calls originated and terminated within the same MultiServ service system, unless the system is equipped with Assumed Dial "9". (T)
- I. Suspension/Denial of Service - MultiServ service may be suspended or denied at the subscriber's request or at the instance of the Company.
 - 1. Suspension at the request of the subscriber will be allowed on the link portion of the main station line at 50 percent of the rate regularly charged. Feature Groups and optional Features outlined in Section A112 will be suspended at no recurring charge during the period of suspension unless otherwise noted. Other rules and restrictions as outlined in Section A2 apply. The subscriber may request this suspension for a maximum of three months in succession. Restoration charges will be applicable per line as specified in Section A4. (T)
 - 2. Denial at the instance of the Company will be allowed for non-payment of rates and charges for MultiServ service and the associated services. Restoration charges will be applicable per line as specified in Section A4. (T)
- J. Directory Listings will be furnished subject to the rates, *terms and conditions* specified in Section A6. A standard Directory Listing will be provided at no charge for each main station line. (T)
- K. Service charges, as specified in Section A4., apply to each station link in the same manner as for an individual business line and to all of the subscriber's systems unless otherwise indicated. (T)
- L. MultiServ service installation charges are due on initial installation unless arrangements are made for Installment or Deferred Billing as specified in Section A2. (T)
- M. End User Charges as specified for End User Common Access Service in BellSouth Telecommunications Inc., FCC No. 1, Section 4 and Subscriber Line Charges in Section A3. apply as appropriate. For purposes of application of End User Charges only, MultiServ service station lines for use by residents of dormitory living quarters, barracks and nursing homes will be considered residential service. Main station lines terminated in such housing for administrative or business use will be considered business service. (T)
- N. Concessions will not apply to MultiServ service except those allowed to Corporate Communication/Affiliate Billing MultiServ service accounts. (T)
- O. Service order charges will not apply for the provision of Calling Number Delivery Blocking. (T)
- P. During collection or distribution of the subscriber's ACD-NMR and/or Switch-Computer Application Interface (SCAI) Link data, due to faults or defects in telephone equipment, data may be destroyed. The Company shall not be liable, directly or indirectly, for damages, except as outlined in A2.5.1. (T)
- Q. Customer Premises Equipment (CPE) and software for use with ACD and/or Switch-Computer Application Interface (SCAI) Link is the responsibility of the user for provisioning. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of ACD Service render any facilities provided by the customer obsolete, or require modification or alteration of such equipment or system, or otherwise affect its use or performance. (T)
- R. A mixture of Flat Rate and Measured Rate Local Exchange Service will not be allowed. (T)
- S. ISDN Business Service (ISDN - IBS) lines may be purchased out of Section A42. to be associated with MultiServ service or MultiServ PLUS service. Terms and conditions of MultiServ service and MultiServ PLUS service will apply to these ISDN - IBS lines except as otherwise stated in Section A42. (T)

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.2 Terms and Conditions (Cont'd)

S. (Cont'd)

Each ISDN Basic Rate DSL Access Arrangement will be counted as a MultiServ service or MultiServ PLUS service line in determining the total system size.

MultiServ service Optional Features compatible with ISDN may be purchased for use with these ISDN - IBS lines. MultiServ service Feature Groups are not available for use with these ISDN - IBS lines.

ISDN - IBS lines not associated with a MultiServ service or MultiServ PLUS service may not purchase features from this section of the Guidebook.

T. Expanded local serving Area Calling Plans which are available to MultiServ service and MultiServ PLUS service subscribers in Louisiana include Local Optional Service (LOS) and Local Optional Service B (LOSB). Flat Rate and Measured Rate (LOS) and (LOSB) service available to the subscriber is outlined in Section A3.

A112.20.3 Unconditional Satisfaction Guarantee

A. If the subscriber is not completely satisfied with MultiServ service within ninety (90) days of the effective billing date, all payments will be handled as indicated in this paragraph.

1. The following charges will be refunded:

a. Nonrecurring and recurring charges (up to ninety days recurring billing) for rate elements as specified in this sub-section for MultiServ service.

b. Service charges from Section A4.

2. The following charges will not be refunded:

a. End User Common Line Charges as specified in BellSouth Telecommunications, Inc., FCC No. 1, Section 4.

b. Usage Charges from Section A3.

3. Customer-provided equipment acquired for use with MultiServ service will not be included in this plan.

4. This guarantee will not apply to transfers of service, moves, conversions or recasts.

5. MultiServ service will be disconnected no later than ten (10) days after receipt of notification of dissatisfaction.

6. Subscribers requesting an extension of the ten (10) day disconnection interval to accommodate installation of a replacement product/service, will be billed the recurring rates for that period, not to exceed six (6) months.

7. Subscribers must retain continuous service beyond the ninety (90) days via other Local Exchange Services as offered in Section A3.

A112.20.4 Intercept of Calls

A. Rerouting of calls that cannot be completed to the number originally dialed will be offered either standard Intercept or Automatic Number Referral.

1. Intercept - Incoming calls from the exchange and long distance message networks to unassigned station numbers are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.

Intercommunicating calls to unassigned station numbers are intercepted by central office recorded announcement equipment which is common to all subscriber's MultiServ service systems served out of the same office. The announcement states that the number is not in service.

(C)

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.4 Intercept of Calls (Cont'd)

- A. Rerouting of calls that cannot be completed to the number originally dialed will be offered either standard Intercept or Automatic Number Referral. (Cont'd)
- 2. Automatic Number Referral - Incoming calls to a telephone number that has been disconnected or changed may be routed to a mechanized announcement that tells the calling party that the number they dialed is not in service. Telephone numbers that are listed in the directory for main station lines will be provided Automatic Number Referral (if desired) at no charge if disconnected or changed. For numbers that are not listed, charges from A112.20.13 apply per telephone number referred. (C)

A112.20.5 Conversions

- A. ESSX Service¹ may be converted to MultiServ service as follows:
 - 1. Nonrecurring charges from this sub-section will not apply.
 - 2. Termination Liability/Cancellation Charges for original service will not apply.
 - 3. Service charges from Section A4. will not apply.
 - 4. Changes, additions or rearrangements for new lines and/or optional features:
 - a. Nonrecurring charges from this sub-section will apply.
 - b. Service charges from Section A4. will apply.
- B. Subscribers of MultiServ service with analog Feature Groups must, upon the conversion of the central office facilities from analog to digital, convert to a corresponding digital Feature Group.
 - 1. Conversion will be within thirty (30) days of the central office conversion.
 - 2. Nonrecurring charges from this sub-section will not apply.
 - 3. Cancellation charges for original service will not apply.
 - 4. If subscriber had a Rate Stability Plan in effect, it will continue uninterrupted.
 - 5. Service charges from Section A4. will not apply.
 - 6. Changes, additions or rearrangements:
 - a. Nonrecurring charges from this sub-section will apply.
 - b. Service charges from Section A4. will apply.
- C. Subscribers of MultiServ PLUS service may convert to MultiServ service.
 - 1. Cancellation charge, if in effect, will not apply.
 - 2. Nonrecurring charges from this sub-section will apply.
 - 3. Service charges from Section A4. will apply.

A112.20.6 Payment Schedules

- A. General
 - 1. MultiServ service is offered at the rates and charges indicated in this sub-section.
 - 2. The rates in this sub-section are offered either as month-to-month rates or may be stabilized for periods of 36 to 59 months or 60 to 120 months with a Rate Stability Plan. A subscriber may not have month-to-month rates on a system with Rate Stability.
 - 3. MultiServ service under month-to-month rates is subject to Company initiated rate changes.

Note 1: Denotes ESSX service - VS, S, M, L or Digital ESSX service - VS, S, M, L.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.6 Payment Schedules (Cont'd)

A. General (Cont'd)

4. MultiServ service Station Links will have maximum rates indicated in this *Guidebook* section. These rates may be reduced with thirty day notice to subscribers. Current rates applicable to the Station Links will apply to all subscribers. Subscribers may apply for rates developed and offered via a Contract Service Arrangement as specified in Section A5. (T)

B. Additions

A MultiServ service subscriber may add main station lines and/or any feature/capability to the existing system at any time during the period of service.

C. Disconnects

1. When a portion of a subscriber's MultiServ service is disconnected, the expiration date of the remaining service will not be affected.
2. Cancellation charges may be applicable whether the disconnection occurs at the subscriber's request or at the instance of the Company.
3. A twelve (12) month minimum service period will apply to customers who convert from an ESSX service or Digital ESSX service contract period to MultiServ service. The appropriate cancellation charge (see A112.20.8.C. following) will apply to month-to-month subscribers who terminate their MultiServ service prior to their minimum service period expiration.

D. Transfer of Contract

Service may be transferred to a new subscriber at the same location upon prior written concurrence by the new subscriber as specified in Section A2. (T)

E. Deferred Payment

Nonrecurring charges may be deferred or installment billed as specified in Section A2. (T)

F. Prepayment

Recurring charges may be prepaid as specified in Section A2. (T)

G. Month-to-Month Payment Plan

1. The rates indicated in this section are available on a month-to-month basis under the *terms and conditions* in this sub-section. (T)
2. Month-to-month subscribers may elect to convert to a Rate Stability Plan under the following conditions:
 - a. No credit will be given for payments under the month-to-month payment plan.
 - b. Service at month-to-month rates when converted to the Rate Stability Plan will apply towards fulfillment of the period for a Cancellation Charge.
 - c. The Rate Stability plan will begin with the date requested at the prevailing rates.
 - d. A service order charge as specified in Section A4. will not apply.(T)

H. Rate Stability Plan

1. The rates indicated in this section may be stabilized for 36 to 120 months with a Rate Stability Plan under the *terms and conditions* preceding and in this sub-section. (T)
2. Subscribers who choose this option will have the MultiServ service rates indicated in this sub-section stabilized for 36 to 59 months or for 60 to 120 months at the prevailing rates. Stabilized rates will not be subject to Company initiated increases for the duration of the stabilized period. (T)
3. Additions to a system that is under a Rate Stability Plan will be added under the Rate Stability Plan in effect and will be made to be coterminous with the MultiServ service under the Rate Stability Plan at the prevailing rate. (T)
4. All main station lines and optional features/capabilities must be rate stabilized for the same period. (T)
5. At the expiration of the subscriber's chosen Rate Stability Plan, the subscriber may elect services at rates as currently offered in this *Guidebook*. Once the subscriber's chosen Rate Stability Plan expires, the Company reserves the right to convert the subscriber's account to the month to month rates and charges as outlined in this *Guidebook*. (T)

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.7 Cancellation Charges and Moves of Service

A. Cancellation charges

1. Cancellation charges will apply to subscribers under the Rate Stability Plan and to month-to-month subscribers who do not meet the 12 month minimum service period.
2. Cancellation charges will apply only to the total removal of the subscriber's MultiServ service system.
3. Cancellation charges will be applied where service provided under a Rate Stability Plan is removed prior to the expiration of the Rate Stability Plan (see A112.20.8.C. following).
4. When a subscriber's MultiServ service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separate services listed following, termination or cancellation charges will not apply when:
 - a. the completed service period is 12 months, and
 - b. the service period of the new arrangement for the separate service equals or exceeds the remaining service period of the disconnected arrangement, and
 - c. the service orders to install the separate service and disconnect the existing service are related together and there is no lapse in service between installation of the separate service and disconnection of the existing service, and
 - d. the service orders are for the same subscriber at the same location.

For the purposes of determining the separate services to which the preceding conditions apply, the following list will be used:

- MegaLink Service
- MegaLink Channel Service
- MegaLink ISDN Service
- LightGate Service

B. Moves of Service

1. A MultiServ service subscriber may move a system within the same jurisdiction (the locations in the state within which the Company is authorized to operate). Service may be moved within the same central office or to another central office.
2. For complete moves within the same central office:
 - a. Cancellation charges will not apply.
 - b. Rate Stability Plan in effect will continue uninterrupted.
 - c. Nonrecurring charges from this sub-section will not apply.
 - d. A change of telephone number is not required. If a change in telephone number is requested, all nonrecurring charges (except charges for station links) apply as if for a new installation.
 - e. Service Charges from Section A4. will apply.
 - f. Changes, additions and/or rearrangements:
 - Nonrecurring charges from this sub-section will apply.
 - Service charges from Section A4. will apply.
3. For complete moves to another central office:
 - a. Cancellation charges will not apply.
 - b. Rate Stability Plan in effect will continue uninterrupted.
 - c. Nonrecurring charges from this sub-section apply as for a new system.
 - d. Service Charges from Section A4. will apply.
 - e. Changes, additions and/or rearrangements:
 - Nonrecurring charges from this sub-section will apply.

A112.20.8 Common Rates and Charges

A. General

1. Each main station line will be comprised of a Feature Group connected to the subscriber's premises by a Station Link or the equivalent.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.8 Common Rates and Charges (Cont'd)

A. General (Cont'd)

1. Each main station line will be comprised of a Feature Group connected to the subscriber's premises by a Station Link or the equivalent. (Cont'd)
 - a. The rates and charges specified herein for main station and bridged station links are applicable to each main station location and bridged station location respectively to which a customer-provided instrument can be connected.
 - b. Rates for the main station lines of MultiServ service subscribers will be based on the following criteria:
 - Station Link selected.
 - The appropriate Feature Group requested.
 - c. Where main station lines are extended to a premises served by a central office other than the central office providing the telephone number, the interoffice channel will be provided at the rates in I. following of this *Guidebook*. Rates for the MultiServ service Station Link will apply for the connection from the distant central office to the subscriber's premises. Rates from A112.20.8 and A112.20.9 will apply to each main station line so served. (T)
 - d. Exchange Access
 - Exchange Access is provided by means of the Station Link. Usage charges may apply.
 - Presubscription of a Carrier of Preference is specified in Section 13 of the Interstate Access Services Tariff.
2. During selected promotional periods, the Company may conduct a special promotion of MultiServ service or MultiServ PLUS service. Such promotions may also include the waiver of the MultiServ service or MultiServ PLUS service recurring, nonrecurring and/or usage charges.

B. Service Establishment Charge

1. The following charges are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*. (T)
 - a. Service Establishment Charges
 - (1) Basic Service Establishment Charge

	Nonrecurring Charge	Monthly Rate	USOC
(a) Standard common equipment, each	\$250.00	\$-	M1ACS
(b) Common equipment customized by the Company at the subscriber's request, each ¹	325.00	-	M1ACC

C. Cancellation Charges

1. The following charges are incurred when a total disconnect of a MultiServ service system provided under a Rate Stability Plan occurs prior to the expiration of that Rate Stability Plan.
 - a. Cancellation Charge
 - (1) Per system

	Nonrecurring Charge	USOC
(a) Disconnect in months 1-36	\$3,000	M1BPS
(b) Disconnect in months 37 and thereafter	2,000	M1BPT

Note 1: A subscriber requested change from standard common equipment to customized common equipment will incur the difference between the two charges.

(b)	Per mile	-	-	-	-	.15	.10	
2.	Per Non-ISDN channel (for installations completed on or after December 29, 1995)							
	(a) Each	240.00	30.00	27.00	25.50	-	M1GBC	
	(b) Per mile	-	-	-	-	1.95	1.75	
3.	Bridging ⁴						M1GBM	
	(a) Per channel bridged	100.00	11.25	10.25	9.40	-	-	

J. Miscellaneous Terminations (Dial or Touch-Tone operation)

These charges apply in addition to the rates and charges for the associated facilities in other sections of this **Guidebook** and other Company **Guidebooks**.

(T)

Note 1: A maximum of three Bridged Links or Extended Bridged Links will be allowed per main station line depending on the availability of facilities.

Note 2: Some services and features are not compatible with the operation of Bridged Links. These services and features include, but are not limited to, ISDN Station Lines, Caller ID, Electronic Business Sets, and Message Waiting Lamp Indication.

Note 3: When the different premises are served from a different serving wire center, rates and charges in A112.20.8.I. also apply.

Note 4: Applies only to Extended Bridged Links. A maximum of three Bridged Links or Extended Bridged Links will be allowed per main station line depending on the availability of facilities.

A112.20.9 Station Links

A. Rates and Charges

A MultiServ service main station line will be composed of the appropriate Feature Group and the station link or equivalent. Access to the exchange network will be included in the station link rate. Zone charges do not apply to the station links.

1. Station Links

Station links provide service from the subscriber's network interface location to the serving central office location.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.10 Feature Groups

A. General

1. The quantity of Feature Groups offered will be dependent on the switch type.
2. Optional capabilities such as Tandem Switching Features, Systems Communication Service, Optional Service Features, Electronic Business Set Service, Multi-Account Service, and Customer Control are located elsewhere in this section. (T)
3. The features are offered where facilities permit. This will be dependent on the serving central office.
4. Feature operation may vary based on the serving central office.
5. Each station line will be associated with one and only one Feature Group.
6. Combining of features from two or more Feature Groups will not be allowed.
7. The combining of one or more **unregulated** features with features or services associated with any *guidebook* rate element will not be allowed. (T)
8. All station lines in the same Multi-Line Hunt group must be equipped with the same Feature Group.

B. Non-Electronic Business Set Feature Group-Basic is available in all switch types from which MultiServ service is provided and will provide access to the following feature capabilities. These capabilities are not subject to Customer Control and are a part of all Non-Electronic Business Set feature groups unless otherwise noted.

1. Exchange and long distance message network calls may be made to main station lines and attendant positions by dialing the number associated with that main station line or attendant position.
2. Exchange and long distance message network calls may be made from main station lines and attendant positions via direct outward dialing.
3. Station-to-station intercommunication via two to seven-digit dialing between main station lines of the subscriber's system.
4. Outgoing long distance message calls dialed by a main station line will be identified by the seven-digit main station line number (only calls billed to the subscriber by this Company will be provided this identification).
5. Touch-Tone service.
6. Common recorded announcement interception of calls to unassigned/nonworking station numbers.
7. Basic Hunting (Optional)

C. 1AESS Feature Groups

1. Feature Group Capabilities
 - a. Feature Group 1 will provide access to the following feature capabilities only. Hunting is not compatible with this feature group:
 - Automatic Line/Direct Connect
 - Touch-Tone service
 - b. Feature Group 2 will provide access to the following feature capabilities and the Non-Electronic Business Set Feature Group-Basic features:
 - Call Block
 - Call Forwarding Busy Line Fixed
 - Call Forwarding Don't Answer Fixed
 - Call Forwarding Variable
 - Call Hold
 - Call Pickup
 - Call Return

A112.20.12 Systems Communication Service (SCS)

A. General

1. Systems Communication Service (SCS) is an arrangement that provides calling, with abbreviated dialing, among multiple MultiServ service or MultiServ PLUS service systems. SCS allows users in one MultiServ service or MultiServ PLUS service system to dial four or five digits to reach users in the other destinations included in the SCS arrangement. Destinations included in the SCS arrangement may be PBX, MultiServ service, MultiServ PLUS service, or any other location which may be dialed directly (the subscriber may subscribe to MultiServ service or MultiServ PLUS service at the other locations, but it is not required). The calls can be local or toll.
2. The only function SCS offers to MultiServ service or MultiServ PLUS service subscribers is abbreviated dialing to the other selected locations.

B. Terms and Conditions

(T)

1. SCS will allow four or five-digit dialing on a system basis to the subscriber's distant number range. SCS will prefix any Access Code (if required), Home (HNP) or Foreign Numbering Plan Area (FNPA) (if required), and NXX dialed by the subscriber before routing to the distant location.
2. The four or five-digit abbreviated dialing ranges cannot be duplicated at any other SCS location or destination.
3. MultiServ service or MultiServ PLUS service common equipment is required at each serving central office at which SCS is provided.
4. SCS will be offered only where facilities permit.
5. IntraLATA toll calls will be subject to the applicable rates for the authorized intraLATA toll service selected by the subscriber. InterLATA toll calls will be routed to the Interexchange Carrier (IC) to which the subscriber has presubscribed.
6. When SCS involves more than one subscriber, each subscriber must consent to sharing of information with other subscribers that is necessary for implementation of SCS.

C. Rates and Charges

(1) System Abbreviated Dialing Capability for 100 Numbers

(a)	Per system ² (1AESS, DMS-100, 5ESS, EWSD [®])	\$51.00	-	-	-	M2ADA

19. Calling Number Delivery Blocking (1AESS, DMS-100, 5ESS, EWSD [®])							
(a) Permanent - Per line (Agency) ^{1,2,3}							M2NFA

Note 1: Calling Number Delivery Blocking - Permanent enables a subscriber to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the subscriber's line. This feature is in operation on a continuous basis. This feature is available upon request to domestic violence intervention agencies, state and county departments of human resource shelters, the Attorney General Crime Victim Assistance office, and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without blocking.

Note 2: This feature is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the subscriber's CPE to perform satisfactorily with this network feature.

Note 3: If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

A112.20.14 Electronic Business Set Service

A. General

Electronic Business Set Service provides central office features for use with subscriber premises electronic telephone set equipment served from a DMS-100 central office switch that is equipped to provide the service.

B. Terms and Conditions

1. Each electronic business set will require the Electronic Business Set Feature Package - Basic and the appropriate Station Link.
2. Each electronic business set must have a Primary Directory Number associated with it.

C. Rates and Charges

Requires Electronic Business Set Feature Group - Basic.

Additional optional features are available in A112.20.13.

1. Multiple Appearance Directory Number (MADN)

(a) Same Telephone Number as PDN or Station Line	-	.35	.30	.25	M4CPA
(b) Not PDN/Station Line, First Appearance	-	.35	.30	.25	M4C1A
(c) Not PDN/Station Line, Additional Appearance	-	.35	.30	.25	M4CAA

2. Per Key, each

(a) ACD Agent Not Ready Key	-	.25	.20	.15	M4DAF
-----------------------------	---	-----	-----	-----	-------

Note 1: Requires ACD Basic.

Note 2: Includes functionality of Virtual Facility Group (VFG) Option which provides an optional link between a VFG and an ACD group.

Note 3: Requires a dedicated Four-wire Full Duplex analog or digital facility from the Company's central office to the subscriber's premises. Appropriate Private Line Service charges apply.

Note 4: Requires Network Management Reports.

Note 5: Requires a dedicated Four-wire Full Duplex digital facility from the Company's central office to the subscriber's premises. Appropriate Private Line Service charges apply.

Note 6: The Switch-Computer Application Interface (SCAI) Link must be used in conjunction with ACD.

Note 1: Requires an Additional Directory Number (ADN).

Note 2: Applicable to PDN, ADN, or MADN that is not a Station Link or Primary Directory Number.

Note 3: This feature is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the subscriber's CPE to perform satisfactorily with this network feature.

Note 4: Calling Number Delivery Blocking - Permanent enables a subscriber to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the subscriber's line. This feature is in operation on a continuous basis. This feature is available upon request to domestic violence intervention agencies, state and county departments of human resource shelters, the Attorney General Crime Victim Assistance office, and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without blocking.

Note 5: If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

Note 6: Calling Number Delivery Blocking - Per Call allows a subscriber to temporarily prevent the transmission of that subscriber's Directory Number and/or Directory Name and thus control its availability to the called party. This can be accomplished by dialing a preassigned access code prior to making each call on which the transmission of the Directory Number/ and/or Directory Name should be prevented.

A112.20.15 Customer Control

A. Description of Service

- Customer Control is a feature of MultiServ service and MultiServ PLUS service which utilizes a computer-based operations system accessed via a Company Secure Network. Customer Control allows end users to activate and/or deactivate selected features and/or change certain service options and feature configurations on predesignated Multiserv service or MultiServ PLUS service main station lines. These changes can be performed on a per line or a bulk change basis. Subscriber provided terminal equipment is required for the operation of Customer Control. The Customer Control feature will interface with the DMS-100, 5ESS, 1AESS, and EWSD® central office switching systems where facilities permit.
- Customer Control subscribers are subject to MultiServ service **terms and conditions** as stated in A12.20 or MultiServ PLUS service **terms and conditions** as stated in A112.21 following. (T)
- All features which are available via MultiServ service may not be available for Customer Control from all central offices.
- The Company will provision the features contained in the most feature rich feature group on all Non-Electronic Business Telephone Set main station lines which are controllable. Depending on the subscriber's serving central office switch type, all features in the most feature rich feature group may not be controllable via Customer Control.
- Features which can be controlled by the subscriber may only be assigned/provisioned on like MultiServ service or MultiServ PLUS service Station Link type main station lines.
- Customer Control allows the subscriber to schedule changes for completion by the next business day or for a future business day. Additional priority changes may be requested and the changes completed the same day subject to **Terms and Conditions** in this **Guidebook**. (T)
- Customer Control is furnished subject to the availability of facilities and features.
- This feature will be provided to the subscriber as Customer Control - Basic.
- Customer Control will consist of the following rate elements:
 - Customer Control - Basic, Service Establishment - Initial Setup, Per System
 - Customer Control - Per Line
 - Initial setup of a subscriber working in a 1AESS central office

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

- A. Description of Service (Cont'd)
 - 9. Customer Control will consist of the following rate elements: (Cont'd)
 - b. Customer Control - Per Line (Cont'd)
 - (2) Initial setup of a subscriber working in a 5ESS central office
 - (3) Initial setup of a Non-Electronic Business Set subscriber working in a DMS-100 central office
 - (4) Initial setup of a subscriber working in a EWS® central office
 - (5) Setup of an Electronic Business Set service subscriber working in a DMS-100 central office
 - (6) Setup of any subscriber who converts from ESSX Customer Administration Service (ECAS) or Digital ESSX Customer Administration Service (DECAS), from Section A112. to Customer Control
 - c. Security Card - Per Card
 - 10. The following rate element(s) are optional for Customer Control:
 - a. Processor Connection, Per Additional Termination
 - b. User Identification Codes, Per Additional User Login
 - c. Additional Data Base, Per System
 - d. Activation/Deactivation/Change of a Customer Controllable Feature for an existing MultiServ service or MultiServ PLUS service subscriber by the Company at the subscriber's request subsequent to initial installation
 - Per change, per line
 - Bulk change
 - e. Activation/Deactivation/Change of a customer controllable feature for an existing MultiServ service or MultiServ PLUS service subscriber by the Company at the subscriber's request on Electronic Business Set Service:
 - Per change, per line
 - f. Completion of TN swap on customer controllable lines at the subscriber's request
 - g. Additional System Manager training
 - h. Subsequent System Manager training
 - 11. For access to Customer Control - Basic, the subscriber will be required to provide a VT100 compatible terminal or a Personal Computer (PC) with the appropriate software to emulate such a terminal, a dial-up modem and a voice grade analog access line at the subscriber's premises. If the subscriber requires the ability to print Customer Control related information, they will be required to establish printing capabilities on their premises, by securing a VT102 or greater terminal and printer.

The dial-up modem must be compatible with one of the following standards - ITU-T (International Telecommunication Union - Telecommunication Standardization Sector, formerly CCITT) standards V.32bis, V.32, V.22bis, and V.22 or industry specifications V.32terbo or Bell 212A. Compression standard V.42bis and error control standard V.42 are supported.

The appropriate Service Establishment, Per Line and Security Card rate elements can be obtained from E. following.

- 12. The following subscriber directory information may be maintained for all of the subscriber's main station lines via the Customer Control data base:
 - Station Telephone Number
 - Name
 - Organization
 - Location

The information in the Name, Organization and Location fields must be entered and updated by the subscriber.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

A. Description of Service (Cont'd)

13. To gain access to the Company's Dial Access network, the subscriber must have one User Identification Code for each System Manager accessing the Customer Control Database. One Security Card will also be required for each System Manager accessing the Customer Control Database. The Security Card may be ordered from E. following. The Security Card rate element will provide for the initial card or for the issuance of multiple cards to different users at the subscriber's premises or for the replacement of lost, stolen or expired cards.

If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of any existing Security Card so the Company can ensure that the card is validated for multiple features and/or services.

14. Customer Control - Per Line allows the subscriber to activate and/or deactivate any feature which is controllable.

The Company will provision Non-Electronic Business Set subscriber's main station line(s) with the features from the most feature rich Feature Group as described in A12.20.10 preceding when the subscriber orders Customer Control - Per Line as outlined in E. following. The subscriber who orders Customer Control - Per Line from the aforementioned *Guidebook* section will do so in conjunction with ordering MultiServ service or MultiServ PLUS service and will not order a Feature Group from A12.20.10 preceding.

(T)

15. The initial provisioning of features on an Electronic Business Set Service subscriber's main station line(s) will be done when the subscriber orders the Electronic Business Set Service basic Feature Group and Electronic Business Set Service features associated with MultiServ service from A12.20.10 preceding. Customer Control - Per Line will be ordered from E. following after MultiServ service or MultiServ PLUS service is working and will give the subscriber the ability to manipulate controllable features.

When a subscriber converts from ESSX Customer Administration Service (ECAS) or Digital ESSX Customer Administration Service (DECAS), as outlined in Section A12., MultiServ service or MultiServ PLUS service must be ordered and provisioned prior to ordering Customer Control. The Company will place the requested MultiServ service feature group and any optional features on the subscriber's line(s). Any controllable features that were provisioned on the subscriber's line via MultiServ service will remain on that line. At the time Customer Control is ordered, the Company will make all controllable features available but will not provision any new features on the subscriber's line(s). Any features which are not controllable via Customer Control must be purchased and provisioned from A12.20.13 preceding. Customer Control - Per Line will be ordered from E. following and will give the subscriber the ability to manipulate controllable features.

(T)

The subscriber will be responsible for deactivating features they do not want on main station line(s) which are equipped with Customer Control. The subscriber will also be responsible for placing optional features that are controllable on their main station line(s) which are equipped with Customer Control.

16. The subscriber will be provided one Processor Connection in conjunction with the Service Establishment, Initial Setup. Additional Processor Connections can be obtained from E. following.

17. The subscriber will be provided one User Identification Code in conjunction with the Service Establishment, Initial Setup. Additional codes will be needed if multiple System Managers are accessing the data base at the same time. Additional User Identification Codes can be obtained from E. following.

18. The subscriber will be provided one Data Base setup in conjunction with the Service Establishment, Initial Setup. The Data Base setup includes the feature initialization. Additional Data Base setups can be ordered from E. following.

19. At the subscriber's request, the Company may, on a temporary basis, agree to perform the following Activation/Deactivation/Change functions, as outlined in E. following, for existing MultiServ service or MultiServ PLUS service subscribers:

- Change station features,
- Delete features from a line or
- Add new features to a line.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

A. Description of Service (Cont'd)

20. At the subscriber's request, the Company may, on a temporary basis, agree to perform Telephone Number (TN) Swaps for existing or new MultiServ service or MultiServ PLUS service as outlined in E. following. TN Swaps can only be performed for like link type main station lines.
21. At the subscriber's request, the Company may, on a temporary basis, agree to perform the following Activation/Deactivation/Change functions, as outlined in E. following, for existing MultiServ service or MultiServ PLUS service for Electronic Business Set Service subscribers:
 - Change station features,
 - Delete features from a line or
 - Add new features to a line.

The performance of these functions on a Per Key, Per Set, Per Directory Number or Per Key List basis will be determined by the feature(s) that the subscriber has purchased from A112.20.14 preceding.

22. Initial training of the subscriber for up to two System Managers in the use of Customer Control will be provided as the feature is put into service. Any Additional System Managers Training or Subsequent System Manager Training charge will be provided at an hourly rate as outlined in E. following. Prior to receiving this training, the subscriber should attend MultiServ service System Manager training as a prerequisite.
23. Customer Control provides the subscriber with the ability to print standard administrative reports.

B. Terms and Conditions

1. Customer Control is furnished subject to the availability of facilities, telephone numbers and the ability of the software to control the requested feature.
2. Limitations and use of Customer Control as stated in Section A2. will apply.
3. Suspension of service as specified in A112.20.2 preceding is not applicable for this feature. Using Customer Control to suspend MultiServ service or MultiServ PLUS service on a station does not affect the billing on the line. The subscriber will continue to pay appropriate rates and charges on the line.
4. In no event shall the Company be liable for any losses or damages of any kind resulting from the unavailability of its equipment or facilities or for any act, omission, or failure of performance by the Company, or its employees, or agents, in connection with this *Guidebook*.
5. To access the Customer Control database, the subscriber must use a voice grade analog line.
6. For main station lines equipped with Customer Control, the subscriber can verify and/or display the assignment of features on a single line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
7. Certain MultiServ service or MultiServ PLUS service main station lines may be specified by the subscriber to be exempt from the Customer Control feature. Additionally, the Company reserves the right to make station lines inaccessible for Customer Control.
8. Features for Customer Control exempt main station lines must be requested via a Service Order and added by the Company. Rates and Charges in E. preceding apply as appropriate. Appropriate Service Charges specified in Section A4. also apply.
9. Customer Control changes must be entered in conjunction with the following:
 - Prior to Company designated schedules, or
 - As priority changes, or
 - As future dated transactions by the subscriber.
10. Subscribers who order an initial set of Customer Control - Per Line as outlined in E.2. following will be required to order Customer Control - Basic at the same time MultiServ service or MultiServ PLUS service is initially ordered. The subscriber will not order a Feature Group as outlined in A112.20.10 preceding. The Company will provision the subscriber's main station line(s) with the features (for their central office switch type) from the most feature rich Feature Group described in A112.20.10.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

B. *Terms and Conditions* (Cont'd)

11. Subscribers who order Customer Control - Per Line as outlined in E.3. following will be required to order Customer Control - Basic after MultiServ service or MultiServ PLUS service is established. The features which are provisioned on the subscriber's main station line in conjunction with MultiServ service or MultiServ PLUS service will remain. The subscriber may use Customer Control to manipulate any controllable feature. (T)

12. The following types of lines will be restricted from TN Swaps rearrangement capability. Service options and feature change capabilities will still be available except on lines assigned to multiline hunt groups.

- Station lines assigned to multiline hunt groups.
- Attendant lines
- Any MultiServ service or MultiServ PLUS service station line which has a special hardware configuration (e.g., ground start lines and lines having signal distribution points)
- Manual lines (e.g., station lines with full originating and/or terminating restrictions)

13. Changing the status of a station line from accessible to Customer Control to inaccessible or vice versa, must be done by the Company via a Service Order request. For station lines that are ordered without Customer Control, the appropriate rate element associated with the MultiServ service feature package applies. For station lines that are ordered with Customer Control, the Customer Control - Per Line charge applies. Appropriate Service Order Charges specified in Section A4. apply. (T)

14. The subscriber will be responsible for installation, maintenance and testing of customer-provided compatible terminal equipment (CPE).

15. The Company does not assume responsibility for the compatibility or suitability of the subscriber's (CPE) equipment.

16. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Customer Control render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance.

17. Customer Control supports dial-up access security through the use of a Security Card. Customer Control supports access security by requiring login and password identifiers. The subscriber must have one User Identification Code for each System Manager accessing the Customer Control Database. The User Identification Code includes a password and is used in conjunction with the Security Card. In addition, Customer Control ensures that the user can access only their portion of their database.

18. The subscriber will be required to authenticate with a Security Card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the host computer. Once the subscriber has purchased the Security Card, the Company will provide the subscriber with a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in E. following.

19. The subscriber must provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.

20. The Customer Control subscriber is responsible for initiating a Service Order to correct any information pertaining to the Company's Published Directory Listings that changed as a result of a Customer Control TN Swap. The appropriate Service Charges specified in Section A4. apply. (T)

C. Moves of Service

1. When a subscriber elects to move service from one serving central office to a different switch type serving central office, an additional Database charge as outlined in E. following will apply.
2. Moves of Service *terms and conditions* as outlined in A112.20.7.B. preceding are applicable. (T)

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.20 MultiServ Service (Cont'd)

A112.20.15 Customer Control (Cont'd)

D. Application of Rates

1. Customer Control is available on a per line basis to customers who subscribe to MultiServ service or MultiServ PLUS service. All MultiServ service features which are controllable will be subject to the rates outlined in E. following.
2. The appropriate Service Charge(s) specified in Section A4. applies to the subsequent establishment of Customer Control. (T)
3. If Customer Control is ordered at the same time as MultiServ service or MultiServ PLUS service, only one Service Charge is applicable.
4. Changing the status of a station line from accessible to Customer Control to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Charges specified in Section A4. apply. (T)
5. The Service Establishment, Initial Setup - Per System charge for Customer Control - Basic is for the initial establishment of the Customer Control feature.

This charge includes the initial Processor Connection charge, the initial User Identification Codes (Per User Login) charge, the initial Database Establishment (Per System) charge and training for up to two System Managers.

ECAS/DECAS subscribers who convert, during their contract period, from the grandfathered ESSX service or Digital ESSX service to MultiServ service or MultiServ PLUS service will have the Customer Control Service Establishment, Per System Installation Charges waived. Service Charges from Section A4. will not apply. (T)

6. A Customer Control - Per Line charge is applicable for each link type main station line that is equipped with Customer Control.
7. Subscribers who order an initial set of Customer Control - Per Line as outlined in E.2. following will be required to order Customer Control at the same time MultiServ service or MultiServ PLUS service is initially ordered. The monthly rate for Customer Control - Per Line will be billed in lieu of the monthly rate for a MultiServ service Feature Group.
8. Subscribers who order Customer Control - Per Line as outlined in E.3. following will be required to order Customer Control after MultiServ service or MultiServ PLUS service is established. The monthly rate for Customer Control - Per Line will replace the monthly rate for a MultiServ service Feature Group.
9. A Processor connection charge is applicable for each additional simultaneous dial access capability desired by the subscriber.
10. The User Identification Code charge is a nonrecurring charge applicable per additional user login requested by the subscriber.
11. The Security Card charge is applicable for each card ordered by the subscriber. This includes replacement of the card regardless of reason for replacement.
12. Activation/Deactivation/Change of a Customer Controllable feature by the Company at the subscriber's request subsequent to the initial installation of an existing Customer Controllable line is billed per change on each Non-Electronic Business Set line and Electronic Business Set System service line or per bulk change on each Non-Electronic Business Set line as described in E. following.
13. At the subscriber's request, the Company may, on a temporary basis, agree to perform Telephone Number (TN) Swaps for existing or new MultiServ service or MultiServ PLUS service. TN Swaps will be charged per line swapped as described in E. following.
14. The Service Establishment, Initial setup provides for the training of two (2) System Managers. Additional System Manager Training is provided by the Company at the subscriber's request. This training is provided at an hourly rate times the number of System Managers trained.
15. Subsequent System Manager Training is provided by the Company at the subscriber's request after the initial training is complete. This training is provided at an hourly rate times the number of System Managers trained.

A112.21 MultiServ PLUS Service

(Obsoleted 6-03-04, Type D) Obsolete service offering. Service rates and charges in this section are available for inward activity of existing subscribers only as specified following. Not available for new service/system or entire moves of existing service to new locations.

A112.21.1 General

A. Subscribers requesting one (1) or more main station lines in a system may subscribe to MultiServ PLUS service at the rates, *terms and conditions* specified in this *Guidebook*. These subscribers may apply for rates developed and offered via a Contract Service Arrangement as specified in Section A5. and further modified in A112.21.8 and A112.21.9. (T)

B. *Terms, Conditions* and Rates from A112.20 apply to MultiServ PLUS service unless specifically amended or abridged herein. (T)

A112.21.2 Terms and Conditions

A. Charges from Section A3. for Network Access Registers (NARs) apply. Each subscriber to MultiServ PLUS service must subscribe to a minimum of one (1) Network Access Register. (T)

Note 1: Appropriate Service Charges as specified in Section A4. apply. (T)

Note 2: This hourly rate is valid for training performed Monday through Friday, excluding legal holidays and must be performed during the Business Hours of 8 a.m. to 5 p.m. Training outside of the aforementioned days and hours is available via Special Assembly and will be performed at the appropriate time and materials rates.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.21 MultiServ PLUS Service (Cont'd)

A112.21.2 Terms and Conditions (Cont'd)

B. Rates and charges from A112.20 apply for the following:

1. Common Rates and Charges
 - a. Training Charges
 - b. Interoffice Channels
 - c. Miscellaneous Charges
2. Feature Groups
3. Tandem Switching Features (TSF)
4. Systems Communication Service (SCS)
5. Optional Service Features
6. Electronic Business Set Service (EBS)
7. Multi-Account Service (MAS)
8. Customer Control

C. Rates and Charges herein apply for the following:

1. Service Establishment
2. Cancellation Charge
3. Main Station Links

(T)

(T)

A112.21.3 Unconditional Satisfaction Guarantee

A. The following charges will also be refunded to a MultiServ PLUS service subscriber:

1. Network Access Register recurring charges
2. Grouping recurring charges

(Further explanation regarding Unconditional Satisfaction Guarantee is available in A112.20.3.)

(T)

A112.21.4 Intercept of Calls

A. Automatic Number Referral

Telephone numbers that are listed in the directory for main station lines will be provided Automatic Number Referral (if desired) at no charge if disconnected or changed. For numbers that are not listed, charges from A112.20.13 apply per number referred.

(Further explanation regarding Intercept of Calls is available in A112.20.4.)

(T)

A112.21.5 Conversions

A. ESSX service and MultiServ service may be converted to MultiServ PLUS service as follows:

1. Nonrecurring charges from this sub-section will not apply.
2. Termination liability or cancellation charges for original service do not apply.
3. Service Charges from Section A4. will not apply.
4. Changes, additions and rearrangements:
 - a. Nonrecurring Charges from this section will apply.
 - b. Service Charges from Section A4. will apply.

A112.21.7 Cancellation Charges and Moves of Service

Information shown in A112.20.7 is applicable for MultiServ PLUS service.

(T)

A112.21.8 Common Rates and Charges

A. Service Establishment Charges

1. The following charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*:
 - a. Service Establishment Charges
 - (1) Basic Service Establishment Charge

	Nonrecurring		
	Charge	USOC	
(a) Standard common equipment, each	\$350.00	M1ACS	
(b) Common equipment customized by the Company at the subscriber's request, each ¹	400.00	M1ACC	

B. Cancellation Charges

1. The following charges are incurred when a total disconnect of a MultiServ PLUS service system provided under a Rate Stability Plan occurs prior to expiration of that Rate Stability Plan:
 - a. Cancellation Charge
 - (1) Per system
 - (a) Disconnect in months 1-36
 - (b) Disconnect in months 37 and thereafter

10,000.00	M1BPS
7,500.00	M1BPT

C. Directory Listings

A standard Directory Listing will be provided for a main station line (not to exceed the number of NARs) at no charge. For Additional Listings, Designer Listings etc., see Section A6.

D. Training Charges - See A112.20.8.D.

E. Installation Charges - See A112.20.8.E.

F. Additional Directory Listings - See A112.20.8.F.

G. Service Charges - See A112.20.8.G.

H. Bridged Links - See A112.20.8.H.

I. Interoffice Channels - See A112.20.8.I.

Note 1: A subscriber requested change from standard common equipment to customized common equipment will incur the difference between the two charges.

A112.22 MultiServ Multi-Account Service (MMAS)

(Obsoleted 6-03-04, Type D) Obsolete service offering. Service rates and charges in this section are available for inward activity of existing subscribers only as specified following. Not available for new service/system or entire moves of existing service to new locations.

A112.22.1 General

- A. MultiServ Multi-Account service is a fully partitioned MultiServ service and/or MultiServ PLUS service for use in an environment serving multiple tenants. The designated area must be wholly within the confines of the serving wire center boundary.
- B. Rates and conditions for MultiServ Multi-Account service as specified following and where applicable are in addition to the rates and conditions specified for MultiServ service and/or MultiServ PLUS service and the other features and services provided.
- C. A subscriber account of MultiServ Multi-Account service may be either a Primary Account or a Secondary Account.
- D. A MultiServ Multi-Account service System consists of a Primary Account with or without Secondary Accounts.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.22 MultiServ Multi-Account Service (MMAS) (Cont'd)

A112.22.1 General (Cont'd)

- E. A Primary Account is the subscriber who accepts responsibility for the coordinating role for the MultiServ Multi-Account service System as specified herein.
- F. A Secondary Account is any MultiServ service or MultiServ PLUS service subscriber of a system other than the Primary Account.

A112.22.2 Terms and Conditions

- A. The provision of MultiServ Multi-Account service is dependent upon the establishment of a Primary Account under the terms and conditions for MultiServ service or MultiServ PLUS service. All other subscribers to a MultiServ Multi-Account service are considered Secondary Accounts. All Secondary Account agreements for MultiServ service or MultiServ PLUS service will be coterminous with the MultiServ service or MultiServ PLUS service of the Primary Account.
- B. The Primary Account accepts responsibility for the training of Secondary Accounts and will provide assistance in the coordination of MultiServ service or MultiServ PLUS service for Secondary Accounts. As a part of the coordinating role, the Primary Account is also responsible for insuring that the minimum system size established for MultiServ service or MultiServ PLUS service is maintained. The Primary Account is responsible for any cancellation charges applicable for the Primary and Secondary Accounts in the MultiServ Multi-Account service System.
- C. MultiServ Multi-Account service will provide partitioned MultiServ service and/or MultiServ PLUS service for each account subscribing to MultiServ Multi-Account service.
- D. Station-to-station calling is limited to MultiServ service or MultiServ PLUS service lines within each MultiServ Multi-Account service. Intercom calling between unaffiliated accounts is not permitted under MultiServ Multi-Account service.
- E. Each subscriber to MultiServ Multi-Account service is subject to all rates, *terms and conditions* of MultiServ service or MultiServ PLUS service as specified and where applicable in A112.20 and A112.21.
- F. Each account will be directly responsible to the Company for all charges associated with its service. The Company will bill each account individually for its service.
- G. Appropriate MultiServ service or MultiServ PLUS service nonrecurring charges will apply as follows:
 1. MultiServ service or MultiServ PLUS service establishment and any installation charges associated with the Primary Account's service for MultiServ service or MultiServ PLUS service will apply to the Primary Account of a MultiServ Multi-Account service System.
 2. MultiServ service or MultiServ PLUS service installation charges will apply to the service associated with the Secondary Account's service.
- H. Appropriate MultiServ service or MultiServ PLUS service recurring rates will apply as follows:
 1. MultiServ service or MultiServ PLUS service establishment and any recurring rates associated with the Primary Account's service for MultiServ service or MultiServ PLUS service will apply to the Primary Account of a MultiServ Multi-Account service System.
 2. MultiServ service or MultiServ PLUS service recurring rates will apply to the service associated with the Secondary Account's service.
- I. The minimum number of main station lines per MultiServ Multi-Account service System will apply as specified for MultiServ service or MultiServ PLUS service in this *Guidebook*.
- J. Each account must designate the preferred carrier for long distance service.
- K. MultiServ service or MultiServ PLUS service features are provided individually to each account. Where the MultiServ service or MultiServ PLUS service permits, features may be provided on a station basis or a system basis. If provided on a system basis, appropriate system charges apply to each account electing this option.
- L. A mix of flat rate and measured/message rate service subscribers within the same MultiServ Multi-Account service System is not permitted except as specified in A112.20.2.T.

A112.22.3 Conversions

- A. For conversion from a stand-alone MultiServ service to MultiServ service under MultiServ Multi-Account service, only a Service Order Charge as specified in Section A4. will apply.

A112. CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.22 MultiServ Multi-Account Service (MMAS) (Cont'd)

A112.22.3 Conversions (Cont'd)

- B. For conversion from a stand-alone MultiServ PLUS service to MultiServ PLUS service under MultiServ Multi-Account service, only a Service Order Charge as specified in Section A4. will apply.
- C. For conversion from a MultiServ service in a MultiServ Multi-Account service system to a stand-alone MultiServ PLUS service, the *terms and conditions* for conversions in A112.21.5 following will apply. (T)
- D. For conversion from a MultiServ PLUS service in a MultiServ Multi-Account service system to a stand-alone MultiServ service, the *terms and conditions* for conversion in A112.20.5 will apply. (T)
- E. For conversion of an individual subscriber within a MultiServ Multi-Account service system from MultiServ service to MultiServ PLUS service or vice versa, the *terms and conditions* in A112.20.5 or A112.21.5 will apply, as appropriate. (T)

A112.22.4 Rates and Charges

A. Common Equipment

1. The following rates and charges are for the MultiServ Multi-Account service feature only and are in addition to the appropriate and applicable service charges, monthly rates, and nonrecurring charges for MultiServ service or MultiServ PLUS service and other services to which MultiServ Multi-Account service subscribers may subscribe. Rates and charges for MultiServ Multi-Account service apply only to each Secondary Account.
 - a. MultiServ service
 - (1) Per Secondary Account

	Installation Charge	Rate Stability/ Monthly Rate Maximum	USOC
(a) Each standard common equipment	\$250.00	\$-	M4ASX
(b) Each common equipment customized by the Company at the subscriber's request ¹	325.00	-	M4ACX

b. MultiServ PLUS service

(1) Per Secondary Account

	Installation Charge	Rate Stability/ Monthly Rate Maximum	USOC
(a) Each standard common equipment	350.00	-	M4ASX
(b) Each common equipment customized by the Company at the subscriber's request	400.00	-	M4ACX

Note 1: A subscriber requested change from standard common equipment to customized common equipment will incur the difference between the two charges.

10. BellSouth Centrex Control supports dial-up access security through the use of a Security Card. BellSouth Centrex Control supports access security by requiring login and password identifiers. The subscriber must have one User Identification Code for each System Manager accessing the BellSouth Centrex Control Database. The User Identification Code includes a login and password and is used in conjunction with the Security Card. In addition, BellSouth Centrex Control ensures that the user can access only their portion of their database.	(M)(T)
The subscriber will be required to authenticate with a Security Card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the host computer. Once the subscriber has purchased the Security Card, the Company will provide the subscriber with a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in A112.25.16.E following.	(M)(T)
If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with BellSouth Centrex Control. It is up to the subscriber to notify the Company of any existing Security Card so the Company can ensure that the card is validated for multiple features and/or services.	(M)(T)

A112.26 ESSX Service

(Obsoleted 09-26-95, Type D) Service rates and charges in this Section are available for inward activity of existing subscribers only as specified following. Not available for new service or moves of existing service to new locations. Moves of existing service will be allowed when a subscriber remains within the same serving central office switch.

Obsolescence Rules

1. Inward activity for ESSX service will be allowed.
2. ESSX service subscribers who have their entire account under a month-to-month payment option will be allowed to maintain their ESSX service at month-to-month rates.
3. ESSX service subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the Term Payment Plan rates and charges outlined in this Section when the Term Payment Plan associated with the Common Equipment expires. For expired Term Payment Plans, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section. (T)
4. ESSX service subscribers under a Term Payment Plan will be allowed to maintain their ESSX service under the rates and charges outlined in this Section when the Term Payment Plan expires. For expired Term Payment Plans, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section. (T)(M)
5. ESSX service subscribers under a Term Payment Plan will have until 11-26-95 to exercise their recast option as described in A112.26.6 for a Term Payment Plan period of not greater than 36 months in length. ESSX service subscribers under a month-to-month payment option will have until 11-26-95 to convert to a Term Payment Plan period of not greater than 36 months in length. (M)
6. Existing ESSX service subscribers who are under a Term Payment Plan may add a new secondary location (SLA) or move an existing SLA of their existing system. (M)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

(M)

A112.26.1 General

- A. ESSX Service is furnished from No. 1 and 1A Electronic Switching System (ESS) Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features:
 - Direct Inward Dialing (DID) and Identified Outward Dialing (IOD) of exchange and long distance message network calls to and from stations and attendant positions of an ESSX service system.
 - Intercommunicating calls between stations of the same ESSX service system
 - Identification by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by the Company will be provided this identification.
 - Common recorded announcement interception of calls to unassigned station numbers
 - Trunk answer any station of incoming primary directory listing calls
 - Basic Station Line Hunting
 - Touch-Tone Service
- B. ESSX Service will be furnished in four categories, based on the size of the subscriber's system.
 1. ESSX service - VS will serve systems with 1-24 main station lines.
 2. ESSX service - 200 will serve systems with 25-200 main station lines except as specified in A112.26.6.A.4.b.
 3. ESSX service - 600 will serve systems with 201-600 main station lines.
 4. ESSX service - XL will serve systems with more than 600 main station lines.
- C. An ESSX service System may be comprised of the following components.
 - Common Equipment¹
 - Network Access ¹
 - Main Station Lines¹
 - Terminating Arrangements

Note 1: Every system will include these components.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.1 General (Cont'd)

C. An ESSX service System may be comprised of the following components. (Cont'd)

- Features

1. The Common Equipment, Network Access and Terminating Arrangements will be at the rates and charges as specified in A112.26.7 and A112.26.12.L. (T)
2. Main Station Line rates will consist of the Intercom charge and the appropriate Exchange Circuit charge. These charges will be located in A112.26.8, A112.26.9 and A112.26.10 for ESSX service - VS, ESSX service - 200, ESSX service - 600, and ESSX service - XL respectively.
3. ESSX Service Line and System Features will be grouped as follows:
 - Group A Line Features
 - Group B Line Features
 - Group B System Features
 - Optional System Features
 - Customer Management Features¹
 - a. Group A Line Features will be offered on a grouped basis to ESSX service subscribers who have selected a Variable Term Payment Plan of 36, 60 or 84 months. Subscribers selecting the one month payment option will be offered the Group A Line Features on an individual basis only.
 - b. Group B Line Features, Group B System Features, Optional System Features and the Customer Management Features will be offered to ESSX service Subscribers subject to the specific requirements within each arrangement.
 - c. An ESSX service - VS or 200 subscriber will select Group A and B Features in A112.26.8. (T)
 - d. An ESSX service - 600 subscriber will select Group A and B Features in A112.26.9. (T)
 - e. An ESSX service - XL subscriber will select Group A and B Features in A112.26.10. (T)
 - f. Optional System Features will be offered to all ESSX service Subscribers in A112.26.12. (T)
 - g. Customer Management Features will be offered to all ESSX service subscribers in A112.26.13. (T)

D. If the subscriber is not completely satisfied with his ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs.

1. The following charges will be refunded:
 - a. Nonrecurring and recurring charges (up to ninety days recurring billing) for rate elements as specified in Section A112. for ESSX service.
 - b. Service connection charges from Section A4. (T)
2. The following charges will not be refunded:
 - a. Recurring charges for Network Access Registers and Grouping as specified in Section A3. (T)
 - b. End User Common Line Charges as specified in BellSouth Telecommunications, Inc. FCC No. 1.
3. Customer provided equipment acquired for use with ESSX service will not be included in this plan.
4. ESSX service provided under the One Month payment option is not eligible.
5. Subscribers provided ESSX service via Special Contract arrangements may negotiate a satisfaction plan on an individual case basis.
6. This guarantee will not apply to transfers of service, moves, conversions, or recasts.

Note 1: ESSX service systems subscribing to the CSR Feature in A112.26.13 must select CSR Changeable Features subject to the rates, ***terms and conditions*** in A112.26.13. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.1 General (Cont'd)

- D. If the subscriber is not completely satisfied with his ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs. (Cont'd)
 - 7. ESSX service will be disconnected no later than ten (10) days after receipt of notification of dissatisfaction.
 - 8. Subscribers requesting an extension of the 10 day disconnection interval to accommodate installation of a replacement product/service, will be billed the contracted recurring rates for that period, not to exceed six (6) months.
 - 9. Subscribers must retain continuous service beyond the ninety days via other Local Exchange services as offered in Section A3.

(T)

A112.26.2 Terms and Conditions

- A. ESSX service is furnished subject to the availability of facilities and features from a No. 1 or 1A Electronic Switching System located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and or major relocations of systems are subject to the same *terms and conditions* as initial installations.
- B. Certain Auxiliary Services are available on an individual main station line basis and are subject to the capabilities of the serving ESS central office.
- C. Optional Service features in this and other *guidebook* sections may be offered for use with compatible customer provided terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- E. All ESSX service main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with ESSX service.
- F. Tie lines for direct connections between a basic ESSX service system and other systems are provided primarily for communication between stations of the two systems. In such cases, tie line mileage and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the ESSX service system to or from another system (ESSX service or non-ESSX service) provided such connections to the exchange or long distance network are only made at one system at a time.
- G. Where completion of incoming and outgoing local and long distance calls through an ESSX service system is furnished to or from main station lines of a separate ESSX service system in another exchange or a non-ESSX service system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the *terms and conditions* specified.
 - 1. Rates and Charges specified in the Private Line *Guidebook* apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified.
 - 2. ESSX service optional feature charges as outlined apply for each trunk terminated main station line as offered, as appropriate.
- H. Where the lines are arranged to switch calls through the ESSX service system to or from one or more tie lines or private lines, charges for Dial Cut-through Arrangement as specified shall apply per tie line so equipped. The charge is in addition to the regular charges for the facilities connecting the systems.
- I. Dormitory service is furnished in accordance with the *terms and conditions* for Dormitory Communications Service specified in Section A13.
- J. A system may not be provided for Intercommunication (standalone) service only. Access to the exchange network must be provided.
- K. A mixture of Flat Rate and Measured Rate Service will not be allowed within a single customer system or in an ESSX service/Subsidiary System Arrangement situation.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.2 Terms and Conditions (Cont'd)

L. Suspension of Service

With the exception of Network Access Registers, neither partial nor complete temporary suspension of ESSX service is permitted.

M. Zone Charges do not apply to ESSX service.

N. A twelve month minimum service period shall be required if the subscriber's system is an ESSX service - 600 or ESSX service - XL. The normal minimum service period as specified in Section A2. applies for ESSX service - VS and 200.

O. Touch-Tone service will be furnished subject to the terms and conditions specified in Section A13.

P. Directory listings will be provided subject to the terms, conditions and rates in Section A6.

Q. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of an ESSX service system is limited by the number of network access registers subscribed to by the customer. Each Network Access Register (NAR) may be arranged for Two-way, One-way incoming or One-way outgoing operation depending upon the option of the customer at the time the NAR is installed. When a change in the operation of a NAR is requested by the customer, the Secondary Service Charge as specified in Section A4. is applicable. The Line Connection and Line Change Charge in Section A4. are applicable to ESSX service Network Access Registers.

R. Except where A112.26.6 is applicable, the ESSX service installation charges are in addition to regular Premises Work Charges, Service Connection Charges, move, change and installation charges covered in this and other Company guidebooks.

S. ESSX service installation charges due on an initial installation or subsequent addition may be paid in full at the time of installation or deferred over a predetermined period of time in accordance with existing guidebook and/or administration provisions.

T. If the ESSX service subscriber elects a Measured Rate Service option, Measured Rate Service usage charges in Section A3. are applicable on calls to locations outside the subscriber's ESSX service system in addition to the rates and charges in this and other Guidebook sections for ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same ESSX service system.

U. ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement or Directory Assistance (e.g. 211, 611, 811 and 900 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted at this time. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the ESSX service systems subscribing to this service arrangement.

1. At the time a code restriction arrangement is installed, the system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Secondary Service Charge as specified for a change in line termination applies per main station line affected except that no such charge applies when the code restriction arrangement is disconnected in its entirety.

2. Where code restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.

3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be billed in the normal manner.

V. Station Dial Code Screening arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances be completed and will be billed in the normal manner.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.2 *Terms and Conditions* (Cont'd)

- L. Suspension of Service (T)
With the exception of Network Access Registers, neither partial nor complete temporary suspension of ESSX service is permitted.
- M. Zone Charges do not apply to ESSX service.
- N. A twelve month minimum service period shall be required if the subscriber's system is an ESSX service - 600 or ESSX service - XL. The normal minimum service period as specified in Section A2. applies for ESSX service - VS and 200. (T)
- O. Touch-Tone service will be furnished subject to the *terms and conditions* specified in Section A13. (T)
- P. Directory listings will be provided subject to the *terms, conditions* and rates in Section A6. (T)
- Q. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of an ESSX service system is limited by the number of network access registers subscribed to by the customer. Each Network Access Register (NAR) may be arranged for Two-way, One-way incoming or One-way outgoing operation depending upon the option of the customer at the time the NAR is installed. When a change in the operation of a NAR is requested by the customer, the Secondary Service Charge as specified in Section A4. is applicable. The Line Connection and Line Change Charge in Section A4. are applicable to ESSX service Network Access Registers. (T)
- R. Except where A112.26.6 is applicable, the ESSX service installation charges are in addition to regular Premises Work Charges, Service Connection Charges, move, change and installation charges covered in this and other Company *guidebooks*. (T)
- S. ESSX service installation charges due on an initial installation or subsequent addition may be paid in full at the time of installation or deferred over a predetermined period of time in accordance with existing *guidebook* and/or administration provisions. (T)
- T. If the ESSX service subscriber elects a Measured Rate Service option, Measured Rate Service usage charges in Section A3. are applicable on calls to locations outside the subscriber's ESSX service system in addition to the rates and charges in this and other *guidebook* sections for ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same ESSX service system. (T)
- U. ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement or Directory Assistance (e.g. 211, 611, 811 and 900 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). InterLATA calls dialed 0- (operator handled) calls cannot be restricted at this time. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the ESSX service systems subscribing to this service arrangement.
 - 1. At the time a code restriction arrangement is installed, the system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Secondary Service Charge as specified for a change in line termination applies per main station line affected except that no such charge applies when the code restriction arrangement is disconnected in its entirety.
 - 2. Where code restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 - 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be billed in the normal manner.
- V. Station Dial Code Screening arrangement restrictions are not assured. This feature is intended to limit main station line direct dialed outgoing calls, but such calls may in certain circumstances be completed and will be billed in the normal manner.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.2 Terms and Conditions (Cont'd)

(T)

AD. Calling Number Delivery Blocking - Permanent

This feature enables certain customers to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is in operation on a continuous basis.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

Calling Number Delivery Blocking - Permanent is available upon request to certain customers as described following:

Domestic violence intervention agencies, state and county department of human resource shelters and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without blocking.

A112.26.3 Definitions

ACCESS CODE RESTRICTION GROUP (ACRG/CAT CODES)

An ACRG will allow stations (assigned to that ACRG) access to predefined facilities. Station access to facilities is restricted by the station ACRG assignment to the predefined facilities. Up to eight ACRGs can be established by the Company for each ESSX service group.

ACCESS LINES TO CUSTOMER ORIENTED FACILITIES

Allows dial access from ESSX service for connection to customer oriented facilities. (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging).

ADVANCED PRIVATE LINE TERMINATIONS

See Miscellaneous Line Terminations.

ASSUMED DIAL '9'

Utilizes central office capabilities to allow the main station line equipped to access the network without dialing '9' (provided on all lines in a system).

ATTENDANT ACCESS CIRCUIT

An attendant access circuit connects customer provided attendant terminal equipment to the serving central office. These circuits are used for the completion of calls directed to the attendant, extension of those calls to stations and attendant assistance for stations.

ATTENDANT CALL-THROUGH TEST

This feature provides the large business customer with the ability to select tie trunks, FX trunks, network access facilities, and intermachine groups from a CPE terminal. From one location, the customer attendant can dial up, and test and busy/verify these facilities.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

ATTENDANT CAMP-ON

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on (tone) will be given to the busy main station line each time the attendant attempts a completion.

ATTENDANT CONFERENCE

Using a six port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access. Main station lines that are permitted dial access to the Attendant Console equipped with the conference feature are the only main station lines that can initiate this feature.

ATTENDANT CONTROL OF FACILITIES

Attendant Control of Facilities is a console attendant position optional service arrangement which permits the system attendant to restrict the dial access of all main station lines to FX, WATS, CCSA, SCAN, IPSCS, ETS, OCC and tie line terminations associated with that system. When such restriction is in effect, attempted outward dialed calls will be routed to the attendant.

ATTENDANT EMERGENCY OVERRIDE

This feature allows an attendant to override a main station line busy condition set by a make busy key. The attendant dials an access code plus the extenstion number and will terminate to the specific main station line dialed, regardless of call forwarding, series completion or multiline hunt arrangements.

ATTENDANT POSITION

Attendant position is where customer provided terminal equipment is utilized for attendant control and call connecting functions.

ATTENDANT SERVICE

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature.

An unrestricted and semirestricted main station line user may dial the attendant over attendant lines to secure help in the completion of an outgoing call by means of the Dial "0" calling auxiliary attendant feature as offered in this *Guidebook*. (T)

AUTOMATIC CALLBACK

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle. Automatic Callback is only operational for intercommunication calls between main station lines served by the same No. 1 or a ESS customer group.

A calling main station line is permitted only one Automatic Callback request at a time. The called main station line is limited to only one request at a time for Automatic Callback. Once requested, Automatic Callback will remain active for a period not to exceed thirty minutes unless deactivated by the calling main station line.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

AUTOMATIC ROUTE SELECTION - BASIC (ARS-B)

Automatic Route Selection - Basic (ARS-B) is an optional feature available where facilities permit, that allows station users by dialing a preselected code to automatically select the preferred route subscribed for by a customer for network calls. Alternate routing to other facilities, subscribed for by the customer, is also provided. This arrangement is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines and Other Common Carrier (OCC) access lines which are compatible with ARS and toll network facilities.

Automatic Route Selection - Basic is accessed by dialing a single code (1, 2, or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or the Toll Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to the toll network or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either the toll network or overflow tone.

For calls using FX, WATS, CCSA off-net, IC or toll access line facilities, the routing may be based on a Number Plan (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

Automatic Route Selection - Basic is a call routing capability and therefore all codes must be in a route for selection. Code blocking is not provided by this feature.

Facility - A facility denotes a specific FX, CCSA, WATS circuit, tie line or IC Access Line circuit.

Route - A route is a group of one or more facilities of the same type used to complete 7 or 10 digit calls between the same points.

Route Selection - The automatic selection of the preferred route as predetermined by the customer upon dialing of an access code by the station user.

Pattern - A group of routes arranged to be selected in a sequence specified by the customer.

Area Code - An Area Code is a three digit numeral code to designate the geographical Number Plan Area (NPA) used in network dialing.

Foreign Area Discrete Translation - Foreign Area Discrete Translation is the screening of a specific group of digits by the ESS switcher to determine proper call routing.

AUTOMATIC ROUTE SELECTION - DELUXE (ARS-D)

ARS-D provides for the origination of only ten digit On-Network calls to a public network telephone number, after the ESSX® service ARS-D access code (e.g., "8"), automatically scans the digits and selects a first choice completing route when available. Routes may include Foreign Exchange Trunk lines, Wide Area Telephone Service lines, exchange facilities to the toll network or access lines to CCSA or other arrangements where compatible.

The final completing route may be the toll network or, at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.

BASIC LINE TERMINATIONS

See Miscellaneous Line Terminations

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

CALL BLOCK

This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers.

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by preselecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time.

If the customer also subscribes to Preferred Call Forwarding and/or Call Selector and the same telephone numbers appear on those screening lists, Call Block will take precedence.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group unless the telephone number is the main number of the hunt group, or is Telephone Number identified.

CALL FORWARDING - BUSY LINE

This feature automatically routes dialed calls to the attendant or preselected main station line when the called main station line is busy.

CALL FORWARDING - DON'T ANSWER

This feature automatically routes dialed calls to the attendant or preselected main station line when the called main station line doesn't answer within the ringing cycle. The selection or Ringing Cycle options is available on a per main station line basis and may be changed by Service Order.

CALL FORWARDING OVER PRIVATE FACILITIES

Call Forwarding over Private Facilities (CFPF) is an optional feature which includes and expands Call Forwarding - Variable (CFV) capabilities. CFPF allows an ESSX® service main station line user to have incoming calls forwarded to a location outside the group using a specific, selected facility or network which may include CCSA, EPSCS, ETS, WATS, FX, FCO, OCC, senderized tie lines and toll. Automatic Route Selection (ARS) may also be selected for optimum routing. Activation of CFPF is identical to activation of CFV. To activate CFPF, a user goes off-hook, dials a CFV (CFPF) activation code, the selected facility/network access code and the selected distant number. When the distant number answers, the calling user hangs up. From that point all calls to the calling user's main station line are forwarded to the distant location. To deactivate CFPF, the calling user dials a CFV (CFPF) deactivation code.

CALL FORWARDING - VARIABLE

When activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same system or optionally outside the ESSX® service system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

CALL FORWARDING - VARIABLE, OUTSIDE

When activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same system or outside the subscriber's system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

CALL HOLD

Call Hold allows a main station line user to place any call involving his main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing another code.

CALL PICKUP

Call Pickup allows a main station line user to answer calls directed to another main station line within the same preset call Pickup group.

CALL RETURN

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is notified, via a distinctive ring (short, short, long), that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer, the distinctive ring will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status.

In some locations, due to technological limitations, Call Return must be purchased with Repeat Dialing.

CALL SELECTOR

Call Selector provides a distinctive ring pattern to the subscribing customer for up to six specific telephone numbers.

The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern (short, long, short). Calls from the telephone numbers not included on the screening list will produce a normal ring.

If the customer also subscribes to Call Waiting and a call is received from a telephone number on the Call Selector screening list while the line is in use, the Call Waiting tone will also be distinctive.

When a telephone number on the Call Selector screening list also appears on the Preferred Call Forwarding list, the Preferred Call Forwarding will take precedence. Likewise, when the same number is shown on the Call Block list, the call will be blocked.

The customer's line will not produce a distinctive alert if the calling line is not referenced to and originated by the main telephone number or a Telephone Number identified number that represents all the lines in a collection of lines, such as a multi-line hunt group.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

CALL TRACING

Call Tracing enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. The customer is not provided the traced number.

Only calls within central offices equipped with CCS7 are traceable using Call Tracing.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

If the customer receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

CALL TRANSFER INTER-ESSX service SCREENING

Call Transfer Inter-ESSX service Screening may be used in ESSX service complexes that may have overlapping extension ranges. With this feature it is possible to optionally restrict transfers of external calls to main station lines outside the customer group of the controller party.

CALL WAITING - TERMINATING

This feature informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the present connection while answering the new call and return to the original connection.

CALL WAITING - ORIGINATING

This feature allows an equipped main station line to send the Call Waiting tone to any busy main station line in the same system.

CALL WAITING - INTRAGROUP

Call Waiting - Intragroup permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held. Call Waiting - Intragroup also includes the features of Call Waiting - Terminating.

CALLER ID

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originates from a multi-line hunt group, the telephone number transmitted will always be the main number of the hunt group.

Caller ID is not available on operator handled calls.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

CALLING NUMBER DELIVERY BLOCKING - PER CALL

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.

CALLING NUMBER DELIVERY BLOCKING - PERMANENT

This feature enables certain customers as described in A112 to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is in operation on a continuous basis.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

CANCEL CALL WAITING

This feature enables ESSX service customers to inhibit interruption of a busy line by data transmission and voice connection features that would normally disrupt the lines.

CATEGORY CODES (CAT)

See Access Code Restriction Group.

CENTRALIZED ATTENDANT SERVICE (CAS)

CAS allows a customer having an ESSX service with compatible customer provided data line console(s) and a number of remote PBX's and/or systems to concentrate all attendants at one location. CAS allows fewer attendant positions and better administrative control.

CIRCULAR HUNT

See Station Hunting Arrangements.

CODE CALLING

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of an ESSX service system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the ESSX service system.

CODE RESTRICTION ARRANGEMENTS

A Code Restriction Arrangement automatically denies a portion or all main station lines of an ESSX service system direct outward dialing access to one or more three-digit codes within the local service calling area in which the ESSX service system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts. The three-digit central office and service codes which may be restricted constitute those codes to which Public Announcement and Directory Assistance Services are assigned. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports).

COMMON BLOCK

A Common Block is that portion of the memory storage in a No. 1 or 1A ESS central office that contains the features for a specific system. An additional common block is required when a single ESSX service system services two or more locations with widely differing calling characteristics.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

CONFERENCE CALLING - STATION

This feature allows a main station user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

CONSULTATION HOLD - ALL CALLS

Allows a main station user to place a call on hold by depressing the switchhook, at which time dial tone is returned. The station user may then proceed to establish connection with another internal station or outside party, and after speaking with the "consulted" party, the station user may (1) return to the call initially held, (2) depress the switchhook thereby effecting Add-On Conference, or (3) hang up and effect transfer of the initial call to the consulted party.

CUSTOMER CONTROLLED STATION RESTRICTION

Permits the customer to change the calling arrangement of selected main station lines to four different restrictions as follows.

1. Outgoing Call Restriction

Calls dialed, other than intercommunication calls, will be routed to a tone.

2. Incoming Call Restriction

Calls from outside the system direct dialed to selected main station lines, will be routed to the attendant or to an announcement. Calls to the attendant and intercommunication calls are not restricted.

3. Station-To-Station Call Restriction

All calls dialed to select main station lines, other than attendant calls, will be routed to tone or announcement.

4. Total Restriction

All calls dialed to or dialed from selected main station lines will be routed to the attendant or to an announcement, and outgoing call attempts will receive a tone.

DIAL CALL WAITING

The Dial Call Waiting (DCW) feature provides the ability for originating ESSX service main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited. Dial Call Waiting also includes the feature Call Waiting-Originating. Call Waiting-Originating options may be provided with Dial Call Waiting.

DIAL "0" CALLING

Dial "0" Calling permits a main station line user to reach the attendant by dialing the single digit "0". The call is routed to the attendant over the same console access loops as provided for other incoming calls unless the position is furnished with discrete identification. If discrete identification for Dial "0" calls is provided, rates and charges for Attendant Access Circuits and other related services apply.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

DIAL CUT-THROUGH ARRANGEMENTS

See Miscellaneous Line Terminations

DIAL THRU ATTENDANT (DTA)

The ESSX service DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility.

DIALTONE PROVISIONING (DialTone II)

This feature will provide ECAS customers with the capability of requesting new service on stations through ECAS as well as the ability to disconnect service on existing stations.

Two options are available.

Option 1 - allows the customer to subscribe to reserved loop facilities as described in A112.26.13. (T)

Option 2 - the ECAS customer has no reserved facilities and places an order via ECAS for new service.

DIRECT CONNECT NUMBER

See Hot Line Station.

DIRECT INWARD DIALING

Incoming calls from the exchange or toll network may be dialed directly to complete to any main station line served by the ESSX service main switching equipment without the help of an attendant.

DIRECT OUTWARD DIALING

Outward calls may be dialed directly from any unrestricted main station line served by the ESSX service main switching equipment without the help of an attendant.

DIRECTED CALL PICKUP - WITH BARGE-IN

This feature allows calls directed to a main station line with the Directed Call Pickup feature to be answered by any main station line in the pickup group. This is accomplished by dialing an access code followed by the extension number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established. To be arranged for Directed Call Pickup, the main station line also must be arranged for regular Call Pickup. Directed Call Pickup may be used for Trunk Answer Any Station purposes. Charges for Directed Call Pickup are applicable to the terminating or "called" main station line.

DIRECTED CALL PICKUP - WITHOUT BARGE-IN

The Directed Call Pickup - Without Barge-In feature allows a main station line user to pick up an unanswered call to another ESSX service main station line equipped with Directed Call Pickup by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered busy tone will be returned to the main station line user dialing the answer code and station line number. To be arranged for Directed Call Pickup - Without Barge-In, the main station line does not have to be arranged for regular Call Pickup or Directed Call Pickup. Charges for Directed Call Pickup - Without Barge-In are applicable to the originating or "calling" main station line.

DISTINCTIVE RINGING AND CALL WAITING TONE

Distinctive Ringing and Call Waiting Tone are furnished in different classes which permit main station line users to identify the source of calls. These three classes identify:

Class	Call Source
A	Intercommunication
B	Direct inward dialed local and toll Attendant completed CCSA access line Tie Line
C	Preemptible SCAN access line Dial Call Waiting Call Waiting - Originating Console night service arrangement

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

MAIN STATION CIRCUIT

An ESSX service Main station circuit connects customer premises terminal equipment to the serving central office.

MAIN STATION EXTENSION SERVICE

ESSX service main station extension service consists of an additional station or stations on the same station circuit as the associated ESSX service main station.

ESSX CUSTOMER ADMINISTRATION SERVICE (ECAS)

Provides the customer with the capability to activate/deactivate specific optional ESSX service features, change service options, and display and verify the features and service options on a per main station basis.

ESSX SERVICE SYSTEM

An ESSX service system consists of all stations of a customer with the same primary directory listing which are served by the same central office equipment.

ELECTRONIC MESSAGE REGISTRATION SERVICE

Electronic Message Registration Service provides for automatic counting, storage and display of stored message unit count for local message units generated from individual main station lines arranged for this feature. Compatible customer provided terminal equipment is used to retrieve and display message unit usage. An optional customer provided tape printer may be used where printed tape is desired in addition to the visual display.

FLEXIBLE INCOMING CALL RESTRICTION

This feature permits the customer to route incoming calls for preselected main station lines to the attendant, to a recorded announcement, or to a designated main station line. This feature may be activated by the attendant or by a customer provided control key.

GROUP USE SERVICE

Group Use Service is an optional service feature whereby different systems belonging to a single customer served by the same central office may be arranged for intercommunication calling between main station lines and attendant positions of those systems.

HOT LINE STATIONS

Station specially programmed to immediately ring a specific internal station number of the attendant when the station user goes off-hook.

INTERCEPT

Intrasytem and incoming network calls dialed to unassigned numbers are routed to recorded announcement.

INTERCOM

Provides station-to-station calling for the customer within the ESSX service system without utilizing Network Access Registers but does require additional central office equipment.

LOUDSPEAKER PAGING FEATURE

This feature allows ESSX service attendants and main station line users to dial access customer provided loudspeaker paging equipment. Capabilities are provided to allow multizone paging where a separate access code or directory number is provided for each zone within a customer's location. Optional arrangements may be provided to allow the paged party to be connected to the calling party by dialing an answering code from any main station line within the ESSX service system.

MISCELLANEOUS LINE TERMINATIONS

Miscellaneous lines are those lines not basic to the system, such as Tie Lines, WATS, Foreign Exchange, CCSA, OCC etc., which require ESSX service switching capabilities in order to function with ESSX service.

MULTI-LINE HUNT GROUP (BASIC)

See Station Hunting Arrangements

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

NETWORK ACCESS LIMITER

The Network Access Limiter limits switched non-intercom exchange access in an ESSX service System equivalent to that of an individual local exchange line.

NETWORK ACCESS REGISTER

The Network Access Register provides for exchange and long distance message network calling to and from main stations and attendant positions of an ESSX service system.

OFF-HOOK QUEUE

See Queuing

PREFERENTIAL HUNT

See Station Hunting Arrangements

PREFERRED CALL FORWARDING

Preferred Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of up to six numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list.

If the customer also subscribes to Call Block and the same telephone number is entered on both screening lists, the Call Block feature must be deactivated to allow the call to be forwarded.

This feature will not work if the calling line is not referenced to and originated by the main telephone number or Telephone Number identified number that represents all the lines in a collection of lines, such as a multi-line hunt group.

QUEUING

1. Deluxe Queuing

Deluxe queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

- a. A Ring-back Queue (RBQ), in which case the calling station goes on-hook and is called back when a facility becomes available, and
- b. an Off-hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

2. Outgoing Trunk Queuing - WATS (OTQ) - Phase I

Outgoing Trunk Queuing - WATS is an ESSX service optional feature available where facilities permit, that allows main station line users, by dialing a preselected code, to have their call held in queue (stored), if all the associated WATS facilities are in use for prior calls. The call is completed, without further dialing, when a facility becomes available; or on reaching the time limit in queue, is advanced to the preselected option. The calling main station line must remain off-hook to retain the call in queue. Where compatible tie trunks may be given access to queuing.

RECORDED TELEPHONE DICTATION FEATURE

Permits access to customer-owned telephone dictating equipment by main station lines, tie trunks, and attendants within the ESSX service system. Main station line, attendant and tie trunk access must be via a line equipped for Touch-Tone signaling.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

REPEAT DIALING

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed.

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. In some locations, due to technological limitations, Repeat Dialing must be purchased with Call Return.

RING-BACK QUEUE

See Queuing

SELECTED CUSTOMER CONTROL OF FACILITIES

Selected Customer Control of Facilities is an optional feature which allows an ESSX attendant to control dial access to an individual facility group. The facility group may be real or simulated facilities. Selective Customer Control of Facilities allows an attendant to control access to a particular facility group through activation and deactivation of a customer provided key connected to the Master Scan Point of the facility group. One key is associated with one facility group. All traffic, regardless of source, is denied access to the affected facility group once Selected Customer Control of Facilities is activated. When the facility group is part of an Automatic Route Selection - Basic or ARS - Deluxe route pattern, calls will automatically route to the next facility group in the routing pattern. If there is no alternate route, the call will receive normal reorder treatment.

SIMPLIFIED MESSAGE DESK INTERFACE

Provides a method to forward calls via Call Forwarding Busy/Don't Answer/Variable to one or more message desk attendants served by Uniform Call Distribution with optional queuing and delay announcement feature. Additionally, information can be transmitted via an Input/Output channel to a customer provided premises minicomputer to display the number called and the type of call forwarding used.

SINGLE DIGIT DIALING OR ABBREVIATED DIALING FOR SERVICES

Provides ESSX main station lines the ability to dial a one- or two-digit code to reach selected lines within the ESSX system. Also provides the ability to use variable length codes by means of timing. Abbreviated dialed calls are completed to predesignated main station lines. This feature may also be used to reach particular internal facilities such as dial dictation equipment. Abbreviated dialing is not required where regular "IXX" or "level" access codes are utilized without conflict in the numbering plan.

SPEED CALLING

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number. Telephone numbers, including routing codes, are limited to a maximum of sixteen digits. The service is offered in repertory sized of six and thirty. With the six list, the user will dial a one-digit code; with the thirty number list, the main station line user will dial a two-digit code.

SPLIT SERVICE OFFERING

This feature permits segregation of ESSX service main station lines for a customer into separate groups, thereby enabling each group to have a different set of common features. Typically hotel/motel administrative telephones will utilize DID, AIOD, consultation hold, add-on and call forwarding features. The guest room telephones usually will not be equipped with these features and a split service offering should be used at appropriate *guidebook* rates. Splitting the service in this manner allows all other No. 1 ESS main station line user features on an optional basis, thus enhancing the versatility of the administrative telephones.

(T)

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

STATION DIAL CODE SCREENING

Station Dial Code Screening permits designated ESSX service main station lines to be used to originate toll calls to specified telephone numbers in Number Plan Areas and Central Office Codes within the continental U.S., and restricts these main station lines from originating toll calls to other telephone numbers. Three- or six-digit screening is provided.

Two arrangements are available.

1. Arrangement I permits main station line originated calls to be completed to telephone numbers with selected Central Office Codes (NNXs) in the Home Numbering Plan Area (HNPA) or other Numbering Plan Area (NPAs) using a toll network.
2. Arrangement II permits main station line originated calls to be completed via private network facilities which have been arranged for uniform numbering, senderized operation and other network main station lines and offnet to telephone numbers with selected NPA and Central Office Codes.

STATION DIRECT INWARD DIALING RESTRICTION

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from a toll network. Direct In-Dial call attempts will be routed to the attendant.

STATION HUNTING ARRANGEMENTS

Circular Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunting arrangements are extensions of the basic multiline hunting feature.

1. Circular Hunt permits a complete hunt over all the terminals in the group starting and ending with the dialed number.
2. Multi-Line Hunt Group (Basic)
When a call is originated to a busy station line in a basic multi-line hunting group, the calls hunts once in a pre-arranged order for an idle station through all remaining station lines in that group.
3. Preferential Hunt permits a prehunt over a subset or preferential group of main station lines before hunting through the entire multi-line hunt group. The hunt through the group may be a regular or circular hunt. Each main station line may have its own preferential group or list.
4. Series Non-Sequential
When a call is originated to a busy station in a series non-sequential hunting group, the call hunts for an idle station in that group in a prearranged numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.
5. Series Sequential
When a call is originated to a busy station in a series sequential station hunting group, the call hunts for an idle station in that group in an ascending numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.
6. Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt.
 - a. Call Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to main station lines in the UCD group as the main station lines become available.

STATION IDENTIFICATION

An itemized list of toll calls is shown on the toll bill with the number of each originating main station line.

STATION MESSAGE DETAIL RECORDING

Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

STATION MESSAGE DETAIL RECORDING - RAO

Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record by main station line number of originating intercity traffic routing over dial type tie lines, FX, WATS, CCSA, Other Common Carrier access lines and/or toll and at the customer's option, on certain incoming calls that the attendant extends to a station or tie line within the customer's ESSX service group.

The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

STATION NUMBER CORRELATION

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

STATION RESTRICTION

Various types of restrictions may be assigned as options to ESSX service main station lines. An ESSX service main station line may be provided with a combination of the various types of main station line restrictions available.

1. Full Restriction
 - a. Full Restriction from Incoming Calls allows the main station line to receive only non-attendant originated, intra-system (including tie line and other customer oriented facilities calls). In-dialed calls from the exchange network are routed to intercept.
 - b. Full Restriction from Outgoing Calls allows the main station line user to originate calls only to other main station lines, tie lines, and FX lines within the same system. The equipped line cannot call the attendant or use the Call Transfer features.
 - c. Full Restriction from Incoming and Outgoing Calls is a combination of the preceding.
2. Semi-restriction
 - a. Semi-restriction from Incoming Calls allows the main station line to receive only attendant originated and other intra-system (including tie line and other customer-oriented facilities calls). In-dialed calls from the exchange network are routed to intercept.
 - b. Semi-restriction from Outgoing Calls allows the main station line user to originate calls only to attendant lines, main station lines, tie lines, and FX lines in the same system.
 - c. Semi-restriction from Incoming and Outgoing Calls is a combination of the preceding.
3. Denied Service
 - a. Denied Service from Incoming Calls
The main station line is used for outgoing calls only and cannot receive calls. All incoming calls are routed to common intercept announcement.
 - b. Denied Service from Outgoing Calls
The main station line is used for incoming calls only and no outgoing calls can be originated from the main station line.
4. Denied Access to ESSX service Facilities with Unique Access Codes (trunk level access)
This feature prevents the main station line user from dial access to certain miscellaneous lines and other customer-oriented facilities by means of category codes. An ESSX service system is limited to a maximum of eight category codes. This feature does not prevent intrasystem ESSX service main station line calling.

STATION-TO-STATION CALLING

Calls may be dialed directly between any two unrestricted main station lines of an ESSX service system.

SUBSIDIARY SYSTEM ARRANGEMENTS

A subsidiary System of an ESSX service system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's ESSX service system and which is connected by the trunks to that ESSX system.

A Subsidiary System Arrangement provides station numbers, which are in sequence with the main station line numbers of the customer's ESSX service system to the stations of one or more subsidiary systems.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.3 Definitions (Cont'd)

THREE-WAY CALLING, CONSULTATION HOLD, CALL TRANSFER

Three-Way Calling, Consultation Hold, and Call Transfer provide for the transfer, consultation hold and add-on by an ESSX service station of any established call between station inside (individual) or outside (all calls) the ESSX service system.

TOLL DIVERSION

Toll Diversion automatically denies an ESSX service Station direct dialing access to toll. Station users attempting to place such calls are diverted to the attendant.

TOLL RESTRICTION

Toll restriction automatically denies an ESSX service station direct dialing access to toll. Station users attempting to place such calls will receive a distinctive tone to indicate that access is denied.

TRUNK ANSWER ANY STATION

Trunk Answer Any Station is an attendant position night service arrangement whereby, when activated by the attendant, calls to the primary directory listing activate a common alerting signal on the customer's premises. These calls may then be answered by a main station in the system upon dialing a special code.

TRUNK EQUIPMENT

See Miscellaneous Line Terminations

UNIFORM CALL DISTRIBUTION (UCD)

See Station Hunting Arrangements.

VOICE/DATA PROTECTION

This feature enables ESSX service customers to inhibit interruption of a busy line, by data transmission and voice connection features that would normally disrupt the line.

A112.26.4 Intercept Of Calls To Unassigned Station Lines

- A. Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B. Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all ESSX service Systems served out of the same office. The announcement states that the number is not in service and advises that the attendant or the directory of the caller's system should be consulted.

A112.26.5 Conversion

- A. **(DELETED)**

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.5 Conversion (Cont'd)

B. Replacement of Number 1/1A ESS Central Office Equipment

1. The rates and charges in this and other *Guidebook* sections for ESSX service and the associated features and services will continue to apply to existing ESSX service subscribers served at a location that is converted through no desire or fault of the subscriber to other than Number One ESS central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the non-Number One ESS equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service. (T)

A112.26.6 Payment Plans

A. General

1. ESSX service is offered under the Variable Term Payment Plan *terms and conditions* in Section A2., excepting and as specified following.
 - a. The contract periods are as follows.
 - 1 Month Variable Term Payment Plan
 - 84 Month Variable Term Payment Plan
 - b. The following items may be placed under contract.
 - Main Station Lines
 - Line Feature Options
 - Optional Service Features
 - System Common Equipment
 - Terminating Arrangements
2. The monthly rate for ESSX service is dependent upon the contract duration selected by the customer.
3. The monthly rate for ESSX service under the Variable Term Payment Plan for the period of 84 months is subject to Company initiated rate increases of not more than 6 percent in any annual period and not more than the following amounts over the entire contract periods.

Contract Period	Maximum Percent Increase Over Total Contract Period
84 Months	10

4. ESSX service - VS and 200 will be limited to subscribers having 4-200 main station lines except as specified b. following.
 - a. An ESSX service - VS or 200 subscriber may have an 84 month contract period for any or all of his total system size with the remainder to be under the one month contract period.
 - (1) Group A and Group B Line Features may be added under any of the payment plan options.
 - (2) Group B System Features, Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans subject to the above features not being added for a contract period of shorter duration than the contract period associated with the ESSX service Common Equipment.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.6 Payment Plans (Cont'd)

A. General (Cont'd)

4. ESSX service - VS and 200 will be limited to subscribers having 4-200 main station lines except as specified b. following. (Cont'd)
 - b. An ESSX service - VS subscriber may add station lines up to 30 lines and:
 - (1) Add those lines and associated Group A line features at the one month rate specified for ESSX service - VS or,
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX service - 200.
 - (3) There will be no termination liability.
 - c. An ESSX service - 200 subscriber may add station lines up to 220 lines, and:
 - (1) Add those lines and associated Group A line features at the one month rate specified for ESSX service - 200 or,
 - (2) Resubscribe the entire system under the payment periods as offered for ESSX service - 600 or ESSX service - XL.
 - (3) There will be no termination liability.
 - (4) Subscribers will be liable for the difference in Common Equipment installation charges between ESSX service - VS, ESSX service - 200, ESSX service - 600, or ESSX service - XL.
5. ESSX service - 600 will be offered to subscribers with 201-600 main station lines.
 - a. An ESSX service - 600 subscriber may have an 84 month contract period for any or all of his total system size with the remainder to be under the one month contract period.
 - (1) Group A and Group B Line features may be added under any of the payment plan options.
 - (2) Group B System features, Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans subject to the above features not being added for a contract period of shorter duration than the contract period associated with the ESSX service Common Equipment.
 - b. An ESSX service - 600 subscriber may add station lines up to 660 lines and add those lines and associated Group A and Group B Line Features at the one month rate specified for ESSX service - 600, or resubscribe the entire system under the contract periods as offered for ESSX service - XL. There will be no termination liability. Subscriber will be liable for the difference in installation charges between ESSX service - 600 or ESSX service - XL.
6. ESSX service - XL service will be offered to subscribers with more than 600 main station lines.
 - a. An ESSX service - XL subscriber may have an 84 month contract period for any or all of his total system size with the remainder to be under the one month contract period.
 - Group A and B line features may be added under any of the payment plan options.
 - Group B System Features, Auxiliary Attendant Features, or Optional Service Features may be added under any of the payment plans subject to the above features not being added for a contract period of shorter duration than the contract period associated with the ESSX service Common Equipment.

B. Expiration of Contract Period

1. ESSX service - VS 200, 600, and XL customers must, upon the expiration of their contract
 - a. select a new contract period as offered in the current **guidebook** (a Secondary Service Charge will apply), or (T)
 - b. revert to the current **guidebook** rates for the one month payment option if at the request of the customer (a Secondary Service Charge will apply), or (T)
 - c. revert to the current **guidebook** rates for the one month payment option if at the instance of the Company (a Secondary Service Charge will not apply). (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.6 Payment Plans (Cont'd)

B. Expiration of Contract Period (Cont'd)

2. An ESSX service - VS, 200, 600, or XL customer may at any time during his selected contract period recast for an equal or longer contract period at the current *guidebook* rates subject to the following conditions. (T)
 - a. No credit will be given for payments made during the formerly selected period.
 - b. Nonrecurring charges will not be reapplied.
 - c. The new payment period begins with the date requested.
 - d. No termination charge applies for the former payment period.
 - e. A Secondary Service Charge will apply.
3. An ESSX service - VS, 200, 600, or XL customer may at any time during his selected contract period recast for a contract period shorter in length than the time remaining in the existing service agreement, subject to the following conditions.
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the date requested.
 - c. A termination charge applies to the former payment period.
 - d. A Secondary Service Charge will apply.

C. Disconnects

1. When facilities are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining service will not be affected.
2. Facilities disconnected from a system prior to the expiration date of the payment period for such service will require termination charges for premature disconnection if applicable.

D. Supersedure

Service may be transferred to a new customer at the same location upon prior written concurrence by the new customer. The new customer will be subject to all provisions currently in effect for the previous customer. **Terms and conditions** concerning transfer of service between subscribers as stated in other sections of this *Guidebook* also apply under the Variable Term Payment Plan. (T)

E. Deferred Payment

1. Payment of nonrecurring charges for ESSX service may be deferred over the length of the customer's Variable Term Payment Plan or a shorter period (in annual increments) subject to the conditions specified in this paragraph.
 - a. The charges to be deferred must be among the following types.
 - Installation
 - Service Establishment
 - b. The customer must select a payment longer than one month.
 - c. The total amount of nonrecurring charges as defined in A112.26.6.E.1.a. may be deferred.
 - d. The minimum amount deferrable per ESSX service System is \$2000.00.
 - e. Interest on deferred amounts will be calculated at the rate set forth in the deferred payment agreement executed by the customer. The interest rate to be charged on deferred payments will be revised periodically by the Company. If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option, the Company will suspend the availability of said option until such time as the costs of providing said option can be recovered through the application of a lawful interest rate. Suspension of the deferred payment option will not affect customers who have executed a deferred payment agreement prior to the effective date of such suspension.
 - f. The deferred charges (including calculated interest) will be prorated on a monthly basis over the selected deferral period length.
 - g. All deferred charges must be paid in full when the customer

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.6 Payment Plans (Cont'd)

E. Deferred Payment (Cont'd)

1. (Cont'd)
 - g. All deferred charges must be paid in full when the customer (Cont'd)
 - (1) selects a payment period with an expiration date prior to the expiration date of the deferral period,
 - (2) disconnects service, for the system, prior to expiration of the selected deferral period, or
 - (3) fails to pay a monthly amount within 30 days of its due date.
 - h. The customer may prepay only the total outstanding deferred charges at any time during the selected deferral period. The customer will be given a credit for the amount of unearned interest. The customer may not prepay less than the total of the outstanding deferred charges.

F. Prepayment

1. For payment periods longer than one month, the customer may prepay the total outstanding recurring monthly rates. The prepayment of monthly rates in no way constitutes a purchase and the Company retains full ownership of all services covered by the prepayment. The following conditions apply.
 - a. Customers who prepay six months or more will have an allowance applied.
 - b. Monthly rates for all services covered by a single Letter of Election must be prepaid. Monthly rates must be prepaid for services added subsequently and placed on the same Letter of Election (i.e., customer-elected coterminous option) with a prepaid system.
 - c. Customers who change the length of a prepaid payment period will be credited any unused portion of the prepayment, subject to termination charges.
 - d. Customers who prematurely disconnect will have termination charges deducted from the prepaid amount and any balance credited to their bill.

G. Termination Liability

The Termination Liability applicable to ESSX service is dependent upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows.

1. One Month Payment Plan

- a. ESSX service - VS and 200 Customers - No termination liability
- b. ESSX service - 600 Customers
 - (1) Within 12 months of date of installation, if a customer's Main Station Line count falls below 75 percent of the total main station lines initially installed they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation no termination liability is applicable.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.6 Payment Plans (Cont'd)

G. Termination Liability (Cont'd)

1. One Month Payment Plan (Cont'd)
 - c. ESSX service - XL Customers
 - (1) Within 12 months of date of installation, if a customer's main station line count falls below 90 percent of the total main station lines initially installed they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation no termination liability is applicable.
2. Variable Term Payment Plan Option
 - a. ESSX service - VS, 200, 600, and XL customers that contract a portion of their system under the Variable Term Payment Plan Option are subject to the following liability charges per contract.
 - (1) Main Station Lines under contract - 90 percent of the remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90 percent of the total main station lines initially installed or of the annually adjusted installed total (whichever is higher). The annually adjusted total is determined every 12 months from date of original installation.
 - (2) On all non-contracted items no termination liability is applicable.
 - (3) Termination Liability charges are not applicable when the customer's ESSX service is moved provided that such move meets the criteria set forth in A112.26.6.J. following.
3. A customer may move a system under contract within the same jurisdiction and will not incur termination charges if existing loops and central office equipment are reusable during the current engineering interval. Main station line installation charges will apply as appropriate to all main station lines relocated.
4. Cancellation charges will only apply to subscribers under the Term Payment Plan.
5. Cancellation charges will apply only to the total removal of the subscriber's ESSX service system.
6. Cancellation charges will be applied where service provided under a Term Payment Plan is removed prior to the expiration of the subscribers Term Payment Plan.
7. The customer who elects to disconnect their ESSX service prior to the end of their Term Payment Plan period will pay the lower of the Cancellation or Termination Liability charge. To determine which charge is applicable, the Company will calculate the Termination Liability charge and compare this amount to the appropriate Cancellation Charge (depending on the customer's size and remaining contract duration). The customer will be billed the lower of the two charges.
8. The following charges are applied when a total disconnect of a ESSX service system provided under a Rate Stability Plan occurs prior to the expiration of the subscribers Rate Stability Plan and the Company determines that the Cancellation Charge is lower than the Termination Liability charge.
 - a. Cancellation Charges
 - n(1) Per Very Small or Small System

	Nonrecurring	USOC

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.6 Payment Plans (Cont'd)

G. Termination Liability (Cont'd)

9. When a subscriber's ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separate **guidebook** services listed following, termination or cancellation charges will not apply when: (T)

- a. the completed service period is 12 months, and
- b. the service period of the new arrangement for the separate **guidebook** service equals or exceeds the remaining service period of the disconnected arrangement, and (T)
- c. the service orders to install the separate **guidebook** service and disconnect the existing service are related together and there is no lapse in service between installation of the separate **guidebook** service and disconnection of the existing service, and (T)
- d. the service orders are for the same subscriber at the same location.

For the purposes of determining the separate **guidebook** services to which the preceding conditions apply, the following list will be used: (T)

- MegaLink Service
- MegaLink Channel Service
- MegaLink ISDN Service
- LightGate Service

H. The Company reserves the option to provide ESSX service at any size and distance from the serving central office under a Contract Service Arrangement basis under the **terms and conditions** in Section A5. if, in the Company's judgment, there is reasonable potential for uneconomic bypass or due to competitive alternatives, the market price for the service is above our cost to provide this customer's service but below the **guidebook** rate. (T)

I. Credits and Surcharges

A surcharge that is equivalent to the charge for access to an interexchange carrier over a PBX trunk will apply to each Network Access Register. For each ESSX service line a credit will be applied which, when combined with the preceding surcharge and with charges applied to ESSX service lines for access to interexchange carriers, will provide a monthly net billing equal to the interexchange carrier access charge for a PBX trunk multiplied by the number of the subscriber's Network Access Registers.

J. Moves of Service

1. A ESSX service subscriber may move a system under their Term Payment Plan within the same jurisdiction (the locations in the state within which **the Company** is authorized to operate) and will not incur termination charges if central office and existing loops of the system to be moved, are reusable during the current engineering interval. Installation charges will apply at the new location as appropriate.

A112.26.7 Common Service Items

A. **Terms and Conditions** (T)

1. Station Lines

- a. The rates and charges specified herein for main stations provide for main station line components. The main station line consists of all facilities including intercommunication and outside plant facilities from the system dial switching equipment to the Network Interface of the main station line.
- b. The rates and charges specified herein for main station lines are applicable to each main station location to which a customer-provided instrument can be connected.
- c. Rates for the main station lines of ESSX service - VS, 200, 600 and XL customers will be based on two criteria
 - (1) main station group size, and
 - (2) distance from the serving central office.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.7 Common Service Items (Cont'd)

A. *Terms and Conditions* (Cont'd)

1. Station Lines (Cont'd)
 - d. The total main station group size will consist of main station lines and attendant access lines for all locations served by the same system.
 - e. The distance band will be based on airline mileage from the serving central office to the Network Interface Location.
 - (1) Where main stations are in a foreign exchange or foreign central office area the distance band will be calculated from the FX or FCO to the Network Interface Location.
 - (2) Systems with more than one location served by the same ESSX service control group will calculate the distance band per location.
 - f. In A Different Central Office Serving Area
 - (1) The rate of ESSX service in a foreign exchange or foreign central office area is the monthly rate for the ESSX service desired, plus a foreign exchange or foreign central office mileage charges. When a wire center serves a portion of two different exchanges or the whole of one exchange and a portion of the other, the rates for intraexchange interoffice channel as stated in A9.2 apply between the wire center in one exchange and the wire center(s) in the other exchange whose serving areas are contiguous, provided facilities for the interoffice channel are routed in this manner. Otherwise, the rates for interexchange service as stated in A9.1 apply to channels provided between the two exchanges. This applies to both ESSX service stations terminated in a foreign exchange or foreign central office area and ESSX service extensions into a foreign exchange or foreign central office area.
 - (2) When ESSX service main station lines are connected by facilities which are routed between two or more central offices in the same exchange the foreign central office mileage charges are calculated separately on an airline basis between the ESS central office from which the ESSX service system is served and the central office from which exchange service normally would be rendered.
 2. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis for main station lines exceeding five (5) airline miles from the serving office. (T)
 3. Exchange Access
 - a. Exchange Access is provided by means of Network Access Registers.
 - b. Presubscription of a Carrier of Preference is as specified in Section 13. of the Interstate Access Service Tariff.
 4. For a change or a rearrangement in a specific service or feature element, the installation charge specified for that element will be applicable unless otherwise specified.
 5. Main Station Line Terminated as a Trunk
 - a. Where an ESSX service main station line is terminated as a trunk in customer provided equipment the appropriate recurring charge (A112.26.7.G.) will apply in addition to the appropriate Main Station Line Rate.
 6. Subsequent Training
 - a. After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in A12.20.8.D. (T)

B. Features

1. General
 - a. ESSX service-XL customers may add features from Group A at the rates shown in A112.26.10.B.2.c.(1) if a contract period of three, five or seven years is selected. Customers choosing the one month payment may add features from A112.26.10.B.2.d. for Group A features.
 - b. An additional common block may be required if certain feature parameters are exceeded.
2. Line Features - Group A
 - a. The following optional features are available.
 - Three-way Calling, Consultation Hold, Call Transfer - Individual²
 - Three-way Calling, Consultation Hold, Call Transfer - All Calls²
 - Call Forwarding - Busy Line
 - Call Forwarding - Don't Answer
 - Call Forwarding - Variable
 - Call Hold
 - Call Pickup
 - Call Waiting Terminating
 - Call Waiting Originating
 - Speed Call (6) Cust. Changeable
 - Call Forwarding - Variable (Outside)
 - b. There is no minimum number of features or groupings of features that must be obtained unless specified by the feature.

Note 1: New rates become effective with normal billing cycles beginning on or after June 8, 2002.

Note 2: An ESSX-XL System may be provided with only one type of call transfer capability without using the Split Service feature.

EFFECTIVE: August 17, 2006

A112.26.11 Telephone Numbers And Facilities Reserved For Future Use

- A. A customer may reserve preassigned telephone numbers and facilities necessary to meet their specified growth requirements at specific locations, on a mutually agreeable date. In the event the customer elects not to be provided with reserved telephone numbers, timely main station line additions cannot be assured and facilities necessary for his growth requirements will be provided only within normal engineering and construction intervals.
- B. This service includes preassigned telephone numbers and the central office facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.
- C. The assignment of telephone numbers and the sequence of numbers assigned to an ESSX system is made at the discretion of the Company.
- D. The service is furnished subject to the availability of facilities and telephone numbers.
- E. Calls to reserved (unassigned) telephone numbers will be routed to intercept over ESSX common recorded announcement facilities.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Apply Selective Class of Call Screening rates and charges in Section A13.

A112.26.11 Telephone Numbers And Facilities Reserved For Future Use (Cont'd)

- F. Telephone numbers furnished herein retain their reserve status until assigned to a main station line at which time the service assumes rates and charges applicable to an ESSX main station line.
- G. Reserved numbers not assigned to a main station line will be billed at the following rates until removed from reserved status or billed as an active ESSX main station line.
- H. Rates and Charges
 - 1. Each telephone number reserved

	Monthly Rate	USOC \$- REN+X
(a) Apply sixty percent of the monthly rate applicable for a main station line		

A112.26.12 Optional Service Features

- A. Attendant Service - General
 - 1. Central office attendant console operation is offered as an auxiliary service with ESSX service.
 - 2. The Call Transfer-Attendant feature is furnished with Non-Data Link or Data Link Console operation.
 - 3. As an alternative the subscriber may designate a selected station or stations to perform attendant functions. Incoming calls to the listed directory number are connected to the selected station and then completed to the desired party by operation of the Call Transfer feature.
- B. Attendant Service - Non-Data Link Console Operation
 - 1. *Terms and Conditions* (T)
 - a. Customer provided consoles will be allowed only where the equipment is compatible with the Central Office serving the system.
 - b. Control channels are required for various console optional features as indicated and are provided at the appropriate rates and charges.
 - 2. Rates And Charges¹

A112.26 ESSX Service (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

F. Centralized Attendant Service

1. General
 - a. Description

Centralized Attendant Service (CAS) allows a customer with a number of locations that are served by either a PBX, or ESSX service system to concentrate all attendants at a single centralized location (MAIN). Incoming calls over a local exchange trunk to an unattended location (BRANCH) are routed to the main location via a Release Link Trunk (RLT), where a CAS attendant completes the call by dialing the called party's extension number over the same Release Link Trunk facilities.
2. Types of Equipment with which CAS is Associated
 - a. The main location must be an ESSX system that is equipped for this service, and utilizes Data Link Console operation.
 - b. The branch locations must be one of the following.
 - (1) An ESSX service system.
 - (2) (DELETED)
 - (3) A location that has switching equipment that is customer-provided or is in an area that is served by another telephone company can be interconnected as a branch location only if the switching equipment is compatible with the Company's.
3. Basic Service Features
 - a. Remote Hold enables the attendant to hold a call without holding an RLT. The call is temporarily placed on hold at the originating System and automatically routed to an attendant after approximately 30 seconds.
 - b. Customer Testing of Release Link Trunks permits each RLT to a PBX branch to be dial accessed by the centralized attendant to insure it is in service and that the transmission performance is adequate.
 - c. Attendant Call Distribution queues and distributes calls to the CAS attendants. This provides administrative control over the team of attendants and enables the calls from the branch locations to be handled in their approximate order of arrival as attendant positions become available.
 - d. Attendant Recall on "Station Don't Answer" all PBX type branch locations provide a timed reminder, generally after 30 seconds, to automatically recall the attendant if a called station does not answer.
4. Rates and Charges¹
 - a. Variable Term Option Charges
 - (1) Release link trunk terminal equipment, main location (Rates and charges for a tie line facility are applicable for each RLT provided.)

	Term	Payment Plan	Monthly	Rate
(a) Per system	1	84

G. Automatic Route Selection - Basic (ARS-B)

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed for by a customer for network calls. Alternate routing to other facilities subscribed for by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net tie lines and Other Common Carrier (OCC) access lines which are compatible with ARS and toll facilities.
- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, OCC access line or a toll network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four (4) private routes. If no route is available, the call will route to toll or overflow tone (customer option). All patterns accessed by a single access code will have the same final route, either toll or overflow tone.
- c. For calls using FX, WATS, CCSA off-net or OCC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Each Release Link Trunk termination requires two channels between the Main and Branch locations. Release Link Trunk termination charges are in lieu of Tie Line and Miscellaneous Line termination charges.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX® Service (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

G. Automatic Route Selection - Basic (ARS-B) (Cont'd)

1. General (Cont'd)
 - d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.
2. *Terms and Conditions* (T)
 - a. Automatic Route Selection - Basic is provided only in association with ESSX Service furnished from No. 1 Electronic Switching System (ESS) central office equipment located on Company premises and may be provided, subject to the availability of facilities, to ESSX service systems which are served by the same such equipment.
 - b. Preferred routes and alternate routing patterns will be specified by the customer.
 - c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.
 - d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
 - e. A single rate per facility will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
 - f. Patterns without final route to toll may be offered only if a customer subscribes to a sufficient number of facilities which, in the judgment of the Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telephone service.
 - g. Where a route is used in one pattern (pattern reached by one access code) only one translation may be provided per route. Where a route is used in two or more patterns (each pattern is accessed by different access codes). One translation per pattern may be provided subject to the appropriate charges as specified in A112.26.12.G.3.a.(2) Where central office code translation is required for more than one Numbering Plan Area (NPA) per single facility group or route, rates and charges as specified should be applied for each NPA translated.
 - h. A group of patterns may have either toll as a final route or overflow tone. A combination of both within the same pattern group is not permitted. Dial "9" may be used as an access code only if the patterns accessed have toll as a final route.
 - i. Where toll restricted main station lines have access to ARS-Basic patterns with final route to toll, apply charge and rate as specified for patterns with overflow to tone in lieu of the charge and rate specified for final route to toll.

H. Station Message Detail Recording Via Revenue Accounting Office (RAO)

1. General
 - a. Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record, by main station line number, of originating intercity traffic routing over dial type tie lines, FX, WATS, CCSA, Other Common Carrier access lines and/or toll and at the customer's option on certain incoming calls that the attendant extends to a station or tie line within the customer's ESSX service group. SMDR detail on incoming calls does not include the calling number or the type of facility used.
 - b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.
2. Terms and Conditions
 - a. Station Message Detail Recording (SMDR) - RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
 - b. Station Message Detail Recording - RAO is not represented to be a provision of billing detail. Where tie line, Other Common Carrier access line, and foreign exchange facilities are involved all such call attempts, whether completed or not, will appear in the SMDR - RAO.
 - c. Station Message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.
 - d. A magnetic tape will be provided by the Company on each occasion Station Message Detail Recording - RAO is furnished to the customer. The tape becomes the property of the customer on a "no exchange" basis and it may not be returned to the Company for reuse.
 - e. Station Message details may be provided on all facilities subscribed for by the customer including toll, but will not include intercom calls originated by station users. The customer may designate the group or groups of facilities on which SMDR - RAO is to be provided. Where the facility designated by the customer is a toll network, the magnetic tape file will include a record of each message itemized on the customer's bill.
 - f. Directory Assistance (DA) call detail may be provided on the magnetic tape (customer option).

I. Subsidiary System Arrangements

1. Subsidiary System

- a. A Subsidiary System of an ESSX service system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's ESSX service system and which is connected by the lines to that ESSX service system.
- b. A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customer's ESSX service system to the stations of one or more subsidiary systems.

2. *Terms and Conditions*

(T)

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's ESSX service system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.
- c. The same rates and charges as specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
- d. Tie lines connecting the ESSX and subsidiary systems are provided at the same rates and charges as specified for ESSX® service tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
- e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's ESSX system.
 - (1) Where subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the system, the charges for such calls are identified and billed as primary directory listing calls of the ESSX service system.
 - (2) Where subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the subsidiary system except as specified in A112.26.12.J.2.f.
- f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

A112.26 ESSX Service (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements (Cont'd)

2. **Terms and Conditions** (Cont'd) (T)

f. (Cont'd)

- (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
- (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
- g. The ESSX service subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic optional service features of ESSX service to stations of the subsidiary systems.

3. Rates and Charges

a. Each Subsidiary System Arrangement

(1) Direct-Inward-Dialing

	Charge	USOC
(a) (DID Service rates and charges specified in Section A12. are applicable.)	\$-	NA
(2) Identified-Outward-Dialing	-	NA

A112.26 ESSX Service (Cont'd)

A112.26.12 Optional Service Features (Cont'd)

P. Station Message Detail Recording

1. General

- a. Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network. The SMDR content may vary depending upon the switching technology from which the call record is generated.
- b. The station message detail may include, but is not limited to, the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits output by switch, and end of dialing. SMDR data provided to customers using the ETS feature may include, but is not limited to, incoming call identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, and call event code where these features are offered.
- c. Station Message Detail Recording (SMDR) is designed for either an ETS or non-ETS ESSX service customer.
- d. For SMDR data delivery rates and charges, see Network Usage Information Service in Section A32. (T)
- e. SMDR as shown in this section is required for the activation of SMDR for ESSX service.

2. *Terms and Conditions* (T)

- a. The Station Message Detail Recording (SMDR) may be offered on ESSX service main station lines of customers where facilities and technology permit.

3. Rates and Charges¹

a. Term Payment Plan

- (1) Per ESSX service system so equipped:²

	Term Payment Plan

(d) ESSX service - L	850.00	175.00	140.00	VTP

A112.26.13 Customer Management Features³

A. ESSX Customer Administration Service

1. General

- a. The ESSX Customer Administration Service (ECAS) feature permits ESSX service customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated ESSX service station lines. Customer provided terminal equipment is required for the operation of the ECAS feature.
- b. For ECAS equipped station lines, ECAS allows the customer to verify and/or display the assignment of features on a single station line, a range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain ESSX service station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for ECAS.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Requires appropriate rates and charges associated with Network Usage Information Service in Section A32. (T)

Note 3: Material previously located under Customer Management Features has been deleted from this *Guidebook* and replaced with ESSX Customer Administration Service (ECAS). (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.13 Customer Management Features¹ (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)
 - d. Changing the status of a station line from accessible to ECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order charges specified in Section A4. apply.
 - e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of ECAS changes.
 - (1) A ECAS customer's change, display or verify capabilities are restricted to that particular customer's own ESSX service system.
 - (2) All changes are audited as they are entered by the ECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using a dialup, login, password/dialback arrangement.
 - f. A ECAS customer can schedule changes (individual or bulk) for completion by the next day or for a future day. Additionally priority changes may be requested and the changes completed the same day subject to **terms and conditions** A112.26.13.A.2.f., A112.26.13.A.2.o., and A112.26.13.A.2.p. (T)
 - g. Definitions pertaining to ECAS/ESSX features are specified in A112.26.3. (T)
 - h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal:
 - (1) Change particular service options on a per station basis and exchange station telephone numbers (TNs). The change capabilities are:
 - Line Status (Active/Inactive) (Station lines made inactive using ECAS will continue to be billed at the *guidebook* rates.)
 - CAT Code
 - Ringing Cycles for CFDA
 - Call Pickup Group: The call pickup group to which a station is assigned can be changed on a per station basis.
 - The Forward to Number can be changed for a station line with CFBL and/or CFDA assigned.
 - Speed Call Group: The Speed Call group to which a station is assigned can be changed on a per-station basis.
 - Series Completion "Hunt To" Telephone Number (TN): The "hunt to" TN assigned to a station line can be changed on a per-station basis. (All numbers in series completion hunt must be in the same common block.)
 - Station TN Rearrangement: Swap TNs from one location to another. (Rearranged station TN's carry all features and characteristics to their new location unless the Common Block is also changed.)
 - Facility Restriction Levels
 - Access Line Class of Service
 - Add/Change Customer Entered Listing Information
 - The common block to which a station line is assigned when a customer has split service can be changed on a per station basis.
 - (2) Activate/deactivate the following features and service options on a single station line basis:
 - Automatic Callback Calling

Note 1: Material previously located under Customer Management Features has been deleted from this *Guidebook* and replaced with ESSX Customer Administration Service (ECAS) (T)

A112.26.13 Customer Management Features¹ (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)
 - h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal: (Cont'd)
 - (2) Activate/deactivate the following features and service options on a single station line basis: (Cont'd)
 - Call Forwarding Busy Line
 - Call Forwarding Don't Answer
 - Call Forwarding Variable
 - Call Forwarding - Variable Outside
 - Call Hold
 - Call Pickup
 - Call Waiting Originating
 - Call Waiting Terminating
 - Dial Call Waiting
 - Directed Call Pickup - Barge In
 - Directed Call Pickup - Non Barge In
 - Speed Calling - 6
 - Speed Calling - 30
 - Basic Station Line Hunting (Series Completion) (Deactivating Basic Station Line Hunting may disrupt the normal completion order of a Hunt Group.)
 - Inhibit ETS queuing
 - TouchTone
 - Distinctive Ring/Call Waiting Tone
 - Conference Calling - 6 Way
 - (3) Review the following information to aid in system management.
 - The configuration of a single ESSX service station line (i.e., service options and active station line features.)
 - The number of stations having or not having a particular feature
 - Pending TN swaps
 - The series completion sequence of a station line
 - Selected Company entered information affecting customer station lines
 - Customer Entered Listing Information
 - The number of call pickup groups in the system.

Note 1: Material previously located under Customer Management Features has been deleted from this *Guidebook* and replaced with ESSX Customer Administration Service (ECAS)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.26 ESSX Service (Cont'd)

A112.26.13 Customer Management Features¹ (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

h. The ECAS feature allows the customer to perform the following transactions from the customer provided terminal: (Cont'd)

(4) A ECAS customer may also print the following administrative reports.

- Configuration (i.e., service options, station features) for a single station line or span of ESSX service station lines.

- A listing of all pending changes including the type of change and the scheduled effective date.

- Customer Entered Listing Information²

The following information is included on all ECAS changeable station lines.

- Station Telephone Number

- Name³

- Organization³

- Location³

(5) Initial training of the customer for up to four system managers in the use of this feature is included at the time the feature is put into service. Communication counselor training is a prerequisite to the ECAS systems manager training. Any customer training or subsequent assistance necessary after the initial establishment of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

i. ESSX[®] service main station lines reserved for future use via DialTone provisioning include preassigned telephone numbers and the facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.

j. The assignment of reserved ESSX service main station line facilities and the sequence of numbers for DialTone provisioning assigned to a subscriber's system is made at the discretion of the Company.

k. DialTone provisioning is furnished subject to the availability of facilities and telephone numbers.

l. Calls to telephone numbers reserved (but not activated) via DialTone provisioning will be routed to intercept over ESSX service common recorded announcement facilities as specified in A112.26.1. (T)

m. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning while in reserved status will be billed at 60 percent of the ESSX service main station line rate (Intercom and Exchange Circuits charges).

n. Telephone numbers and telephone facilities for ESSX service main station lines furnished via DialTone provisioning retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to an ESSX service main station line.

o. ESSX service main station lines reserved via DialTone provisioning will be included in the determination of System Size (200, 600 or XL).

Note 1: Material previously located under Customer Management Features has been deleted from this *Guidebook* and replaced with ESSX Customer Administration Service (ECAS) (T)

Note 2: The ability to print customer entered listing information is provided as an optional feature, and is subject to the appropriate charges specified in A112.26.13.A.3.

Note 3: The ECAS customer is responsible for entering and updating the information contained in this field.

A112.26 ESSX Service (Cont'd)

A112.26.13 Customer Management Features¹ (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

- p. To gain access to the Company's Dial Access network, the subscriber must have one Security Card for each System Manager accessing the ECAS Database. Subscriber's under an existing ECAS contract will be issued up to (not to exceed) three (3) Security Cards at no additional charge when required by the Company to use a Security Card to access the Company's network.

Once the first three (3) Security Card(s) have been issued, the subscriber must pay for any subsequent Security Cards. Should the subscriber require more Security Cards, they may be ordered from A112.26.A.4.b.3. following.

- q. The Security Card rate element will provide for the issuance of a card for each System Manager or for the replacement of lost, stolen or expired cards. If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of an existing Security Card so the Company can ensure that the card is validated for ECAS.

2. Terms and Conditions

- a. ECAS is provided only with ESSX service systems served from a No. 1/1A ESS central office and is furnished subject to the availability of facilities.

- b. Customers equipped for ECAS must order via a service order (Appropriate Service Order Charges as specified in Section A4. will apply.) ECAS changeable features in groups of five (5) at the rates specified in A112.26.13.A.4.

- c. Non-ECAS changeable features with the exception of Three-Way Calling, Consultation Hold, Call Transfer (all calls) will be added subject to specifications and rates in A112.26.8., A112.26.9. or A112.26.10. as appropriate. Three-Way Calling, Consultation Hold, Call Transfer (all calls) is offered in groups of five (5) at the rates specified in A112.26.13.A.4.b.

- d. Features for ECAS exempt station lines must be requested via a Service Order (appropriate Service Order Charges as specified in Section A4. will apply) and added by the Company. Rates and charges for the features specified in A112.26.8., A112.26.9. or A112.26.10. apply as appropriate.

- e. The customer provided ECAS terminal equipment requires an ESSX service main station line. Rates and charges in A112.26.8., A112.26.9. or A112.26.10. apply as appropriate.

- f. ECAS changes must be entered prior to a time to be designated by the Company to be completed as priority changes or by the next day as requested by the customer.

- g. A ECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication when 100 percent utilization of a feature is reached. Additional quantities of features may be added subject to **term and condition** A112.26.13.A.2.b.

- h. Contractual obligations and End User Common Line charges will be billed to the location where originally installed and will not transfer with a station number rearrangement.

- i. If the Company is requested to load ECAS changeable features for new ESSX/ECAS customers, Installation Charge specified in A112.26.13.A.3.b.(4) applies per ECAS feature added.

- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service option and feature change capabilities will still be available except on lines assigned to multiline hunt groups.

- Station lines assigned to multiline hunt groups
- Attendant Lines
- Any ESSX service line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
- Manual lines (e.g., station lines with full originating and/or terminating restrictions)

Note 1: Material previously located under Customer Management Features has been deleted from this **Guidebook** and replaced with ESSX Customer Administration Service (ECAS)

A112.26 ESSX Service (Cont'd)

A112.26.13 Customer Management Features¹ (Cont'd)

A. ESSX Customer Administration Service (Cont'd)

2. *Terms and Conditions* (Cont'd) (T)

- k. ECAS functions performed by the Company at the customer's request subsequent to the initial installation will be subject to the nonrecurring, charges specified in A112.26.13.A.3.b.
- l. The Per System charges specified in A112.26.13.A.4. apply when a feature is initially activated in a Common Block.
- m. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the ECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- n. The ECAS customer is responsible for assigning and maintaining a record of station feature assignments. The ECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- o. ECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of a ECAS TN swap. The appropriate Service Order charges specified in Section A4. apply.
- p. ECAS customers will be limited to one (1) TN swap per day as a priority request. The number of feature changes that can be requested as priority changes will be determined by the Company when ECAS is ordered.
- q. When required by the Company to use a Security Card, the ECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the ECAS host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in A112.26.13.A.4.b.3. following.

3. ECAS Capability - Rates and Charges²

ESSX-XL customers will have to pay for ECAS on a per line basis subject to the rates specified in A112.26.13.A.3.a.(3). The installation charge will be reapplied if an ESSX-XL customer changes their ECAS billing arrangement subsequent to the installation of the ECAS feature.

A112.27 Electronic Tandem Switching Features

(Obsoleted 09-26-95, Type D) Service rates and charges in this section are available for inward activity of existing subscribers only as specified in the obsolescence rules stated in A112.26. Not available for new service or moves of existing service to new locations. Moves of existing service will be allowed when a subscriber remains within the same serving central office switch.

A112.27.1 General

- A. Electronic Tandem Switching (ETS) Features are provided only in association with ESSXservice furnished from No. 1A Electronic Switching System (ESS) central office equipment located on Company premises and may be provided subject to the availability of facilities to ESSX service systems which is served by the same such equipment.

A112.27.2 Terms and Conditions

- A. Explanation of Terms
 - 1. ETS Features
 - a. ETS Features are ESSX service optional features which are as follows.
 - Automatic Route Selection - Deluxe
 - Facility Restriction Levels
 - Time of Day Routing
 - Authorization Codes
 - Deluxe Queuing
 - Uniform Numbering
 - Automatic Alternate Routing
 - Overflow to Toll
 - Network Usage Information Service

(T)

Note 1: Material previously located under Customer Management Features has been deleted from this *Guidebook* and replaced with ESSX Customer Administration Service (ECAS).

(T)

Note 2: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

(T)

Note 3: When required by the Company to use a Security Card to access the Company's network, up to three (3) Security Cards, as outlined in A112.26.13.A.1.p. preceding, will be provided at no charge to subscribers who are under the existing ECAS rate and *guidebook* structure.

Note 4: Appropriate Service Charges as specified A4. apply.

(T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.27 Electronic Tandem Switching Features (Cont'd)

A112.27.2 Terms and Conditions (Cont'd)

(T)

- A. Explanation of Terms (Cont'd)
 - 2. Automatic Route Selection - Deluxe (ARS-D)
 - a. ARS-D provides for the origination of only ten digit off-network calls to a public network telephone number after the ESSX service ARS-D access code (e.g., "8") automatically scans the digits and selects a first choice completing route when available or subsequent route if the first choice route is not available. Routes may include Foreign Exchange Trunk lines, Wide Area Telephone Service lines, exchange trunk lines to the toll network, access lines to CCSA, or other arrangements where compatible.
 - b. The final completing route may be the toll network, or at the option of the customer, the call attempt is routed to overflow tone if a Facilities Restriction Level (FRL) is insufficient to complete the call.
 - c. When ARS-D is provided in connection with Uniform Number Automatic Alternate Routing (UN/AAR), incoming tie lines from other ESSX service or PBX systems connected directly to the ESSX service may be arranged to have automatic access to the ARS-D and UN/AAR features. When such arrangements are provided, the tie lines to the ARS-D become "dedicated" tie lines and separate tie lines are required from the distant ESSX service or PBX System if access is to be provided to other ESSX service or PBX System equipped with an ARS-D like capability for subsequent access to the toll network.
 - d. The ARS-D feature provides all number translation and supervision necessary to route the call. "More Expensive Route" (MER) Tone is supplied, at the option of the customer, as a function of the route selected for a particular call.
 - e. Time of Day (TOD) Routing - TOD Routing is an ARS-D option which permits preprogrammed selection of alternate routing pattern groups for off-network calls (up to three sets of ARS-D routing pattern groups) on a time-of-day and day-of-week basis. Manual override is available with the Facility Administration and Control feature. The maximum number of programmed changes per week is sixteen.
 - 3. Facilities Restriction Levels (FRL)
 - a. FRL is required in connection with ARS-D and is provided on each station and incoming tie line to determine both the types of calls and types of facilities within the privileges of the associated user. When the FRL is transmitted over a tie line to a distant PBX or ESSX service system equipped with ARS-D (for call screening at the distant point), it is identified as a Traveling Class Mark (TCM).
 - b. Authorization Codes - Authorizing Codes are an FRL option which provides for a station user to dial a code which overrides the FRL associated with that station line or incoming tie line. The ESSX service requests dialing of the authorization code when the default FRL (i.e., the FRL associated with the station line or incoming tie line) has insufficient privileges to complete the call. The Authorization Code is also inspected for validity as a security check. The Authorization Code is recorded in the Station Message Detail Record of the call when the SMDR feature is provided.
 - 4. Deluxe Queueing
 - a. Deluxe Queueing permits station users to be placed in the queue whenever the first choice route for completing a particular call is already in use. Two queueing arrangements are available.
 - (1) A Ring-back Queue (RBQ) in which case the calling station goes on-hook and is called back when a facility becomes available.
 - (2) An Off-hook Queue (OHQ) in which case the calling station remains off-hook and is held in queue until a facility becomes available.
 - b. Calls held in queue beyond a predetermined time limit will be removed from the queue and be routed, at the option of the customer, via either subsequent route choices or to overflow tone.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.27 Electronic Tandem Switching Features (Cont'd)

A112.27.2 *Terms and Conditions* (Cont'd)

(T)

A. Explanation of Terms (Cont'd)

5. Uniform Numbering Automatic Alternate Routing (UN/AAR)
 - a. UN permits station users to place calls via tie lines using a uniform dialing plan. The user dials an access code, followed by a seven digit number which uniquely identifies a specific on-network station line. The number consists of a three digit location code and a four digit station line code. (When the same access code is followed by a ten digit public network number, the call is routed via the ARS-D feature). The feature provides the number translation and supervision necessary to route the call.
 - b. AAR provides automatic routing of on-network calls to alternate tie line routes when primary tie line routes are busy.
 - c. Automatic Overflow to Toll - Automatic Overflow to Toll provides completion of on-network calls via a toll network when all primary and alternate tie line routes are busy.

B. Automatic Route Selection - Deluxe (ARS-D)

1. ARS-D is only furnished in association with FRL.
2. Preferred routes and alternate routes in patterns will be specified by the customer.
3. A maximum of three ARS-D Pattern Groups with a maximum of sixty-four patterns in each pattern Group will be provided. The three Pattern Groups referred to will consist on one primary and two additional Pattern Groups for TOD routing.
4. A maximum of ten routes are provided in a pattern.
5. Each WATS type band is treated as a separate route.
6. A maximum of sixty-four Number Plan Areas (including the home NPA) may be designated by the customer for routing of calls by central office codes (six digit translation).
7. All rates and charges specified for ARS-D are in addition to the rates and charges for the associated facilities and facility terminations.
8. A single rate "per facility terminated in patterns" will apply regardless of the number of patterns having access to the facility. The monthly rate specified is applicable to each facility available to the patterns.
9. The charges specified in A112.27.3.A. for each code addition or change is applicable whether customer or Company initiated.
10. Where ARS-D is furnished in connection with UN/AAR, tie lines to other PBX or ESSX service locations may appear as routes in ARS-D patterns when such tie lines are provided for subsequent access to a toll network at the distant PBX or ESSX service location.
11. The TOD Routing feature permits up to sixteen programmed changes in Pattern Groups per week. When additional ARS-D patterns are required due to TOD changes, rates and charges as specified in A112.27.3.A. apply to each additional pattern.
12. CCSA access lines (off-net calls) and access lines to other similar arrangements, compatible with ARS-D, may be included as routes in patterns.
13. ESSX service, toll diversion and restriction does not function on calls routed via ARS-D.

C. Facilities Restriction Levels (FRL)

1. FRL is only furnished in association with ARS-D.
2. A maximum of eight Facilities Restriction Levels are available for each ESSX service.
3. A maximum of one hundred thousand Authorization Codes are available for each ESSX service.
4. Authorization Codes must consist of a uniform number of digits, with a minimum of three digits and a maximum of six digits.
5. Customer implementation of change of Authorization Codes or associated Facilities Restriction Level require the Facilities Administratiion and Control Feature.
6. All station lines and incoming tie line terminations with access to ARS-D must be equipped with FRL.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.27 Electronic Tandem Switching Features (Cont'd)

(T)

A112.27.2 Terms and Conditions (Cont'd)

- D. Deluxe Queueing
 - 1. Calls in queue may overflow to subsequent routes or to tone at the customer's option.
 - 2. Deluxe Queueing is available with facilities appearing as the primary (first choice) route in ARS-D or UN/AAR patterns.
 - 3. The test and announcement provided with the Recorded Announcement option will be provided by the Company.
 - 4. The music for the Music-On-Queue option must be provided by the customer.
 - 5. The Music-On-Queue option requires a voice grade channel between the central office and the customer-provided music source at the customer premises. This feature is available only with OHQ.
 - 6. Customer must specify the length of time a call is held in queue (threshold time limit) before overflowing to subsequent routes or to overflow tone.
 - 7. Incoming tie lines can be arranged for OHQ only.
 - 8. ESSX service main station lines can be provided either RBQ or OHQ. All such stations must be equipped with the same type queueing.
 - 9. OHQ must be equipped for either Recorded Announcement or Music-On-Queue.
- E. Uniform Numbering Automatic Alternate Routing (UN/AAR)
 - 1. All calls must consist of a seven digit called number, after the access code.
 - 2. The customer must specify the first choice route and each subsequent route to each system involved.
 - 3. The customer must notify the Company when any change in route or routing sequence is desired.
 - 4. A maximum number of routes in a pattern is four.
 - 5. The maximum number of patterns is one hundred-eighty.
 - 6. Where calls are routed via a toll network, the rates and charges specified for Automatic Overflow to Off Network Facilities, PBX Exchange Trunks, and toll messages are applicable.
 - 7. The rates and charges specified in A112.27.3.A. apply per tie line facility terminated in UN/AAR and/or ARS-D patterns and apply once per facility, whether terminated in one or both patterns.

A112.28 Digital ESSX Service

(Obsoleted 09-26-95, Type D) Service rates and charges in this Section are available for inward activity of existing subscribers only as specified following. Not available for new service or entire moves of existing service to new locations. Moves of existing service will be allowed when a subscriber remains within the same serving central office switch.

Obsolescence Rules

1. Inward activity for Digital ESSX service will be allowed.
2. Digital ESSX service subscribers who have their entire account under a month-to-month payment option will be allowed to maintain their Digital ESSX service at month-to-month rates.
3. Digital ESSX service subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the Term Payment Plan rates and charges outlined in this Section of the *Guidebook* when the Term Payment Plan associated with the Common Equipment expires. For expired Term Payment Plans, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section of the *Guidebook*. (T)

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: In addition, on ETS-type tie line termination is required.

Note 3: Dependent on type of overflow arrangement, one or two facilities are required for a call overflowing to Off Network facilities.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

4. Digital ESSX service subscribers under a Term payment Plan will be allowed to maintain their Digital ESSX service under the rates and charges outlined in this Section of the *Guidebook* when the Term Payment Plan expires. For expired Term Payment Plans, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section of the *Guidebook*. (T)
5. Digital ESSX service subscribers under a Term Payment Plan will have until 11-26-95 to exercise their recast option as described in A112.28.6 for a Term Payment Plan period of not greater than 36 months in length. Digital ESSX service subscribers under a month-to-month payment option will have until 11-26-95 to convert to a Term Payment Plan period of not greater than 36 months in length.
6. Existing Digital ESSX service subscribers who are under a Term Payment Plan may add a new secondary location (SLA) or move an existing SLA of their existing service.

A112.28.1 General

- A. Digital ESSX service is furnished from Digital Central Office equipment located on Company premises and associated facilities so arranged as to provide the following basic service features.
 1. Direct Inward Dialing (DID) and Direct Outward Dialing (DOD) of exchange and long distance message network calls to and from stations and attendant positions of a Digital ESSX service system.
 2. Intercommunication calls between stations of the same Digital ESSX service system.
 3. Identified Outward Dialing (IOD), by station number of outgoing long distance message calls dialed by a station. Only calls billed to the subscriber by this Company will be provided this identification.
 4. Common recorded announcement interception of calls to unassigned station numbers.
 5. Basic Station Line Hunting
 6. Touch-Tone Service
- B. Digital ESSX service will be furnished in four categories, based on the size of the subscribers system.
 1. Digital ESSX service - VS will serve systems with 1-24 main station lines.
 2. Digital ESSX service - 200 will serve systems with 25-200 main station lines.
 3. Digital ESSX service - 600 will serve systems with 201-600 main station lines.
 4. Digital ESSX service - XL will serve systems with more than 600 main station lines.
- C. A Digital ESSX service system may be comprised of the following components.
 - Common Equipment¹
 - Network Access¹
 - Main Station Lines¹
 - Terminating Arrangements
 - Features
 1. The Common Equipment, Network Access and Terminating Arrangements will be at the rates and charges specified in A112.28.7.
 2. Main station line rates will consist of the Intercom charge and the appropriate Exchange Circuit charge. These charges will be located in A112.28.8 for Digital ESSX service - VS or 200, A112.28.9 for Digital ESSX service - 600 and A112.28.10 for Digital ESSX service - XL. (T)

Note 1: Every system must include these components.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.1 General (Cont'd)

C. A Digital ESSX service system may be comprised of the following components. (Cont'd)

3. Digital ESSX service Line and System Features will be grouped as follows.

- A Line Features Grouped
- A Line Features Individual
- B Line Features
- Optional Service Features
- Customer Management Features¹

a. A Line Features will be offered on a grouped basis to Digital ESSX service Subscribers who have selected a Variable Term Payment Plan of 36, 60 or 84 Months. Subscribers selecting the one month payment option will be offered the Group A Line features on an individual basis only.

b. B Line Features and Optional Service Features will be offered to Digital ESSX service subscribers subject to the specific requirements within each arrangement.

c. A Digital ESSX service - VS or 200 subscriber will select Group A and B features in A112.28.8.¹ (T)

d. A Digital ESSX service - 600 subscriber will select Group A and B features in A112.28.9.¹ (T)

e. A Digital ESSX service - XL subscriber will select Group A and B features in A112.28.10.¹ (T)

f. Optional Service Features in A112.28.11 will be offered to all Digital ESSX service subscribers. (T)

g. Customer Management Features will be offered subject to the *terms and conditions* in A112.28.13. (T)

D. If the subscriber is not completely satisfied with his Digital ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs.

1. The following charges will be refunded:
 - a. Nonrecurring and recurring charges (up to ninety days recurring billing) for rate elements as specified in Section A12. for Digital ESSX service.
 - b. Service connection charges from Section A4. (T)
2. The following charges will not be refunded:
 - a. Recurring charges for Network Access Registers and Grouping as specified in Section A3. (T)
 - b. End User Common Line Charges as specified in BellSouth Telecommunications, Inc. FCC No. 1.
3. Customer provided equipment acquired for use with Digital ESSX service will not be included in this plan.
4. Digital ESSX service provided under the One Month payment option is not eligible.
5. Subscribers provided Digital ESSX service via Contract service arrangements may negotiate a satisfaction plan on an individual case basis.
6. This guarantee will not apply to transfers of service, moves, conversions, or recasts.
7. Digital ESSX service will be disconnected no later than ten (10) days after receipt of notification of dissatisfaction.
8. Subscribers requesting an extension of the 10 day disconnection interval to accommodate installation of a replacement product/service, will be billed the contracted recurring rates for that period, not to exceed six (6) months.

Note 1: Digital ESSX service systems subscribing to the DECAS feature in A112.28.13 must select DECAS Changable features subject to the rates, *terms and conditions* in A112.28.13. (T)

- D. If the subscriber is not completely satisfied with his Digital ESSX service within ninety (90) days of effective billing date, all payments will be handled as indicated in the following paragraphs. (Cont'd)
 - 9. Subscribers must retain continuous service beyond the ninety days via other Local Exchange services as offered in Section A3. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.2 *Terms and Conditions*

- A. Digital ESSX service is furnished subject to the availability of facilities and features from digital central office equipment located in a central office building owned or leased by the Company. The service allows for normal station activity including incidental additions and deletions. Major additions to and/or major relocations of Digital ESSX systems are subject to the same *terms and conditions* as initial installations. (T)
- B. Certain Services are available on an individual main station line basis and are subject to the capabilities of the serving central office.
- C. Optional Service Features include attendant features. These features may require customer provided compatible terminal equipment.
- D. All console functions by the attendants at the subscriber's premises are performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company to maintain a proper standard of service.
- E. All Digital ESSX service main station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with Digital ESSX service.
- F. Tie lines for direct connections between a basic Digital ESSX service system and other systems are provided primarily for communication between stations of the two systems. In such cases, tie line mileage as specified in Section A13. and miscellaneous line termination charges apply. In addition, these tie line connections may be arranged to provide completion of incoming or outgoing local and long distance calls through the Digital ESSX service system to or from other systems (Digital ESSX service or non Digital ESSX service) provided such connections to the exchange or long distance network are only made at one system at a time. (T)
- G. Where completion of incoming and outgoing local and long distance calls through a Digital ESSX service system is furnished to or from main station lines of a separate Digital ESSX service system in another exchange or a non Digital ESSX service system in the same or different exchange, the charges applicable for the following features apply in addition to the regular charges for the facilities connecting the systems except for Subsidiary System Arrangements furnished under the *terms and conditions* specified in this *Guidebook*. (T)
 - 1. Rates and charges as specified in the Private Line *Guidebook* apply to miscellaneous lines furnished with unique access codes (trunk level access) except for tie lines furnished in connection with Subsidiary System Arrangements as specified in this *Guidebook*.
 - 2. Digital ESSX service optional feature charges apply for each trunk terminated main station line as appropriate.
- H. Dormitory service is furnished in accordance with the *terms and conditions* for Dormitory Communications Service specified in Section A13. (T)
- I. Each system established per customer must consist of a minimum of one (1) main station line. Systems installed or ordered prior to April 15, 1993 are not subject to this *term and condition*. ESSX service-200 systems installed or ordered prior to April 15, 1993 may have less than 25 main station lines.
- J. A mixture of Flat Rate and Measured Rate Service will not be allowed within a single customer system or in a Digital ESSX service/Subsidiary System Arrangement situation.
- K. Suspension of Service

With the exception of Network Access Registers, neither partial nor complete temporary suspension of Digital ESSX service is permitted.
- L. A twelve month minimum service period shall be required if the subscriber's system is a Digital ESSX service - 600 or ESSX service - XL. The normal minimum service period as specified in Section A2. will be applicable to Digital ESSX service VS or 200 systems.
- M. Touch-Tone service will be furnished subject to the *terms and conditions* specified in Section A13. Touch tone rates and charges will not apply to Digital ESSX service. (T)
- N. Directory Listings will be furnished subject to the rates, *terms and conditions* specified in Section A6. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

- O. The number of simultaneous exchange and toll network calls to and from main station lines and attendant positions of a Digital ESSX service system is limited by the number of network access registers subscribed to by the customer. Each Network Access Register (NAR) may be arranged for two-way, one way incoming or one-way outgoing operation depending upon the option of the customer at the time the NAR is installed. When a change in the operation of the NAR is requested by the customer, the Secondary Service Charge as specified in Section A4. is applicable. (T)
- P. For application to Digital ESSX service, the Line Connection Charge and Line Change Charge Section A4. are applicable to the NARs only. (T)
- Q. Except where *term and condition* A112.28.2.P. is applicable, the Digital ESSX service installation charges are in addition to regular Simple Premises Work Charges, Service Connection Charges, move, change and installation charges covered in this and other Company *guidebooks*. (T)
- R. Digital ESSX service installation charges due on an initial installation or subsequent addition may be paid in full at the time of installation or deferred over a predetermined period of time in accord with existing *guidebook* and administration provisions. (T)
- S. If the Digital ESSX service subscriber elects a Measured Rate Service option, Measured Rate Service usage charges specified in Section A3. are applicable on calls to locations outside the subscriber's Digital ESSX service system in addition to rates and charges in this and other *Guidebook* sections for Digital ESSX service and other associated services. Usage charges are not applicable on calls originated and terminated within the same Digital ESSX service system. (T)
- T. Digital ESSX service main station lines may be restricted from dialing three-digit central office and service codes by applying Code Restriction to the line. The three-digit codes which may be restricted constitute those codes to which Public Announcement or Directory Assistance (e.g. 211, 611, 811 and 900 calls) are assigned which could generate billing to the originating main station line. Code Restriction arrangements may also be used to prohibit toll calls to a carrier other than the Presubscribed Interexchange Carrier (dialed 10XXX and 101XXXX). Inter-LATA calls dialed 0- (operator handled) calls cannot be restricted. The term "Public Announcement Services" as used herein are those services which, in the judgment of the Company, furnish advertised recorded announcement messages to the general public (e.g., time, weather, sport scores and stock market reports). The Public Announcement Service central office codes will be determined by the Company and will be commonly denied access in the central office serving the Digital ESSX service systems subscribing to this service arrangement.
 - 1. At the time a code restriction arrangement is installed, the Digital ESSX service system will be arranged for the code restriction specified by the customer and the main station lines designated by the customer will be so equipped. When the customer requests the subsequent addition or removal of code restriction on a main station line, the appropriate Secondary Service Charge as specified for a change in line termination applies per main station line affected except that no such charge applies when the code restriction arrangement is disconnected in its entirety.
 - 2. Where code restriction applies to a particular central office code, direct outward dialed main station line access is denied to telephone numbers associated with that central office code.
 - 3. Code Restriction Arrangements to deny access to Directory Assistance and/or Public Announcement Services are not assured. These features are intended to limit main station line direct dialed outgoing calls, but such calls may, in certain circumstances, be completed and will be charged for in the normal manner.
- U. Zone charges do not apply to Digital ESSX service.
- V. For purposes of application of End User Access Charges only, as set forth in BellSouth Telecommunications, Inc. F.C.C. No. 1, Digital ESSX service main station lines for use by residents of dormitory living quarters will be considered residential service. Main station lines terminated in dormitory housing for administrative or other business use will not fall in this classification.
- W. Call Return, Call Tracing, Repeat Dialing, Calling Name Display, and Caller ID are Optional Service Features listed in A112.28.12. These features require the implementation of Common Channel Signaling System #7 (CCS7) into the network and may have limited availability. These features will only operate interoffice on local calls originating and terminating within Central Offices equipped with CCS7. These features will operate intraoffice prior to implementation of CCS7. These features will not work on an originating basis with party-line service, Toll Terminals, Trunks, and some Remote Switching Locations.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.2 Terms and Conditions (Cont'd)

(T)

W. (Cont'd)

The Company will deliver all numbers, subject to technical limitations, including telephone numbers associated with Non-Published Listing Service as described in Section A6. (T)

X. Digital ESSX service subscribers ordering Assumed Dial '9' must use station terminal equipment that utilizes dual tone multi-frequency (DTMF) signaling.

Y. For every Digital ESSX service main station line extended into a Foreign Exchange, the Digital ESSX service subscriber must terminate a Digital ESSX service main station line in the exchange in which their common equipment is located. Digital ESSX service main station lines extended into a Foreign Exchange do not apply toward the four line minimum.

Z. Features followed with I are unique to the DMS-100 switch and those with II are unique to the 5ESS switch.

AA. CALLING NUMBER DELIVERY BLOCKING - PER CALL

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.

AB. CALLING NUMBER DELIVERY BLOCKING - PERMANENT

This feature enables certain customers as described in A112 to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is in operation on a continuous basis.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

Calling Number Delivery Blocking - Permanent is available upon request to certain customers as described following:

Domestic violence intervention agencies, state and county departments of human resource shelters and other such agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized without blocking.

A112.28.3 Definitions

ACCESS CODE RESTRICTION GROUP (ACRG)

An ACRG will allow stations (assigned to that ACRG) access to predefined facilities. Station access to facilities is restricted by the station ACRG assignment to the predefined facilities. Up to eight ACRGs can be established by the Company for each group.

ACCESS LINES TO CUSTOMER PROVIDED FEATURES

This feature allows dial access from Digital ESSX service for connection to customer provided features. (Recorded Telephone Dictation, Dial Code Sending Equipment and Loudspeaker Paging).

ADDITIONAL ANNOUNCEMENT

Second or third announcement available with Automatic Call Distribution or Uniform Call Distribution.

ADDITIONAL DIRECTORY NUMBERS

An assigned Directory Number other than the Primary Number on an Electronic Business Set (EBS).

ASSUMED DIAL '9'

Utilizes central office capabilities to allow the main station line equipped to access the network without dialing '9' (provided on all lines in a system).

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

ATTENDANT ACCESS LINE

An attendant access line connects customer provided attendant terminal equipment to the serving central office. These lines are used for the completion of calls directed to the attendant, extension of those calls to stations and attendant assistance for stations.

ATTENDANT ACTIVATION/DEACTIVATION OF CALL FORWARDING

Allows a console attendant to program, activate and/or deactivate Call Forwarding for stations assigned Call Forwarding - Variable.

ATTENDANT ACTIVATION/DEACTIVATION OF MESSAGE WAITING

Permits an attendant to activate/deactivate Message Waiting equipped main station lines.

ATTENDANT CALL TRANSFER

This feature allows the attendant to transfer a call to another Directory Number (DN) or another attendant position.

ATTENDANT AUTODIAL

This feature permits an attendant to dial frequently called numbers by depressing the Autodial feature key, which is programmed with the number.

ATTENDANT CAMP-ON AND CAMP-ON MODE OPTIONS

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of camp-on will be given to the busy main station line each time the attendant attempts a completion.

ATTENDANT CAMP-ON WITH DISTINCTIVE TONE

This feature allows incoming listed number calls, which the attendant attempts to complete to a busy main station line, to be held waiting and then automatically connected when the called main station line becomes available. An indication of the distinctive tone will be given to the busy main station line.

ATTENDANT CONFERENCE

Using a six-port conference circuit, an attendant may interconnect up to five conferees on one call. The sixth port is required for attendant access.

ATTENDANT CONTROL OF FACILITIES

Attendant Control of Facilities (ACOF) permits an attendant to restrict dial access by all stations to tie lines, FX lines and WATS lines. This feature can also be used to restrict access to any dial access code activatable feature. It does so by establishing groups of facilities and/or features that simultaneously will be activated. This feature can be accessed via key or a dial access code.

ATTENDANT GROUP TRUNK ACCESS CONTROL

This feature utilizes special keys on the customer provided attendant console to serve as a common interface for trunk group busy and trunk group access for all trunk groups allocated to the customer group.

ATTENDANT POSITION

Customer provided terminal equipment utilized for attendant control and call connecting functions.

ATTENDANT RECALL TIMER

This feature returns attendant-extended calls to a main station to the attendant after a prescribed waiting period if the main station user is unable to answer.

ATTENDANT/STATION CONTROLLED OUTGOING RESTRICTIONS

Allows the attendant or designated station to place restrictions on call origination for individual directory numbers or groups of directory numbers.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

ATTENDANT SERVICE

Incoming calls to the main listed number are answered by an attendant, who may complete the call to the desired main station line by means of the Call Transfer feature.

An unrestricted and semirestricted main station line user may dial the attendant over attendant lines to secure help in the completion of an outgoing call by means of the Dial "O" calling auxiliary attendant feature.

ATTENDANT SPEED CALLING

Allows an attendant to dial frequently dialed numbers by depressing a speed call key and dialing one or two digits instead of all the digits in the number.

AUTOMATIC CALL DISTRIBUTION I (ACD)

Automatic Call Distribution (ACD) features provide advanced call distribution and queuing capabilities as an integrated function of Digital ESSX® service. The ACD features are grouped into two sets: ACD Basic, without Network Management Reports (NMR) and ACD with NMR.

AUTOMATIC/CALLBACK RING AGAIN

Automatic Callback permits a main station line user who attempts an intercommunication call to a busy main station line to be automatically connected to that line when both called and calling lines are subsequently idle.

AUTOMATIC LINE

See Direct Connect Number.

AUTOMATIC ROUTE SELECTION

Automatic Route Selection is an optional feature available where facilities permit, that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities, subscribed for by the customer, is also provided. This arrangement is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines and Interexchange Carrier access lines which are compatible with ARS and toll network facilities.

BASIC TERMINATIONS

See Miscellaneous Line Terminations.

BUSINESS SET INTERCOM

Places an intercom call between two Electronic Business Set stations automatically when a designated button is depressed.

CALL-BACK QUEUE

See Queuing.

CALL FORWARDING - BUSY LINE

Call Forwarding - Busy Line automatically routes calls to the attendant or preselected main station line when the called main station line is busy. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via activation code.

CALL FORWARDING - DON'T ANSWER

Call Forwarding - Don't Answer automatically routes calls to the attendant or preselected main station line when the called main station line doesn't answer within the preset ringing cycle. This feature may be either fixed (changeable by service order only) or programmable (customer changeable) by station user via activation code.

CALL FORWARDING - VARIABLE

Call Forwarding - Variable, when activated by a main station line user, automatically routes calls intended for his main station line to any other main station line selected within the same system or optionally outside the Digital ESSX service system. The main station line selected may also be the attendant. The attendant may also activate call forwarding for a main station line.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

CALL HOLD

Call Hold allows a main station line user to place any call involving their main station line on hold by flashing and dialing a special code. The main station line is then free to originate another call. The first call is retrieved by dialing the hold code a second time.

CALL HOLD II/PERMANENT HOLD

Call Hold II allows a main station user to place any call involving their main station line on hold by flashing the switchhook and dialing a special code. When Call Hold II is activated no calls can be originated or terminated from the main station line. The held call is retrieved by going off-hook. If the call is not retrieved within a time designated by the customer, the station line will ring and the held call will be returned.

CALL PARK I

Call Park allows the attendant to park calls against any directory number in the attendant customer group. The parked call may be retrieved from any station by dialing the feature access code for retrieval plus the directory number.EST

CALL PICKUP

Call Pickup allows a main station line user to answer calls directed to another main station line within the same preset Call Pickup group.

CALL RETURN

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard. Once the customer hangs up, the network will monitor the busy/idle status of both lines every forty-five seconds for up to thirty minutes. If during the queuing process both lines become idle, the customer is notified, via a distinctive ring (short, short, long), that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If unanswered by the customer, the distinctive ring will repeat every five minutes until answered, or for the remainder of the thirty minute monitoring interval. Multiple numbers may be placed in queue. The first idle number will be connected first. Both the customer and the called party may originate and receive calls without affecting the call return feature status.

CALL TRACING

Call Tracing enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company's Security Department indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the local business office for further action. The customer is not provided the traced number.

Only calls within central offices equipped with CCS7 are traceable using Call Tracing.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

If the customer receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

CALL TRANSFER

Call Transfer provides for the transfer by a Digital ESSX service station of calls. The Call Transfer feature is needed in addition to Three-Way Calling if the stations type of call transfer is different from the call transfer type selected for the customer's group.

CALL WAITING - DIAL (DCW)

The Dial Call Waiting (DCW) feature provides the ability for originating main station lines to invoke call waiting service on selected intragroup calls by dialing an access code followed by the extension number of the main station line to be call waited.

CALL WAITING - EXEMPT

Call Waiting Exempt allows a called station to be exempt from Dial Call Waiting and Call Waiting Originating.

CALL WAITING INDICATION

This feature is installed at the MLHG (Multi Line Hunt Group) customer premises. Customer provided equipment is also required to provide an indication of the call delay experiences by callers that are waiting on queue to be answered.

CALL WAITING -INTRAGROUP

Permits intragroup calls to a busy main station line equipped with the feature to be answered while the existing call is held.

CALL WAITING - ORIGINATING

Call Waiting - Originating allows an equipped main station line to send the Call Waiting tone to any busy main station line in the same system.

CALL WAITING RINGBACK ALERT

A terminating main station line feature that provides a distinctive alert which indicates to the caller that a called main station line is busy but has received a Call Waiting indication.

CALL WAITING - TERMINATING

Call Waiting - Terminating informs a busy main station line, when the main station line is so equipped, that an incoming call is waiting (burst of tone), and permits holding the present connection while answering the new call and return to the original connection.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

CALLER ID

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originates from a multi-line hunt group, the telephone number transmitted will always be the main number of the hunt group.

Caller ID is not available on operator handled calls.

Caller ID is available on Electronic Telephone Sets in A112.28.11.M.

(T)

CALLING NAME DISPLAY

This feature enables the name of the calling or called party to be displayed on incoming and outgoing calls, respectively. The names displayed are those datafilled through service order to correspond to particular Directory Numbers (DNs). This feature is restricted to calls within a customer group.

CALLING NUMBER DELIVERY BLOCKING - PER CALL

This feature allows a customer to temporarily prevent the transmission of that customer's Directory Number and/or Directory Name and thus control their availability to the called party.

The transmission of the Directory Number and/or Directory Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and/or Directory Name.

Calling Number Delivery Blocking - Per Call is provided subject to availability of facilities where technically feasible. The Company assumes no liability for and will be held harmless from any incompatibility of the customer's CPE to perform satisfactorily with the network feature described herein.

CALLING NUMBER DELIVERY BLOCKING - PERMANENT

This feature enables certain customers as described in A112 to prevent the transmission of their Directory Number and/or Directory Name on all outgoing calls placed from the customer's line. Calling Number Delivery Blocking - Permanent is in operation on a continuous basis.

If the preassigned access code for Calling Number Delivery Unblocking is dialed on a line that is provisioned with Calling Number Delivery Blocking - Permanent, the Directory Number and/or Directory Name will be delivered.

CATEGORY CODES

See Access Code Restriction Group and Network Class of Service.

CODE CALLING ANSWER

This feature allows the code call signals to be answered from any station within the Digital ESSX service group via dial access code.

CODE RESTRICTION ARRANGEMENTS

A Code Restriction Arrangement automatically denies a portion or all main station lines of a Digital ESSX service system direct outward dialing access to one or more three-digit codes within the local calling area in which the system is located. Code restriction provides a distinctive tone to indicate that access is not permitted on call attempts.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

CONFERENCE CALLING - STATION

Conference Calling - Station allows a main station user to establish a conference connection of up to six conferees (including the originator) without the aid of the attendant.

CONSULTATION HOLD-ALL CALLS

Consultation Hold-All Calls allows a main station user to place a call on hold by depressing the switchhook, at which time dial tone is returned. The station user may then proceed to establish connection with another internal station or outside party, and after speaking with the "consulted" party, the station user may

- return to the call initially held,
- depress the switchhook thereby effecting Add-On Conference, or
- hang up and effect transfer of the initial call to the consulted party.

CUSTOMER GROUP

A Customer Group is that portion of the memory storage in the serving central office that contains the features for a specific system.

CUSTOMER GROUP TRANSPARENCY

Allows customers with separate entities to establish a separate Digital ESSX service for each of their entities but still have a certain degree of feature transparency between them. Digital ESSX service within the same DMS-100 may be grouped by translations into a "Family".

DATA CALL PROTECTION

Data Call Protection prevents calls from being interrupted by call waiting tones, testing or busy verification attempts. Data Call Protection is not customer changeable and lines assigned this feature may not utilize call transfer or conference capabilities.

DIAL CODE SENDING (CODE CALLING) FEATURE

Code Calling provides dial access to customer-premises located code calling equipment by main station line, attendant access and tie lines of a Digital ESSX service system. The dialed two or three digit code activates signaling devices on the customer's premises to produce a coded signal corresponding to the dialed code. The called party, upon recognition of the signal, automatically connected to the calling party, upon recognition of the signal, is automatically connected to the calling party by dialing a special code from any main station line in the system.

DIAL "0" CALLING

Dial "0" Calling permits a main station line user to reach an attendant position by dialing the single digit "0".

DIALTONE PROVISIONING (Dialtone II)

This feature will provide DECAS customers with the capability of requesting new service on stations through DECAS as well as the ability to disconnect service on existing stations.

Two Options are available.

Option 1 - allows the customer to subscribe to reserved loop facilities as described in A112.28.13 of this Section.

Option 2 - the DECAS customer has no reserved facilities and places an order via DECAS for new service.

DIAL THRU ATTENDANT (DTA)

The DTA feature allows main station line users to complete dialing on other than station-to-station calls after the attendant selects the trunk facility.

DIGITAL ESSX CUSTOMER ADMINISTRATION SERVICE (DECAS)

Provides the customer with the capability to activate/deactivate specific optional features, change service options, and display and verify the features and service options on a main station line.

DIGITAL ESSX SERVICE SYSTEM

A Digital ESSX service system consists of all stations of a customer with the same primary directory listing which are served by the same central office equipment.

EFFECTIVE: August 17, 2006

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

DIGITAL FAMILY

A number of Digital ESSX services with a certain degree of dialing and feature operation transparency existing between them.

DIRECT CONNECT NUMBER/AUTOMATIC LINE

A Direct Connect Number is a station specially programmed to dial a specific internal station number or "0" for the attendant when the station user goes off-hook.

DIRECT INWARD DIALING

Incoming calls from the exchange or toll network may be dialed directly to any called main station line served by the Digital ESSX service main switching equipment without the help of an attendant.

DIRECT OUTWARD DIALING

Outward calls may be dialed directly from any unrestricted main station line served by the Digital ESSX service main switching equipment without the help of an attendant.

DIRECTED CALL PICKUP - BARGE-IN

This feature allows calls directed to a main station line with the Directed Call Pickup feature to be answered by any main station line in the group. This is accomplished by dialing an access code followed by the extension number of the main station line to which the call was directed. If the main station line has already answered, a three-way connection is established.

DIRECTED CALL PICK UP - BARGE-IN EXEMPT

Directed Call Pick-up with Barge-in Exempt allows a called station to be exempt from Directed Call Pick-up with Barge-in.

DIRECTED CALL PICK-UP - BARGE-IN TERMINATING

This feature must be assigned to the main station line that is being answered via Directed Call Pick-Up - Barge-In.

DIRECTED CALL PICK-UP - NONBARGE-IN

The Directed Call Pick-up - Nonbarge-In feature allows a Digital ESSX service main station line user to pick up an unanswered call to another main station line equipped with Directed Call Pickup by dialing a special answer code plus the number of the main station line being rung. If the main station line being rung has already answered, busy tone will be returned to the main station line user dialing the answer code and station line number.

DIRECTED CALL PICK-UP - NONBARGE-IN EXEMPT

Directed Call Pick-up - Nonbarge-In Exempt allows a called station to be exempt from Directed Call Pick-up - Nonbarge-In.

DIRECTED CALL PICK-UP - NONBARGE-IN ORIGINATING

This feature enables a Digital ESSX service station user to answer calls directed to station lines in any pickup group in the same Digital ESSX service group. If a connection is established (prior to the pickup code being dialed,) the station dialing the code will receive busy treatment.

DIRECTED CALL PICK-UP - NONBARGE-IN TERMINATING

This feature must be assigned to the main station line that is being answered via Directed Call Pickup - Non Barge-In.

DIRECTORY NUMBER HUNTING

See Station Hunting Arrangements.

DISTINCTIVE RINGING

Distinctive ringing is furnished to indicate the source of calls to idle main station lines.

DISTRIBUTED LINE HUNTING

See Station Hunting Arrangements.

ELECTRONIC BUSINESS SET (EBS) FEATURES

Central Office features associated with one or more Electronic Business Sets used in conjunction with Digital ESSX service.

EXECUTIVE BUSY OVERRIDE (EBO)

EBO allows a station user to gain access to a busy station within the same system. An EBO warning tone is transmitted to the called station and then a 3-way call is established.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

EXECUTIVE BUSY OVERRIDE EXEMPT

Executive Busy Override Exempt allows a called station to be exempt from Executive Busy Override.

EXECUTIVE CONFERENCE

Permits a Digital ESSX service customer to have access to a dialable conference with a maximum of 150 conferees.

FACILITY GROUPS (FG)

FG provides simulated trunk group access for miscellaneous line terminations. A FG may be one-way (incoming or outgoing) or 2-way operational.

FIXED NIGHT SERVICE

This feature provides for the routing arrangements to be made by the Company and may be changed only by service order.

GROUP BUSY INDICATION

This feature has the capability to let the attendant know via a lamp on the console that all the facilities in that particular facility group are busy.

GROUP INTERCOM

Allows abbreviated dialing between stations in the same group all of which are equipped with the Group Intercom feature.

HOSPITAL COMMUNICATIONS FEATURES

Do not disturb (DND) permits stations to be denied from receiving Direct Inward Dialing (DID) and station-to-station calls.

Do Not Disturb (DND)

Permits stations to be denied from receiving Direct Inward Dialing (DID) and station-to-station calls.

HOT LINE STATION

See Direct Connect Number.

INTERCEPT

Intrasystem and incoming network calls dialed to unassigned numbers are routed to recorded announcements.

INTERCOM

Provides station to station calling for the customer within the subscriber's system without utilizing Network Access Registers, but does require additional central office equipment.

INTERPOSITION TRANSFERS

This feature allows an attendant to call and speak to another attendant and to transfer a call to another attendant.

LAST NUMBER REDIAL

Allows a station user the ability to redial the last number called by depressing one or two keys rather than the entire number.

LOUDSPEAKER PAGING ANSWER

Provides that loudspeaker paging may be answered from any station within the business customer group via a dialed access code.

MAIN STATION EXTENSION SERVICE

Main station extension service consists of an additional station or stations on the same station circuit as the associated main station.

MAIN STATION LINE

A Main station line connects customer provided terminal equipment to the serving central office.

MAKE BUSY ARRANGEMENTS

This is a key activated feature which permits a line associated with a Multi Line Hunt Group (MLHG) to busy their position to prevent incoming calls from being directed to a vacant position on a per line basis. In a group arrangement this key activated feature allows a user to busy out all positions associated with a MLHG.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

MAKE LINE BUSY

Provides the individual station user with the option of making the line or directory number appear busy/unavailable to incoming calls. The All Calls feature enables the user to make the line appear busy to all types of incoming calls. The Intragroup feature makes the line appear busy to intragroup calls with external calls not blocked.

MISCELLANEOUS LINE TERMINATIONS

Miscellaneous lines are those lines not basic to the system; such as Tie Lines, WATS, Foreign Exchange, CCSA, etc., which require Digital ESSX service switching capabilities in order to function with Digital ESSX service.

MULTI-LINE HUNT GROUP (BASIC)

See Station Hunting Arrangements.

MULTIPLE APPEARANCE DIRECTORY NUMBER (MADN) RING FORWARD

Permits a Digital ESSX service station user to forward the ringing on their MADN to another appearance of the same MADN. This forwarding can take place automatically or upon the manual activation of a button on an Electronic Business Set.

MULTIPLE CALL ARRANGEMENT

Allows each group member to be simultaneously active on a call with a different external party.

MUSIC/ANNOUNCEMENT ON HOLD

Allows the Digital ESSX service to provide music and/or announcement to a calling line that has been placed on certain types of hold or has entered a queue for certain Digital ESSX service features. It may be used for Attendant Camp-On, Attendant Hold, Call Hold, Call Park, and Permanent Hold I.

NETWORK ACCESS LIMITER

The Network Access Limiter limits switched non-intercom exchange access in a Digital ESSX service System equivalent to that of an individual local exchange line.

NETWORK ACCESS REGISTER

The Network Access Register provides for exchange and Long Distance Message network calling to and from main stations and attendant positions of a Digital ESSX service system.

NETWORK CLASS OF SERVICE

This feature provides the capability to allow or deny types of calls to a station on both an incoming and an outgoing basis.

OFF-HOOK QUEUE

See Queuing.

OPTIONAL DIAL CUT THRU ARRANGEMENT

Provides for the switching of calls which either originate within the Digital ESSX service and terminate in distant systems over certain miscellaneous lines and/or switch tandem through the system between certain miscellaneous lines where the digits dialed by the called party are transmitted to the distant end directly as they are dialed by the calling party.

OVERFLOW MESSAGE INFORMATION

This feature allows the system to increment an overflow message register located on the subscriber premises when calls to a MLHG encounter a busy group.

PERMANENT HOLD

See Call Hold II.

PERSONAL CALL SCREENING

Allows the calls that have been forwarded via Call Forwarding - Variable to be transferred back to any base station in the call forwarding chain.

POSITION BUSY

A key activated feature that allows an attendant to busy out their position to prevent incoming calls from being directed to that particular attendant position.

PREFERENTIAL HUNT

See Station Hunting Arrangements.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

PRIVACY ENABLE

Privacy Enable is used to exclude other members of a MADN group from joining a call.

PRIVACY RELEASE

Privacy Release is used to allow other members of a MADN group to join a call.

PROGRAMMABLE LINE SELECTION

An Electronic Business Set option that provides the ability for originating and/or terminating line selection.

QUERY BUSY STATION

Permits a designated Electronic Business Set to query the busy status of other Digital ESSX service stations. Digital ESSX service stations to be monitored are assigned a key on the EBS. Depression of the key will provide a visual and audible indication of the busy status of the queried station.

QUEUING

Queuing permits station users to be placed in a queue whenever the first choice route for completing a particular call is already in use. Two queuing arrangements are available.

1. A Call-back Queue (CBQ), in which case the calling station goes on-hook and is called back when a facility becomes available, and
2. An Off-Hook Queue (OHQ), in which case the calling station remains off-hook and is held in queue until a facility becomes available.

REPEAT DIALING

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed.

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty minutes, both the calling and called lines are checked periodically for availability to complete the call. If during the queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed.

RING AGAIN

See Automatic Callback.

SHORT HUNT - BUSINESS SET

Provides the capability for incoming calls to hunt over a set of directory number appearances on a Business Set in search of an idle directory number on which to terminate.

SIMPLIFIED MESSAGE DESK INTERFACE (SMDI)

Simplified Message Desk Interface provides customers the ability to route called number identification to a centralized point using a customer provided voice/text messaging system. A Digital ESSX service station user may have incoming calls forwarded to that centralized point when that person's station is busy or when he is not available to answer the calls. Through the use of an I/O (input/output) channel, call information is transported from the central office to the centralized point at the customer's premises. This information includes the number called, the reason for the forwarding of the call (busy or don't answer), and for intra-central office calls the calling number. That centralized point, using an optional capability, may activate a signal to the called station to give an alert that a message is waiting.

SINGLE CALL ARRANGEMENT

Allows each Multiple Appearance Directory Number group only one active call with an external party.

SPEED CALLING

Lets the main station line user place calls to a list of frequently called telephone numbers by dialing fewer digits than the complete directory number.

STATION DIRECT INWARD DIALING RESTRICTION

Permits the customer to have selected main station lines restricted from receiving Direct In-Dialed calls from a toll network. Direct In-Dial call attempts will be routed to the attendant.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

STATION HUNTING ARRANGEMENTS

Directory Number Hunt, Distributed Line Hunt, Uniform Call Distribution and Preferential Hunt are optional main station line hunt arrangements for searching over and distributing calls in a hunt group. These hunts are extensions of the basic multiline hunting feature included in basic service.

1. Directory Number Hunting (DNH)

Each line in a DNH group has its own unique directory number. The hunt group is accessed by dialing any number in the hunt group. The number of lines hunted depends on the hunting option (i.e. circular or sequential) assigned to the DNH group.

- a. Circular hunt permits a complete hunt over all the terminals in the group starting and ending with the dialed number.
- b. Sequential hunting series starts at the number dialed and ends at the last number in the group.

2. Distributed Line Hunting (DLH)

With DLH, hunting starts after the first idle line found by the previous hunt and continues until the starting point is reached. DLH provides for an equal distribution of calls.

3. Multi-Line Hunt Group (Basic)

When a call is originated to a busy station line in a basic multi-line hunting group, the calls hunt once in a pre-arranged order or an idle station through all remaining station lines in that group.

4. Preferential Hunt

Preference Hunt permits a prehunt over a subset or preferential group of main station lines before hunting through the entire Multiline hunt group. The hunt through the group may be a regular or circular hunt. Each main station line may have its own preferential group or list.

5. Series Non-Sequential

When a call is originated to a busy station in a series non-sequential hunting group, the call hunts for an idle station in that group in a prearranged numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

6. Series Sequential

When a call is originated to a busy station in a series sequential station hunting group, the call hunts for an idle station in that group in an ascending numerical sequence. A number may not hunt to any number which would hunt back to the original number dialed. Each line can hunt to and/or be hunted from only one number.

7. Uniform Call Distribution

Uniform Call Distribution provides an even distribution of incoming network and intercom calls among the individual main station lines of a hunt group and includes Circular Hunt.

- a. Call Queuing is an option that may be added to the UCD arrangement. Queuing permits calls, in excess of main station lines in a UCD group, to be held in the central office and distributed in their order of arrival to main station lines in the UCD group as the main station lines become available.

STATION IDENTIFICATION

An itemized list of toll calls is shown on the toll bill with the number of each originating main station line.

STATION MESSAGE DETAIL RECORDING

Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, or originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.3 Definitions (Cont'd)

STATION MESSAGE DETAIL RECORDING - Regional Accounting Office (RAO)

1. General

- a. Station Message Detail Recording (SMDR) - RAO is an arrangement to provide a record by main station line number of originating intercity traffic routing over dial type tie lines, WATS, CCSA, Interexchange Carrier access lines and/or the toll network.
- b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording - RAO.

STATION MESSAGE WAITING

Allows station users to activate message waiting against another station. A Stuttered Dial Tone (for stations without message waiting lamps) or Message Waiting Lamp may be used to provide indication of a waiting message. A designated code is used to access the station user who left the message.

STATION NUMBER CORRELATION

Permits main station line numbers to be the same as numeric room numbers, where facilities permit.

STATION-TO-STATION CALLING

Calls may be dialed directly to completion between any two main station lines of a Digital ESSX service system.

SUBSIDIARY SYSTEM ARRANGEMENTS

A Subsidiary System of a Digital ESSX service system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's Digital ESSX service system and which is connected by tie trunks to that system.

A Subsidiary System Arrangement provides station numbers, which are in sequence with the main station line numbers of the customer's Digital ESSX service system to the stations of one or more subsidiary systems.

THREE-WAY CONFERENCE

Allows a station user to add a third party to an existing two-party conversation.

TOLL DIVERSION

Toll Diversion automatically denies a Digital ESSX service station direct dialing access to the long distance message network. Station users attempting to place such calls are diverted to the attendant.

TOLL RESTRICTION

Toll Restriction automatically denies a Digital ESSX service station direct dialing access to the long distance message network. Station users attempting to place such calls will receive an announcement to indicate that access is denied.

TRUNK EQUIPMENT

See Miscellaneous Line Termination.

TRUNK VERIFICATION FROM STATION

Permits a designated Digital ESSX service station to verify the condition of the trunks in the Digital ESSX service by dialing a predefined access code, the trunk group access code and the member number of the trunk to be verified.

UNIFORM CALL DISTRIBUTION (UCD)

See Station Hunting Arrangements.

WILD CARD ACCESS

Allows the console attendant to program the "Wild Card Key" on a console to activate one of many different features offered out of the Digital switch.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.4 Intercept Of Calls To Unassigned Station Lines

- A. Incoming calls from the exchange and toll networks to unassigned station lines are intercepted by the same standard central office recorded announcement equipment used to intercept such calls for exchange services. The announcement provided states that the number called is not in service.
- B. Intercommunicating calls to unassigned station lines are intercepted by central office recorded announcement equipment which is common to all Digital ESSX service systems served out of the same office. The announcement states that the number is not in service.

(C)

A112.28.5 Conversion

- A. Replacement of Central Office Equipment
 1. The rates and charges in this and other Guidebook sections for ESSX service and the associated features and services will continue to apply to subscribers served at a location that is converted through no desire or fault of the subscriber to Digital central office equipment. Should one of the aforementioned existing subscribers wish to utilize features and/or services specific to the Digital equipment, the billing for that customer's system will be converted to charges appropriate for the central office equipment providing his service.
- B. Conversion of ESSX service¹ to Digital ESSX service
 1. When a customer whose present ESSX service elects to convert to Digital ESSX service, installation and service connection charges do not apply to Common Equipment, in-service station lines, terminating arrangements, toll diversion and toll restriction equipped station lines, conference arrangements and other optional features and/or services provided each of the following conditions are met. ESSX service - 1/Multiline termination charges will not apply if an ESSX service - 1/Multiline subscriber converting to Digital ESSX service selects a Variable Term Payment Period option of length equal to or greater than the number of months remaining in the subscriber's existing ESSX service - 1/Multiline contract period.
 - a. The customer's system must continue to be served by the same central office location;
 - b. there must be no interruption of service, and
 - c. there are no moves, changes or additions in existing station lines, terminating arrangements, or optional features requested by the customer.
 2. ESSX services converting to Digital ESSX service must elect one of the following options.
 - One Month Payment Plan
 - Variable Term Payment Plan of 84 months
 3. Where the customer elects a Variable Term Payment Plan of 84 months and wishes to add to his system the following shall apply.
 - a. Such additions shall be made within a scheduled period after the conversion at the rates and charges in this and other Guidebook sections for Digital ESSX service and the associated Features and Services.
 4. Where an ESSX service customer converts to Digital ESSX service, Common Equipment installation charges shall not apply if the same customer category, (VS, 200, 600, or XL) is maintained. If the ESSX service customer has a current Variable Term Payment Plan, a Digital ESSX service Variable Term Payment Plan must be selected that is equal to or longer than the unexpired portion of the current plan. Termination charges will not apply to an ESSX service system converting to Digital ESSX service under the aforementioned conditions.
 5. Where an ESSX service customer converts to Digital ESSX service and changes customer category (VS, 200, 600 or XL), the Common Equipment installation charge applied shall be equal to the appropriate Digital ESSX service Common Equipment installation charge of the category to which the customer is going minus the ESSX service installation charge of the category from which the customer is coming.
 6. Where an ESSX service customer converts to Digital ESSX service and downgrades from XL to 600, for example, no Common Equipment installation charge shall apply. Termination charges will apply as specified in this Guidebook.

Note 1: Denotes ESSX service - VS, 200, 600, or XL.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.5 Conversion (Cont'd)

B. Conversion of ESSX service¹ to Digital ESSX service (Cont'd)

7. Where a Digital ESSX service customer converts to ESSX service such conversions shall also be made in accordance with A112.28.5.B.3. through 6.

A112.28.6 Payment Schedules

A. General

1. Digital ESSX service is offered as follows.
 - a. The payment options are:
 - Month to Month Plan
 - 84 Month Variable Term Payment Plan
 - b. Items that may be placed under the Variable Term Payment Plan:
(*Terms and conditions* concerning the Variable Term Payment Plan are specified in Section A2.) (T)
 - Main Station Lines
 - Extension Lines
 - Line Feature Options
 - Optional Service Features
 - System Common Equipment
 - Terminating Arrangements
2. The monthly rate for Digital ESSX service is dependent upon the contract duration selected by the customer.
3. The monthly rate for Digital ESSX service under the Variable Term Payment Plan for the period of 84 months is subject to Company initiated rate increases of not more than 6 percent in any annual period and not more than the following amounts over the entire contract periods.

Contract Period	Maximum Percent Increase Over Total Contract Period
84 Months	10

4. Digital ESSX service - VS or 200 will be limited to subscribers having 4 - 200 main station lines.
 - a. A Digital ESSX service - VS or 200 subscriber may have an 84 month contract periods for any portion or all of the total system size with the remainder to be under the one month payment option.
 - (1) Group A and B line features may be added under any of the payment options.
 - (2) Attendant Features or Optional Service Features may be added under any of the payment plans subject to the above features not being added for a contract period of shorter duration than the contract period associated with the Digital ESSX service common equipment.
 - b. A Digital ESSX service - VS subscriber may add station lines up to 30 lines and:
 - (1) Add those lines and associated Group "A" line features at the one month rate specified for Digital ESSX service - VS or,
 - (2) Resubscribe the entire system under the payment periods as offered for Digital ESSX service - 200. *Terms and conditions* concerning the Term Payment Plan are specified in Section A2. (T)
 - (3) There will be no termination liability.

Note 1: Denotes ESSX service - VS, 200, 600, or XL.

A112.28 Digital ESSX Service (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

A. General (Cont'd)

4. Digital ESSX service - VS or 200 will be limited to subscribers having 4 - 200 main station lines. (Cont'd)
 - c. A Digital ESSX service - 200 subscriber may add station lines up to 220 Lines and:
 - (1) Add those lines and associated Group A and B Line features at the one month rate specified for Digital ESSX service - 200, or
 - (2) Resubscribe the entire system under the contract periods as offered for Digital ESSX service - 600. (*Terms and conditions* concerning the Variable Term Payment Plan are specified in Section A2.)
 - (3) There will be no termination liability.
 - (4) Digital ESSX service - 200 subscribers will be liable for the difference in the Common Equipment installation charges between Digital ESSX service - 200 and Digital ESSX service - 600.
5. Digital ESSX service - 600 will be limited to subscribers with 201-600 main station lines.
 - a. A Digital ESSX service - 600 subscriber may have an 84 month contract period for any portion or all the total system size with the remainder to be under the one month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.
 - (2) Attendant Features or Optional Service Features may be added under any of the payment plans subject to the preceding features not being added for a contract period of shorter duration than the contract period associated with the Digital ESSX service common equipment.
 - b. A Digital ESSX service - 600 subscriber may add station lines up to 660 lines and:
 - (1) Add those lines and associated Group A and B features at the one month rate specified for Digital ESSX service - 600, or
 - (2) Resubscribe the entire system under the contract periods as offered for Digital ESSX service - XL.
 - (3) There will be no termination liability.
 - (4) Digital ESSX service - 600 subscribers will be liable for the difference in the Common Equipment installation charges between Digital ESSX service - 600 and Digital ESSX service - XL.
6. Digital ESSX service - XL will be limited to subscribers with more than 600 main station lines.
 - a. A Digital ESSX service - XL subscriber may have an 84 month contract period for any portion or all of his total system size with the remainder to be under the one month payment option.
 - (1) Group A and B line features may be added under any of the payment plan options.
 - (2) Attendant Features or Optional Service Features may be added under any of the payment plans subject to the preceding features not being added for a contract period of shorter duration than the remaining contract period associated with the Digital ESSX service common equipment.

A112.28.6 Payment Schedules (Cont'd)

B. Expiration of Contract Period

1. Digital ESSX service - VS, 200, 600 and XL customers must upon the expiration of their contract
 - a. select a new contract period as offered in the current *guidebook*, or
 - b. revert to the current *guidebook* rates for the one month payment option.
2. A Digital ESSX service - VS, 200, 600 or XL customer may at any time during his selected contract period recast for an equal or longer contract period at the current *guidebook* rates subject to the following conditions.
 - a. No credit will be given for payments made during the formerly selected period. Nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the billing date following the date the new payment period is requested.
 - c. No termination charge applies for the former payment period.
 - d. A Secondary Service Charge will apply.
3. A Digital ESSX service - VS, 200, 600 or XL customer may at any time during his selected contract period recast for a contract period, shorter in length than the time remaining in the existing service agreement, subject to the following conditions.
 - a. No credit will be given for payments made during the formerly selected period. However, nonrecurring charges will not be reapplied.
 - b. The new payment period begins with the date requested.
 - c. A termination charge applies to the former payment period.
 - d. A Secondary Service Charge will apply.

C. Disconnects

1. When facilities are disconnected from a system for which the current payment period is longer than one month, the expiration date of the remaining service will not be affected.
2. Facilities disconnected from a system prior to the expiration date of the payment period for such service will require termination charges for premature disconnection if applicable.

D. Supersedure

Service may be transferred to a new customer at the same location upon prior written concurrence by the new customer. The new customer will be subject to all provisions currently in effect for the previous customer. *Terms and conditions* concerning transfer of service between subscribers as stated in Section A2. also apply under the Variable Term Payment Plan.

E. Deferred Payment

1. Payment of nonrecurring charges for Digital ESSX service may be deferred over the length of the customer's Variable Term Payment Plan or a shorter period (in annual increments) subject to the conditions specified in this paragraph.
 - a. The charges to be deferred must be among the following types:
 - Installation
 - Service Establishment
 - b. The customer must select a payment period longer than one month.
 - c. The total amount of nonrecurring charges as defined in A112.28.6.E.1.a. may be deferred.
 - d. The minimum amount deferrable per Digital ESSX service System is \$1650.00.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

E. Deferred Payment (Cont'd)

1. (Cont'd)
 - e. Interest on deferred amounts will be calculated at the rate set forth in the deferred payment agreement executed by the customer. The interest rate to be charged on deferred payments will be revised periodically by the Company. If, in the judgment of the Company, the maximum interest rate allowed by law is insufficient to cover the costs of providing the deferred payment option, the Company will suspend the availability of said option until such time as the costs of providing said option can be recovered through the application of a lawful interest rate. Suspension of the deferred payment option will not affect customers who have executed a deferred payment agreement prior to the effective date of such suspension.
 - f. The deferred charges (including calculated interest) will be prorated on a monthly basis over the selected deferral period length.
 - g. All deferred charges must be paid in full when the customer
 - (1) selects a payment period with an expiration date prior to the expiration date of the deferral period,
 - (2) disconnects service, for the system, prior to expiration of the selected deferral period, or
 - (3) fails to pay a monthly amount within 30 days of its due date.
 - h. The customer may prepay only the total outstanding deferred charges at any time during the selected deferral period. The customer will be given a credit for the amount of unearned interest.

F. Prepayment

1. For payment periods longer than one month, the customer may prepay the total outstanding recurring monthly rates. The prepayment of monthly rates in no way constitutes a purchase and the Company retains full ownership of all services covered by the prepayment. The following conditions apply.
 - a. Customers who prepay six months or more will have an allowance applied.
 - b. Monthly rates for all services covered by a single Letter of Election must be prepaid. Monthly rates must be prepaid for services added subsequently and placed on the same Letter of Election (i.e., customer-elected coterminous option) with a prepaid system.
 - c. Customers who change the length of a prepaid payment period will be credited any unused portion of the prepayment, subject to termination charges as specified in A112.28.6.G.
 - d. Customers who prematurely disconnect will have termination charged deducted from the prepaid amount and any balance credited to their bill.

G. Termination of Liability

The Termination Liability applicable to Digital ESSX service is dependent upon the payment period selected by the customer. Termination charges for the optional payment periods are as follows.

1. One Month Payment Plan

- a. Digital ESSX service - VS and 200 Customers-No Termination Liability
- b. Digital ESSX service - 600 Customers
 - (1) Within 12 months of date of installation - If a customer's Main Station Line count falls below 75 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation-No termination liability.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

G. Termination of Liability (Cont'd)

1. One Month Payment Plan (Cont'd)
 - c. Digital ESSX service - XL Customers
 - (1) Within 12 months of date of installation - If a customer's main station line count falls below 90 percent of the total main station lines initially installed, they will be charged 90 percent of the amount due for the period remaining up to 12 months from the date of installation for each line disconnected thereafter.
 - (2) Beyond 12 months of date of installation - No termination liability.
2. Variable Term Payment Plan Option
 - a. Digital ESSX service - VS, 200, 600 and XL customers that contract a portion of their system under the Variable Term Payment Plan Option are subject to the following liability charges.
 - (1) Main Station Lines under contract - 90 percent of the remaining amount due for each main station line disconnected after the customer's total main station line count falls below 90 percent of the total main station lines initially installed or of the annually adjusted installed total (whichever is higher). The annually adjusted total is determined every 12 months from date of original installation.
 - (2) All non-contracted items - No termination liability.
 - (3) Termination Liability Charges are not applicable when the customer's ESSX service is moved provided that such move meets the criteria set forth in A112.28.6.I. following.
3. Cancellation charges will only apply to subscribers under the Term Payment Plan.
4. Cancellation charges will apply only to the total removal of the subscriber's Digital ESSX service system.
5. Cancellation charges will be applied where service provided under a Term Payment Plan is removed prior to the expiration of the subscribers Term Payment Plan.
6. The customer who elects to disconnect their Digital ESSX service prior to the end of their Term Payment Plan period will pay the lower of the Cancellation or Termination Liability charge. To determine which charge is applicable, the Company will calculate the Termination Liability charge and compare this amount to the appropriate Cancellation Charge (depending on the customer's size and remaining contract duration). The customer will be billed the lower of the two charges.
7. The following charges are applied when a total disconnect of a Digital ESSX service system provided under a Rate Stability Plan occurs prior to the expiration of the subscribers Rate Stability Plan and the Company determines that the Cancellation Charge is lower than the Termination Liability charge.
 - a. Cancellation Charges
 - n(1) Per Very Small or Small System

	Nonrecurring Charge	NRCS1
(a) Disconnect in months 1-48	\$3,000	NRCS1
(b) Disconnect in month 49 and thereafter	2,000	NRCS2
 - (2) Per Medium or Large System

	NRCM1	NRCM2
(a) Disconnect in months 1-48	10,000	NRCM1
(b) Disconnect in month 49 and thereafter	7,500	NRCM2

	Nonrecurring Charge	NRCS1
(a) Disconnect in months 1-48	\$3,000	NRCS1
(b) Disconnect in month 49 and thereafter	2,000	NRCS2
(2) Per Medium or Large System		
(a) Disconnect in months 1-48	10,000	NRCM1
(b) Disconnect in month 49 and thereafter	7,500	NRCM2

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.6 Payment Schedules (Cont'd)

G. Termination of Liability (Cont'd)

- 8. When a subscriber's Digital ESSX service under a Term Payment Plan is disconnected prior to the expiration of the selected service period as a result of a subscriber requested change to one of the separate **guidebook** services listed following, termination or cancellation charges will not apply when:
 - a. the completed service period is 12 months, and
 - b. the service period of the new arrangement for the separate **guidebook** service equals or exceeds the remaining service period of the disconnected arrangement, and
 - c. the service orders to install the separate **guidebook** service and disconnect the existing service are related together and there is no lapse in service between installation of the separate **guidebook** service and disconnection of the existing service, and
 - d. the service orders are for the same subscriber at the same location.

For the purposes of determining the separate **guidebook** services to which the preceding conditions apply, the following list will be used:

- MegaLink Service
- MegaLink Channel Service
- MegaLink ISDN Service
- LightGate Service

- H. The Company reserves the option to provide Digital ESSX service at any size and distance from the serving central office under a Contract Service Arrangement basis under the **terms and conditions** in Section A5. if, in the Company's judgment, there is reasonable potential for uneconomic bypass or due to competitive alternatives, the market price for the service is above our cost to provide this customer's service but below the **guidebook** rate.

I. Moves of Service

An ESSX service subscriber may move a system under their Term Payment Plan within the same jurisdiction (the locations in the state within which **the Company** is authorized to operate) and will not incur termination charges if central office and existing loops of the system to be moved, are reusable during the current engineering interval. Installation charges will apply at the new location as appropriate.

J. Credits and Surcharges

A surcharge that is equivalent to the charge for access to an interexchange carrier over a PBX trunk will apply to each Network Access Register. For each ESSX service line a credit will be applied which, when combined with the preceding surcharge and with charges applied to ESSX service lines for access to interexchange carriers, will provide a monthly net billing equal to the interexchange carrier access charge for a PBX trunk multiplied by the number of the subscriber's Network Access Registers.

A112.28.7 Common Service Items

A. **Terms and Conditions**

1. Station Lines

- a. The rates and charges specified herein for main station lines provide for main station line components. The main station line consists of all facilities including intercommunication and outside plant facilities from the system dial switching equipment to the Network Interface of the main station line.
- b. The rates and charges specified herein for main station lines are applicable to each main station location to which a customer-provided instrument can be connected.
- c. Rates for the main station lines of Digital ESSX service - VS, 200, 600 and XL customers will be based on the following criteria:
 - Main Station Group Size
 - Distance from the Serving Central Office
 - Payment Option Selected

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.7 Common Service Items (Cont'd)

A. *Terms and Conditions* (Cont'd)

- 1. Station Lines (Cont'd)
 - d. The total main station group size will consist of main station lines and attendant access lines for all locations served by the same Digital ESSX service system.
 - e. The distance band will be based on airline mileage from the serving central office to the Network Interface Location at the customer's premises.
 - (1) Where main stations are in a foreign exchange (FX) or a foreign central (FCO) office area the distance band will be calculated from the FX or the FCO to the Network Interface Location.
 - (2) Systems with more than one location served by the same Digital ESSX service control group will calculate the distance band per location.
 - f. In A Different Central Office Serving Area
 - (1) The rate of Digital ESSX service in a FX or FCO area is the monthly rate for the Digital ESSX service desired, plus a FX or FCO mileage charge between the central offices involved. When a wire center serves a portion of two different exchanges or the whole of one exchange and a portion of the other, the rates for intraexchange interoffice channel as stated in A9.2 apply between the wire center in one exchange and the wire center(s) in the other exchange whose serving areas are contiguous, provided facilities for the interoffice channel are routed in this manner. Otherwise, the rates for interexchange service as stated in A9.1 apply to channels provided between the two exchanges. This applies to both Digital ESSX service stations terminated in a foreign exchange or foreign central office area and Digital ESSX service extensions into a foreign exchange or foreign central office area.
 - (2) When Digital ESSX service main station lines are connected by facilities which are routed between two or more central offices in the same exchange, the foreign central office mileage charge is calculated separately on an airline basis between the ESS central office from which the Digital ESSX service system is served and the central office from which exchange service normally would be rendered.
- 2. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis under Section A5. for main station lines exceeding five (5) airline miles from the serving office. (T)
- 3. Exchange Access
 - a. Exchange Access is provided by means of Network Access Registers.
 - b. Presubscription of a Carrier of Preference is specified in the Interstate Access Service Tariff.
- 4. Nonrecurring Charges

The following nonrecurring charges for service are in addition to any applicable service connection, move, change and installation charges provided for in other sections of this *Guidebook*. (T)

 - a. Service Establishment Charges
 - (1) These charges apply as specified, when a service feature is added or changed. These charges apply in addition to other applicable nonrecurring charges.
 - b. Installation Charge
 - (1) Installation charges are in addition to other appropriate nonrecurring charges for the service. For a change or a rearrangement in a specific service or feature element, the installation charge specified for that element will be applicable unless otherwise specified.
 - c. Service Connection Charges
 - (1) Service Charges as specified for business service in Section A4. are applicable for each main station line, console access loop, etc.
- 5. Main Station Line Terminated as a Trunk
 - a. Where a Digital ESSX service main station line is terminated as a trunk in customer provided equipment the appropriate recurring charge (A112.28.7.B.5.) will apply in addition to the appropriate main station line rate.
- 6. Subsequent Training
 - a. After the initial installation of the subscriber's system, subsequent training will be provided at the charges indicated in A12.20.8.D. (T)

B. Features (Cont'd)

1. General (Cont'd)
 - c. Digital ESSX service - VS and 200 customers may add features on a per system basis from A Line Feature-Individual at the rates shown in A112.28.8.B.2.c. if a Variable Term Payment Plan of 36, 60, or 84 months is selected. If a feature is selected on a per system basis, then any or all lines may be equipped with that feature at the system recurring rate. The installation charge will apply per line.
 - d. Digital ESSX service - VS and 200 customers choosing the one month payment plan may add features from A Line Features-Individual at the rates shown in A112.28.8.B.2.c. These features will be offered on a per line basis only.
 - e. B Line Features will be offered to Digital ESSX service - VS and 200 customers on a per line basis at rates shown in A112.28.8.B.3.
 - f. The features are offered where facilities permit. This will be dependent on the serving central office.
 - g. All features may not be offered from all central offices.
 - h. Feature operation may vary based on the serving central office.

2. Line Features - Group A

Feature availability and operation may vary according to type of office serving the subscriber.

- a. The A Line Features - will be offered grouped per line at the rates shown in A112.28.8.B.2.b.(1).

- Three Way Calling, Consultation Hold, Call Transfer
- Call Forwarding Variable
- Call Forwarding Busy Line
- Call Forwarding Don't Answer
- Call Park I
- Call Pick-up
- Call Waiting Terminating
- Call Waiting Originating
- Call Hold II/Permanent Hold
- Call Hold
- Speed Calling Short

- b. Rates and Charges¹

The following are the contractual rates per line for the A Line features grouped.

Per system installation charges in A112.28.8.B.2.c. also apply.

G. Station Message Detail Recording Via Revenue Accounting Office (RAO)

1. General

a. Station Message Detail Recording (SMDR)-RAO is an arrangement to provide a record, by main station line number, of originating intercity traffic routing over dial type tie lines, WATS, CCSA, Interexchange Carrier access lines and/or the toll network.

b. The station message detail will include the calling main station line number, the called number, date, time of day, duration of call and the type of facility used. (SMDR - RAO detail on incoming calls does not include the calling number or the type of facility used.) The record will be provided on magnetic tape, to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in routes selected by the customer for Station Message Detail Recording-RAO.

2. *Terms and Conditions*

(T)

a. Station Message Detail Recording (SMDR)-RAO may be offered to main station lines of customers where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.

b. Station Message Detail Recording - RAO is not represented to be a provision of billing detail.

c. Station message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the Company's accounting center furnishing the tape. The format may be changed to serve Company purposes and the customer will be responsible for making the tape compatible with his data processing equipment.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Used with MADN conferencing.

Note 3: A key is required per station being monitored.

I. Subsidiary System Arrangements

1. Subsidiary System

- a. A subsidiary system of a Digital ESSX service system is a customer-provided equipment system which is furnished PBX trunks from the central office serving the customer's Digital ESSX service system and which is connected by tie lines to that Digital ESSX service system.
- b. A Subsidiary System Arrangement provides station numbers which are in sequence with the main station line numbers of the customer's Digital ESSX service system to the stations of one or more subsidiary systems.

2. *Terms and Conditions*

(T)

- a. Subsidiary System Arrangement (SSA) station numbers are provided by the same central office equipment and facilities which furnish Direct-Inward-Dialing (DID) service and will only be furnished where adequate DID facilities are available in the central office serving the customer's system and where the subsidiary system is properly equipped for DID service.
- b. The PBX trunks of the subsidiary system are provided at the same rates and charges as specified for such trunks furnished from the central office serving the customer's Digital ESSX service system. In addition, foreign central office or foreign exchange mileage charges are applicable to those trunks when the subsidiary system is located outside the area of that serving central office.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: This feature provides for access to customer provided features which may require customer provided compatible terminal equipment.

Note 3: A separate private line is required.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

I. Subsidiary System Arrangements (Cont'd) (T)

2. **Terms and Conditions (Cont'd)**
 - c. The same rates and charges as specified for DID service apply for SSA station numbers. Where more than one subsidiary system is involved, each subsidiary system is considered a separate service and the count of station numbers furnished will commence anew at each such system for the purpose of determining the applicable rates and charges.
 - d. Tie lines connecting the Digital ESSX service and subsidiary systems are provided at the same rates and charges as specified for Digital ESSX service tie line terminals, tie lines, and tie line terminals in a customer-provided equipment system.
 - e. SSA station numbers are furnished subject to the condition that all inward and outward local and toll network calling by subsidiary system stations be via the central office serving the customer's Digital ESSX service system.
 - (1) Where subsidiary system station's outward local and toll network calls are placed via tie lines and the network access registers of the Digital ESSX service system, the charges for such calls are identified and billed as primary directory listing calls of the Digital ESSX service system.
 - (2) Where subsidiary system station's outward local and toll network calls are placed via PBX trunks, the charges for such calls are identified as primary directory listing calls of the subsidiary system except as specified in A112.28.11.I.2.f.
 - f. At the option of the customer, identification of outgoing toll network calls by SSA station number will be provided at the same rates and charges as specified for Identified-Outward-Dialing (IOD) service subject to the following conditions.
 - (1) The identification of outgoing toll calls by SSA station number will only be provided on calls routed via PBX trunks.
 - (2) Where more than one subsidiary system is arranged for the identification of outgoing toll calls by SSA station number, each system shall be considered a separate service and the count of connecting channels which serve as IOD trunks will commence anew at each system for the purpose of determining the applicable rates and charges.
 - g. The Digital ESSX service subsidiary system arrangement is provided solely for the furnishing of SSA station numbers to subsidiary systems for local and toll network and intercommunication calling and does not provide any of the basic or optional service features of Digital ESSX service to stations of the subsidiary systems.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

J. Automatic Route Selection - Basic

1. General

- a. Automatic Route Selection - Basic (ARS-B) is an optional feature, available where facilities permit that allows station users, by dialing a preselected code to automatically select the preferred route subscribed to by a customer for network calls. Alternate routing to other facilities subscribed to by the customer is also provided. This agreement is available for use with Foreign Exchange, WATS, CCSA off-net, tie lines and Interexchange Carrier (IC) access lines which are compatible with ARS and toll facilities.
- b. Automatic Route Selection - Basic is accessed by dialing a single code (1, 2 or 3 digits) which automatically selects the appropriate route (FX, WATS, CCSA off-net, tie line, IC access line or toll) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to eight (8) private routes.
- c. For calls using FX, WATS, CCSA off-net, or IC access line facilities, the routing may be based on a Number Plan Area (NPA) and limited to specified central office codes within the NPA as designated by the customer. This is referred to as Foreign Area Discrete Translation.
- d. Automatic Route Selection - Basic is a call routing capability and, therefore, all codes must be in a route for selection. Code blocking is not provided by this feature.

2. Terms and Conditions

(T)

- a. Automatic Route Selection - Basic is provided only in association with Digital ESSX service central office equipment located on Company premises and may be provided, subject to availability of facilities to Digital ESSX service systems which are served by the same such equipment.
- b. Preferred routes and alternate routing patterns will be specified by the customer.
- c. All rates and charges specified for Automatic Route Selection - Basic are in addition to the rates and charges for associated facilities.
- d. The number of patterns required by a customer are governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per pattern will apply regardless of the number of routes in the pattern or the number of facilities in the route.

O. Station Message Detail Recording

1. General

a. Station Message Detail Recording (SMDR) is a feature that provides a record, by main station line number, of originating traffic routing over local lines, tie lines, WATS, Interexchange Carrier access lines and/or the toll network. The SMDR content may vary depending upon the switching technology from which the call record is generated.

b. The station message detail may include, but is not limited to, the calling main station line number, the called number, connect time and date, call duration, facility used, disconnect time, digits output by switch, and end of dialing. SMDR data provided to customers using the ETS feature may include, but is not limited to, incoming call identification, outgoing facility used, midnight passed, prefix digits, interLATA carrier, and call event code where these features are *available*. (T)

c. Station Message Detail Recording (SMDR) is designed for either a DETS or non-DETS Digital ESSX service customer.

d. For SMDR data delivery rates and charges, see Network Usage Information Service in Section A32. (T)

e. SMDR as shown in this Section is required for the activation of SMDR for ESSX service.

2. *Terms and Conditions* (T)

a. The Station Message Detail Recording (SMDR) may be offered on Digital ESSX service main station lines of customers where facilities and technology permit.

b. SMDR is not represented to be a provision of billing detail.

- P. Attendant Features - Non Data Link Console Operation II

- 1. General

Central office attendant console operation is offered where all console functions are performed at the expense of the subscriber utilizing customer provided compatible terminal equipment.

Additional station line features may be obtained from A112.28.8, A112.28.9 and A112.28.10.

Control channels are required for various optional features as indicated and are provided at the rates and charges specified in Section B3. of the Private Line *Guidebook*.

(T)

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Requires appropriate rates and charges associated with Network Usage Information Service in Section A32.

Q. Automatic Call Distribution I (ACD)

1. General

a. Automatic Call Distribution - (ACD) features provide advanced call distribution and queuing capabilities as an integrated function of Digital ESSX service. ACD may be offered to ESSX service main station lines of customers where facilities permit. The ACD features are grouped into two sets: ACD Basic, without Network Management Reports (NMR) and ACD with NMR.

- (1) Agent Position - An Electronic Business Set (EBS) used with the ACD for call distribution.
- (2) Supervisory Position - An Electronic Business Set used in conjunction with ACD to supervise the ACD group.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Apply exchange circuit line charges as appropriate.

Note 3: Apply intercom charge found in A112.28.8, A112.28.9 and A112.28.10 of this Section.

Note 4: A separate private line is required.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

Q. Automatic Call Distribution I (ACD) (Cont'd)

1. General (Cont'd)

a. (Cont'd)

(3) Incoming Call Queue

- When all agents are busy, the incoming calls are placed in the appropriate incoming queues on a priority and order-of-arrival basis. Calls are then removed as agents become available to answer them.

(4) ACD Basic includes one primary directory number: ACD Basic has the capability for supplemental ACD numbers.

(5) Call Forcing provides a more efficient way for an ACD agent, using an ACD set (an electronic set with a headset jack), to answer incoming calls. When an ACD call is presented to an ACD agent having call forcing, a short burst of tone sounds on the agent's ACD set to alert the agent, and the call is immediately connected. The agent does not have to press the Incalls key to answer.

(6) Agent Position Keys:

- Call/Answer Supervisor Key¹ - If an agent requires assistance while handling an ACD call, the agent can call the supervisor for private consultation (followed by transfer of the caller to the supervisor, if desired). If the supervisor is busy with another agent call, the calling agent receives a busy tone and returns to the ACD caller. The agent can also answer a call from the supervisor by depressing the Call/Answer supervisor key.

- Agent Not Ready Key - This key is used to terminate active calls and/or allow the agent time to follow up on the call before being returned to the idle agent queue to answer another incoming call.

- Emergency Key - In the event of a threatening or abusive call, this key enables the agent to immediately conference the supervisor. If equipped, an emergency recording device automatically connects to the call.

- In Calls Key - This key is used by the agent to answer an incoming ACD call.

- Secondary ACD Directory Number Key - The agent's position can be equipped with one or more directory numbers that are separate from the ACD feature. The Secondary ACD Directory Number(s) key is used by the agent to place or receive non-ACD calls. Rates and charges are contained herein.

(7) Supervisory Position Keys:

- Call Agent Key¹ - The supervisor can call a particular agent position by operating keys associated with supervisor/agent communications.

- Answer Agent Key¹ - This feature is used to answer agent calls to the supervisor.

- Display Queue Status Key - One Display Queue key is available for optional assignment to each applicable ACD-DN. This key displays the following status information of calls waiting for the ACD-DN:

- Number of calls waiting in queue

- Number of agent positions manned for the ACD-DN

- Waiting time (in seconds) of the first call in queue

The display window is updated approximately every 12 seconds.

- Night Service Control Key - This feature allows a supervisor to place an ACD group into night service by key activation.

- Observe Agent Key - This key enables the supervisor to obtain a "listen-only" path to an ACD caller. Only calls presented on the agent's In Calls key can be observed.

Note 1: Requires an Additional Directory Number (ADN).

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.11 Optional Service Features (Cont'd)

Q. Automatic Call Distribution I (ACD) (Cont'd)

1. General (Cont'd)

a. (Cont'd)

(7) Supervisory Position Keys: (Cont'd)

- Answer Emergency Key1 - This feature uses specially assigned directory numbers on key-lamp pairs to respond to calls that have been initiated by the Emergency key on an agent's position.
- Agent Status Lamps - One agent key-lamp pair is assigned for each agent in the supervisor's group. The lamp enables the supervisor to determine the status of each agent position in the group.

OFF Agent position is unmanned

ON Agent is handling an ACD call

FLASH Agent is waiting for an ACD call

WINK Agent is busy on post-call work (not-ready-state)

- Enhanced Observed Agent Key² - This feature allows the ACD supervisor to observe any agent or supervisor with an In Calls key in any ACD group in the same customer group. The operation and interaction of this key is identical to the Observe Agent feature.

(8) Agent Queue

- If answering positions (agents) are available but there are no incoming calls waiting, the available agents are placed in a designated agent queue on a first-in, first-out basis. The agent who has been waiting the longest receives the first incoming call.

(9) Recorded Announcement

- Requires a Digital Recorded Announcement Module (DRAM) equipped with one NT1X75BA Controller card and up to 8 ROM/RAM cards (one per announcement).

2. *Terms and Conditions*

(T)

- a. During collection or distribution of the customer's ACD-NMR data, due to faults or defects in telephone equipment, data may be destroyed. The Company shall not be liable, directly or indirectly, for damages, unless caused by the negligence of the Company in failing to maintain reasonable standards of maintenance and inspection and to exercise reasonable supervision.

3. Rates and Charges³

A112.28.12 Telephone Numbers And Facilities Reserved For Future Use

A. General

1. A Customer may reserve preassigned telephone numbers and facilities necessary to meet their specified growth requirements at specific locations, on a mutually agreeable date. In the event the customer elects not to be provided with reserved telephone numbers, timely main station line additions cannot be assured and facilities necessary for growth requirements will be provided only within normal engineering and construction intervals.
2. Telephone numbers reserved for future use service includes preassigned telephone numbers and the distribution facilities required. Such telephone numbers and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Requires Observe Agent Key.

Note 3: Requires a dedicated 4 wire Full Duplex Datagrade circuit from the Company's central office to the customers premises. Appropriate Private Line charges apply.

Note 4: Requires ACD Basic.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.12 Telephone Numbers And Facilities Reserved For Future Use (Cont'd)

A. General (Cont'd)

3. The assignment of telephone numbers and the sequence of numbers assigned to a Digital ESSX system is made at the discretion of the Company.
4. The service is furnished subject to the availability of facilities and telephone numbers.
5. Calls to reserved (unassigned) telephone numbers will be routed to intercept over Digital ESSX common recorded announcement facilities.
6. Telephone numbers furnished herein retain their reserve status until assigned to a main station line at which time the service assumes rates and charges applicable to a Digital ESSX main station line.
7. Reserved numbers not assigned to a main station line will be billed at the following rates until removed from reserved status or billed as an active Digital ESSX main station line.

B. Rates As Specified following Apply To Each Reserved Telephone Number

1. Rates And Charges

- a. Reserved Digital ESSX Telephone Numbers
 - (1) Each telephone number

	Monthly Rate	USOC REN+X
(a) Apply 60 percent of the monthly rate applicable for an ESSX main station line at the customer's main location.	\$-	

A112.28.13 Customer Management Features

A. Digital ESSX Customer Administration Service

1. General

- a. The Digital ESSX Customer Administration Service (DECAS) feature permits Digital ESSX customers to activate/deactivate selected optional features, change certain service options, and change feature configurations on predesignated Digital ESSX station lines. Customer provided terminal equipment is required for the operation of the DECAS feature.
- b. For DECAS equipped station lines, DECAS allows the customer to verify and/or display the assignment of features on a single station line, range of station lines or all station lines to determine which station or stations have a particular feature or service option.
- c. Certain Digital ESSX station lines may be specified by the customer to be exempt from this feature. Additionally, the Company reserves the right to make station lines inaccessible for DECAS.
- d. Changing the status of a station line from accessible to DECAS to inaccessible or vice versa, must be done by the Company via a Service Order request. Appropriate Service Order Charges specified in Section A4. apply.
- e. The Company has made the following provisions to protect the integrity of the switching system database and to ensure the security of DECAS changes.
 - (1) A DECAS customer's change, display or verify capabilities are restricted to that particular customer's own Digital ESSX service system.
 - (2) All changes are audited as they are entered by the DECAS customer. Invalid changes will not be accepted. An error message detailing which command is in error will be given.
 - (3) Customer access to the database is protected using a dialup, login, password/dialback arrangement.
- f. A DECAS customer can schedule changes (individual or bulk) for completion by the next business day or for a future business day. Additionally priority changes may be requested and the changes completed the same day subject to **term and condition** f. and o. in A112.28.13.A.2.
- g. Definitions pertaining to DECAS/Digital ESSX service features are specified in A112.28.3.

A. Digital ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)

h. The DECAS feature allows the customer to perform the following transactions from the customer provided terminal. (Cont'd)

(4) Review the following information to aid in system management.

- The configuration of a single Digital ESSX service station line (i.e., service options and active station line features)
- The number of stations having or not having a particular feature
- Pending TN swaps
- The series completion sequence of a main station line
- Selected Company entered information affecting customer station lines
- Customer entered listing information
- The number of call pickup groups in the system
- Meet Me Conference Directory Numbers
- PreSet Conference Members List

(5) A DECAS customer may also print the following administrative reports.

- Configuration (i.e., service options, station features) for a single station line or span of Digital ESSX service station lines.
- A listing of all pending changes including the type of change and the scheduled effective date.
- Customer Entered Listing Information

The following information is included on all DECAS changeable station lines.

- Station Telephone Number
- Name¹
- Organization¹
- Location¹

(6) Initial training of the customer for up to four system managers in the use of this feature is included at the time the feature is put into service. Communication counselor training is a prerequisite to the DECAS systems manager training. Any customer training or subsequent assistance necessary after the initial establishment of the feature is at the option of the customer and a Subsequent Training Charge applies per hour where such training is provided.

- i. A DECAS customer can add, change and delete authorization codes.²
- j. Digital ESSX service main station lines reserved for future use via DialTone provisioning include preassigned telephone number and the facilities required. Such telephone number and facilities will be removed from reserved status and assigned as active main station lines as requested by the customer.
- k. The assignment of reserved Digital ESSX service main station line facilities and the sequence of numbers for DialTone provisioning assigned to the subscriber's system is made at the discretion of the Company.
- l. DialTone provisioning is furnished subject to the availability of facilities and telephone numbers.

Note 1: The DECAS customer is responsible for entering and updating the information contained in this field.

Note 2: Furnished subject to the availability of facilities in the central office.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

1. General (Cont'd)
 - m. Calls to telephone numbers reserved (but not activated) via DialTone provisioning will be routed to intercept over Digital ESSX common recorded announcement facilities as specified in A112.28.1 of this Section.
 - n. Telephone numbers and telephone facilities for Digital ESSX service main station lines furnished via DialTone provisioning while in reserved status will be billed at 60 percent of the Digital ESSX service main station line rate (Intercom and Exchange Circuit charges).
 - o. Telephone numbers and telephone facilities for Digital ESSX service main station lines furnished via DialTone provisioning retain their reserved status until assigned to a main station line at which time the service assumes rates and charges applicable to a Digital ESSX service main station line.
 - p. Digital ESSX service main station lines reserved via DialTone provisioning will be included in the determination of System Size (200, 600 or XL).
 - q. PreSet Conference can be created, changed or deleted from a pre-established PreSet Conference number via DECAS.¹ A list of the available PreSet Conference numbers is available to the customer via DECAS.
 - r. Meet Me Conference can be created, changed or deleted from a pre-established Meet Me Conference number via DECAS.¹ A list of the available Meet Me Conference numbers is available to the customer via DECAS.
 - s. To gain access to the Company's Dial Access network, the subscriber must have one Security Card for each System Manager accessing the DECAS Database. Subscriber's under an existing DECAS contract will be issued up to (not to exceed) three (3) Security Cards at no additional charge when required by the Company to use a Security Card to access the Company's network.

Once the first three (3) Security Card(s) have been issued, the subscriber must pay for any subsequent Security Cards. Should the subscriber require more Security Cards, they may be ordered from A112.28.A.3.d.4 following.

- t. The Security Card rate element will provide for the issuance of a card for each System Manager or for the replacement of lost, stolen or expired cards. If the subscriber has purchased a Security Card in conjunction with another feature or service offered by the Company, that Security Card may also be used in conjunction with Customer Control. It is up to the subscriber to notify the Company of an existing Security Card so the Company can ensure that the card is validated for DECAS.

2. *Terms and Conditions*

(T)

- a. DECAS is provided only with Digital ESSX service systems served from a Digital central office and is furnished subject to the availability of facilities.
- b. Customers equipped for DECAS must order via a Service Order. (Appropriate service order charges specified in Section A4. will apply.) DECAS changeable features in groups of five (5) at the rates specified in A112.28.13.A.3.c.
- c. Non-DECAS changeable features will be added subject to the specifications and rates in A112.28.8, A112.28.9, or A112.28.10 as appropriate.
- d. Features for DECAS exempt station lines must be requested via a Service Order and added by the Company. Rates and Charges for the features specified in A112.28.8, A112.28.9, or A112.28.10 apply as appropriate.
- e. The customer provided DECAS terminal equipment requires a Digital ESSX service main station line. Rates and Charges in A112.28.8, A112.28.9, or A112.28.10 apply as appropriate.
- f. DECAS changes must be entered prior to times to be designated by the Company to be completed as priority changes or by the next business day as requested by the customer.

Note 1: The DECAS customer is responsible for entering and updating the information contained in this field.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.28 Digital ESSX Service (Cont'd)

A112.28.13 Customer Management Features (Cont'd)

A. Digital ESSX Customer Administration Service (Cont'd)

2. *Terms and Conditions* (Cont'd)

(T)

- g. A DECAS customer cannot activate features in excess of the quantity that has been ordered from the Company. The customer will receive an indication on the terminal screen when 100 percent utilization of a feature is reached. To add additional quantities will require a Service Order. (Appropriate Service Order charges specified in Section A4. will apply.)
- h. Contractual obligations and End User Common Line Charges will be billed to the location where originally installed and will not transfer with a station line number rearrangement.
- i. If the Company is requested to load DECAS changeable features for new Digital ESSX service/DECAS customers, the Installation Charge specified in A112.28.13.A.3.b.(4). applies per feature loaded.
- j. The following types of lines will be restricted from Station TN Rearrangement capability. Service option and feature change capabilities will still be available except on lines assigned to multiline hunt groups.
 - Station lines assigned to multiline hunt groups
 - Attendant lines
 - Any Digital ESSX line which has a special hardware configuration (e.g., ground start lines and lines having SCAN points or signal distribution points)
 - Manual lines (e.g., station lines with full originating and/or terminating restrictions)
- k. DECAS changeable features added by the Company at the customer's request will be subject to the appropriate Service Order charges specified in Section A4. and the per line charges specified in A112.28.13.A.3.b.
- l. Any required changes in customer provided equipment as a result of growth, desired enhancements or technological advancement, will be the responsibility of the DECAS customer. Compatibility with customer provided station terminal equipment is not guaranteed.
- m. The DECAS customer is responsible for assigning and maintaining a record of station feature assignments. The DECAS customer also agrees to provide the Company with a central point of contact for inquiries and/or trouble reports involving station features.
- n. DECAS customers will be responsible for initiating a Service Order to correct any information pertaining to Directory Listings that changed as a result of a DECAS TN swap. The appropriate Service Order Charges specified in Section A4. apply.
- o. DECAS customers will be limited to one (1) TN swap per day as a priority request. The numbers of feature changes that can be requested as priority changes will be determined by the Company when DECAS is ordered.
- p. When required by the Company to use a Security Card, the DECAS subscriber will be required to authenticate with the card before network access is permitted. The network access security system validates the user, and establishes the call across the network to the DECAS host computer. In conjunction with the Security Card, the Company will provide a login and password in order to maintain secure access and an audit trail. Rates for the Security Card are outlined in A112.28.13.A.3.d.4. following.

A112.28.14 Switched Data Service I

A. General

- 1. Switched Data Service is a digital switched service that may be utilized by Digital ESSX service subscribers to provide up to a maximum of 56 kilobits per second full duplex information via a specially equipped two-wire Digital ESSX service main station line.
- 2. Switched Data Service Capability will be provided to Digital ESSX service subscribers via non-loaded facilities utilizing main station lines within the engineering limits of Switched Data service where facilities permit.
- 3. Digital ESSX service main station lines with Switched Data Service capability will allow digital calls only. Main station lines equipped with Switched Data Service capability are not voice functional.

B. Terms and Conditions

- 1. Switched Data Service capability for Digital ESSX service main station lines is furnished at rates specified in A112.28.14.C. Rates for locations beyond two and one half miles will be provided as specified in Section A5.
- 2. The total quantity of voice functional main station lines and Switched Data Service capable main station lines for one subscriber will determine Digital ESSX service size (200, 600, XL).
- 3. A Digital ESSX service subscriber utilizing Switched Data Service capability must subscribe to a main station line that will include the exchange circuit and the C.O. termination at rates and charges as specified in A112.28.14.C. for Measured and Flat Rate service. The C.O. termination will include intercom, provisioning for Switched Data Service and Data Call Protection per main station line.
- 4. **(DELETED)** (D)
- 5. End User Common Line Charge will apply as appropriate.

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: When required by the Company to use a Security Card to access the Company's network, up to three (3) Security Cards, as outlined in A112.28.13.A.1.s preceding, will be provided at no charge to subscribers who are under the existing DECAS rate and guidebook structure.

Note 3: Appropriate Service Charges as specified in Section A4 apply.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.29 ESSX Multi-Account Service

(Obsoleted 09-26-95, Type D) Service rates and charges in this Section are available for inward activity of existing ESSX Multi-Account Service (EMAS) Primary and Secondary Account subscribers only as specified following. Not available for new service or entire moves of existing service to new locations. Moves of existing service will be allowed when a subscriber remains within the same serving central office switch.

Obsolescence Rules

1. Inward activity for EMAS will be allowed.
2. EMAS subscribers under the month-to-month payment option will be allowed to maintain their service at month-to-month rates.
3. EMAS subscribers who have a portion of their existing service under a month-to-month payment option and a portion of their existing service under a Term Payment Plan may remain under the Term Payment Plan rates and charges outlined in this Section when the Term Payment Plan associated with the Common Equipment expires. For expired Term Payment Plans, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section. (T)
4. EMAS subscribers under a Term Payment Plan will be allowed to maintain their service under the rates and charges outlined in this Section when the Term Payment Plan expires. For expired Term Payment Plans, the Company may establish a date in the future to begin conversion of subscriber accounts to the month-to-month rates and charges outlined in this Section. (T)
5. EMAS subscribers under a Term Payment Plan or a month-to-month payment option will have until 11-26-95 to convert to a Term Payment Plan period of not greater than 36 months in length.
6. Existing EMAS subscribers who are under a Term Payment Plan may add a new secondary location (SLA) of their existing service.

A112.29.1 General

- A. ESSX Multi-Account service is a fully partitioned ESSX service for use in an environment serving multiple tenants located in a building or buildings on the same continuous property. The continuous property area for each ESSX Multi-Account service must be specifically identified and under the control of a single owner or management unit. Areas so designated may be intersected or transversed by public thoroughfares provided that the adjacent property segments created by intersecting or transversing thoroughfares would be continuous in the absence of the thoroughfare. The designated service area must be wholly within the confines of the serving wire center boundary.
- B. Rates and conditions for ESSX Multi-Account service as specified following and where applicable are in addition to the rates and conditions specified for ESSX service of this *Guidebook*. (T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.29 ESSX Multi-Account Service (Cont'd)

A112.29.2 *Terms and Conditions*

- A. The provision of ESSX Multi-Account service is dependent upon the establishment of a Primary Account for a minimum of thirty-six (36) months under the terms and conditions of the Term Payment Plan located in A112.26.6 and A112.28.6 of this Section. All other subscribers to an ESSX Multi-Account service are considered Secondary Accounts. All Secondary Account agreements for an ESSX Multi-Account service must terminate either on or before the expiration date of the Primary Account's subscription agreement for ESSX Multi-Account service.
- B. The Primary Account accepts responsibility for the training of Secondary Accounts and will provide assistance in the coordination of ESSX service for Secondary Accounts. As a part of the coordinating role, the Primary Account is also responsible for monitoring the total system size and will notify the Company when the ESSX Multi-Account service moves from one size classification to another such as the movement from an ESSX service 200 to an ESSX service 600. The Primary Account is also responsible for insuring that the minimum system size established for ESSX service is maintained throughout the life of the agreement.
- C. ESSX Multi-Account service will provide partitioned ESSX service for each account subscribing to ESSX Multi-Account service. Each ESSX Multi-Account service subscriber is required to have separate Network Access Registers (NARs) to provide network access.
- D. Station to Station calling is limited to ESSX service main station lines within each ESSX Multi-Account service. Intercom calling between unaffiliated accounts is not permitted under ESSX Multi-Account service.
- E. Each subscriber to ESSX Multi-Account service is subject to all rates, *terms and conditions* of ESSX service as specified and where applicable in Section A112.
- F. Each account will be directly responsible to the Company for all charges associated with its service. The Company will bill each account directly for its service.
- G. Appropriate nonrecurring charges will apply as follows:
 1. Installation Charges for ESSX service (200, 600 or XL) as specified in A112.26.7.B.1. or A112.28.7.B.1. of this Section will apply to the Primary Account of a Multi-Account system.
 2. Installation Charges for ESSX Multi-Account service as specified in A112.29.5 or A112.29.6 of this Section will apply to the Secondary Accounts.
- H. Appropriate recurring charges will apply as follows:
 1. Common Equipment Charges for ESSX service (200, 600 or XL) as specified in A112.26.7.B.1. or A112.28.7.B.1. of this Section will apply to the Primary Account of a Multi-Account system.
 2. Charges for ESSX Multi-Account service as specified in A112.29.5 or A112.29.6 of this Section will apply to the Secondary Accounts.
- I. System size (ESSX service - 200, 600 and XL) will be determined by the total number of main station lines in a Multi-Account system. The minimum number of main station lines per Multi-Account system will apply as specified in A112.26.2.W. or A112.28.2.I.
- J. Each account must designate its preferred carrier for long distance service.
- K. ESSX service features are provided individually to each account. Where the ESSX service permits, features may be provided on either a station basis or a system basis as described in Section A112. If provided on a system basis, appropriate system charges apply to each account electing this option.
- L. The mix of ESSX service and Digital ESSX service customers within the same Multi-Account system is not permitted.

A112.29.3 Definitions

ACCOUNT

A subscriber of ESSX Multi Account service may be either a Primary Account or a Secondary Account.

MULTI-ACCOUNT SYSTEM

Consists of a Primary Account with or without Secondary Account(s).

PRIMARY ACCOUNT

The subscriber who accepts responsibility for the coordinating role for the Multi-Account system as specified in this Section.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

SECONDARY ACCOUNT

Any ESSX Multi-Account service subscriber of a system other than the Primary Account.

A112.29.4 Conversion

A. Conversion from ESSX service to ESSX Multi-Account service.

1. When a subscriber with ESSX service elects to convert to an ESSX Multi-Account service, the following conditions apply:
 - a. When a Primary Account of the same system size as the one from which converting is established, no Service Establishment Charge will apply.
 - b. When a Primary Account of a larger system size other than the one from which converting is established, the subscriber will be liable for the difference in Service Establishment Charges between the appropriate system sizes.
 - c. When a Secondary Account is established by conversion from an existing ESSX service, no Service Establishment Charge will apply.

B. Conversion from ESSX Multi-Account service to ESSX service.

1. When a subscriber with ESSX Multi-Account service elects to convert to an ESSX service, the following conditions apply:
 - a. When a Primary Account converts to an ESSX service, no Service Establishment Charge applies providing the original Service Establishment Charge was for a system the same size or larger than the system to which converting.
 - b. When a Secondary Account converts to an ESSX service, the difference between the Service Establishment Charge for ESSX Multi-Account service and the Service Establishment Charge for ESSX service will apply.
 - c. The minimum number of main station lines per ESSX service converted will apply as specified in A112.26.2.W. or A112.28.2.I.

(T)

A112.29.5 ESSX Service

A. Common Equipment

1. The following rates and charges are for the ESSX Multi-Account service feature only and are in addition to the appropriate and applicable service charges, monthly rates and nonrecurring charges for ESSX service, Network Access Registers, and other services to which ESSX Multi-Account service subscribers may subscribe. Rates and charges for ESSX Multi-Account service apply only to each Secondary Account.

A112.30 Reserved For Future Use

A112.31 ESSX ISDN Service

(Obsoleted 09-26-95, Type D) Service rates and charges in this Section are available for inward activity of existing subscribers only as specified in the obsolescence rules stated in A112.28. Not available for new service or entire moves of existing service to new locations. Moves of existing service will be allowed when a subscriber remains within the same serving central office switch.

A112.31.1 General

A. ESSX ISDN service is an intraLATA group of offerings supported by the Integrated Services Digital Network (ISDN) architecture. ESSX ISDN service supports simultaneous transmission of voice and data on the same exchange access line. ESSX ISDN Service is available only to Digital ESSX service customers. The ESSX ISDN service lines in this offering can be added to Digital ESSX service -VS, -200, -600, -XL Systems under the same terms and conditions specified in A112.28. (T)

B. ESSX ISDN service provides a method of access to the subscriber's Digital ESSX service system called Basic Rate Access. Basic Rate Access will consist of up to two 64 Kbps (B) channels and one 16 Kbps (D) channel at the service delivery point.

C. ESSX ISDN service will consist of the following components:

1. Digital ESSX service Common Equipment²
2. Basic Rate Digital Subscriber Line (DSL) Access Arrangement²
3. ISDN Loop Access Mileage²
4. ISDN Bearer Alternative Services²

- Minimum of one and maximum of eight Bearer Services per Basic Rate DSL Access Arrangement

- Maximum of eight identifiable users with a maximum of two simultaneous channels in use per Basic Rate DSL Access Arrangement

Note 1: Due to contract expirations, customers previously under 36 Months and 60 Months Term Payment Plan contracts have been converted to 1 Month rates and Term Payment Plan rates for 36 Months and 60 Months have been removed.

Note 2: Every system will include these components.

A112.31.1 General (Cont'd)

- C. ESSX ISDN service will consist of the following components: (Cont'd)
 - 5. Usage Charges¹
 - 6. Features
 - 7. Network Access¹

A112.31.2 Terms and Conditions

- A. Customer Premises Equipment (CPE) for use with ESSX ISDN service Interface is the responsibility of the user for provisioning. (T)
- B. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of Basic Rate ESSX ISDN service render any facilities provided by the customer obsolete or require modification or alteration of such equipment or system, or otherwise affect its use or performance. (T)
- C. Terms and conditions for ESSX ISDN service are applied based on the system size (-200, -600, -XL) as defined in Digital ESSX service in this Section. (T)
- D. Suspension of service is not allowed. (T)
- E. Service Order Charges and Central Office Line Charges in Section A4. are applicable in addition to rates and charges in A112.31.5 following. (T)
- F. ESSX service Flat Rate Network Access Registers (NAR) as provided in Section A3. should be used with ESSX ISDN service associated with a mixed or flat rate Digital ESSX service system. (T)
ESSX service Measured Network Access Registers (NAR) as provided in Section A3. or ESSX service Volume Usage Network Access Registers (NAR) as provided in A3.26 may be used with ESSX ISDN service associated with a measured Digital ESSX service system. (T)
- G. ESSX ISDN service subscribers with mixed or flat rate Digital ESSX service must choose circuit switched B channels designated for use with Mixed or Flat Rate systems in this Section. These B channel rates include a usage surcharge in lieu of the usage charges in Section A3. (T)
ESSX ISDN service subscribers with measured rate Digital ESSX service must choose circuit switched B channels designated for use with all measured systems in this section of the *Guidebook*. Usage charges defined in Section A3. are applicable for transmission outside of the subscriber's system or the subscriber's serving central office. (T)
- H. Each ESSX ISDN service Basic Rate Access Arrangement line will be counted as a Digital ESSX service line in determining the total system size. (T)
- I. Telephone numbers transmitted via the Calling/Called Number Display feature are intended solely for the use of ESSX ISDN service subscribers. Resale of this information is prohibited by this *Guidebook*. (T)
- J. (DELETED)

A112.31.3 Definitions

B CHANNEL

A bidirectional synchronous channel capable of supporting 64 Kbps of digital transmission.

D CHANNEL

A 16 Kbps digital signaling channel also capable of supporting 9.6 Kbps of packet information for the Basic Rate Interface (BRI).

64 KBPS CLEAR CHANNEL CAPACITY (CCC)

A B channel connection that provides end-to-end digital connection in which all 64 Kbps of bandwidth are available for customer use.

Note 1: Every system will include these components.

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.31 ESSX ISDN Service (Cont'd)

(T)

(DELETED)

(D)

Configuration Groups (5ESS only)

Configuration Groups use a similar software assignment concept to associate physical buttons of ISDN terminals to feature and actions. Since Configuration Groups use a group assignment process, it is necessary to group ISDN terminals together by type and common button action, so that terminals assigned to the same Configuration Group will operate in the same manner. Call appearances and features on one terminal's buttons will then appear on the same button numbers on any other terminal in the same Configuration Group, as long as the same features/call appearances are used on each terminal. If not, the buttons cannot be used for a different feature or function. Variations in terminal types, features, call appearances, and feature button location will necessitate multiple Configuration Groups.

A112.31.4 Service Bearer Alternatives and Features

(T)

- A. ESSX ISDN service Capability is provided through Bearer Alternatives and Features. Customers are required to subscribe to at least one Bearer Alternative Service. Features are available to increase the capability of the Bearer Alternative Service and may be subscribed to on an as needed basis.

- B. B Channel Bearer Alternatives

- 1. Circuit Switched (B channel) Bearer Alternatives are usage sensitive switched services that offer up to 64 Kbps intra-office transmission for voice, data, or alternate voice and data transmission.
 - a. Alternate Voice/Data - This option permits the customer to utilize either circuit voice or data transmission paths on a per call selection basis. Transmission on the B channel will be circuit switched at 64 Kbps within the switch and/or equipped facilities between ISDN compatible central offices. ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 Kbps. This option includes one directory number (DN).
 - b. (DELETED)
 - c. (DELETED)

(D)

(D)

- C. (DELETED)

(D)

- D. Features - Circuit Switched Voice

(D)

- 1. Inspect is used to retrieve and display call-related information about any call appearance that has a call associated with it. This could be the active call, a call on hold, or an alerting call. It includes time of day and date (5ESS only).
 - 2. Calling/Called Number Delivery, All - provides a user who is receiving/originating a call with information about the calling/called party and the facility or destination. It allows the calling/called DN to display for all terminals that share the same DN.²
 - 3. ISDN Intercom (ICOM)
 - a. Automatic - allows the ISDN telephone to originate calls to a DN by using only the ICOM feature button.

(T)

Note 1: This is a mandatory feature in the DMS 100 if any line in the system is equipped for this feature.

(T)

A112. OBSOLETE SERVICE OFFERINGS - CENTRAL OFFICE NON-TRANSPORT SERVICE OFFERINGS

A112.31 ESSX ISDN Service (Cont'd)

A112.31.4 Service Bearer Alternatives and Features (Cont'd)

- D. Features - Circuit Switched Voice (Cont'd)
 - 3. ISDN Intercom (ICOM) (Cont'd)
 - b. Group (Dial) - allows the ISDN telephone to originate a call to a DN by pressing the ICOM feature button and dialing one or two digits.
 - 4. Additional Call Appearance - allows the set to have more than one DN button assigned to the same PDN.
 - 5. Non-Shared Secondary-Only DN - a secondary DN that appears on only one terminal.
 - 6. Shared Non-ISDN DN - allows a Non-ISDN set to share calls with an ISDN set.
 - 7. Shared Primary DN - a primary DN that appears on more than one terminal.
 - 8. Shared Secondary-Only DN First Appearance - the first appearance of a secondary DN that appears on more than one terminal but is not the primary DN on any of those terminals.
 - 9. Shared Secondary-Only DN - Additional Device allows the first appearance of the Shared Secondary Only - DN on an additional device.
 - 10. Manual Exclusion (Privacy) - allows a user to inhibit other stations in the same group from picking up a call on hold or bridging to a call that is active at that station.
 - 11. Privacy Release (DMS only) - allows other stations to bridge into an existing call.
 - 12. Conference, Drop, Hold, Transfer
 - a. Conference - allows the set user to select an idle call appearance for the second leg of a three-way conference.
 - b. Drop - allows the set user to drop the last party added to a conference call. For a two-party call, pressing this button disconnects the set from the call.
 - c. Hold - allows the set user to place a call on hold by pressing the function button. Any set with the call appearance for the call on hold can pick up the call by pressing the call appearance button.
 - d. Transfer - allows the user to transfer a call to another DN in the customer group by pressing the transfer button, dialing the DN, and pressing the button again.
 - 13. Additional Call Appearance of a Shared DN - allows the set to have more than one DN button assigned to the same DN.
 - 14. Call Forwarding Variable - Feature Button (5ESS), when activated by a main station line user, automatically routes calls intended for the user's main station line to any other main station line selected inside or outside the subscriber's Digital system. This feature is used only when the subscriber requires Call Fowarding - Variable on a feature button.
 - 15. Visual Message Waiting Indicator - Provides the user of a message service with a visual indication that a message is waiting.
 - 16. Audible Message Waiting Indicator (5ESS) - Provides the user of a message service with an indication that a message is waiting.
 - 17. Voice features compatible with ISDN lines not defined in this document will be available and as indicated in A112.28 (Digital ESSX service).
- E. Features - Circuit Switched Data
 - 1. Circuit Switched Data Call Hunting (5ESS) - allows multiline hunting with Circuit Switched Data Service Capability

A112.31 ESSX ISDN Service (Cont'd)

A112.31.5 Rates and Charges (Cont'd)

- C. Digital ESSX service Common Equipment is required for all ESSX ISDN service lines. Rates and charges for Digital ESSX service Common Equipment are in addition to the charges in D. following.
 - 1. Rates, charges, liabilities and additional *terms and conditions* if applicable may be developed on an individual basis for Basic Rate DSL Access Arrangements exceeding the qualified loop area requirements. (T)
- D. ISDN Basic Rate Access Capability Charges - Rates and Charges
 - 1. Basic Rate DSL Access Arrangement¹

Term Payment Plan				
Monthly Rate				
	Installation	1	84	
	Charge	Month	Months	USOC
	\$170.00	\$36.70	\$24.50	LTU1X
2. ISDN Loop Access Mileage ¹				
(a) Two-wire interface, low volume				
(a) 1/4 mile	-	4.85	3.25	1LDLA
(b) 1/2 mile	-	7.55	5.00	1LDLB
(c) 3/4 mile	-	10.40	6.95	1LDLC
(d) 1 mile	-	13.35	8.90	1LDLD
(e) 1 1/2 miles	-	19.30	12.85	1LDLE
(f) 2 miles	-	25.35	16.80	1LDLF
(g) 2 1/2 miles	-	25.95	17.20	1LDLG
(h) Greater than 2 1/2 miles Up to 5 miles ²	-	79.20	53.00	1LDLO
3. Bearer Alternative Services ¹				
a. B Channels				
(1) Alternative Voice and Data - For use with Mixed or Flat Rate Digital ESSX service ³				
(a) Circuit Switched Voice/Data	8.00	6.50	4.45	LTQ8X
(b) Circuit Switched Voice/Data (shared DN) ⁴	8.00	6.50	4.45	AAQ8X
(2) Alternative Voice and Data - For use with all Measured Digital ESSX service				
(a) Circuit Switched Voice/Data	8.00	4.40	3.00	LTQ8M
(b) Circuit Switched Voice/ Data (Shared DN) ⁴	8.00	4.40	3.00	AAQ8M
(3) (DELETED)				

Note 1: New rates become effective with normal billing cycles beginning on or after June 8, 2002.

Note 2: This element should also be used for subscribers served through Subscriber Line Carrier at distances above 1 3/4 miles.

Note 3: Mixed systems include hotel/motel or hospitals where a mix of flat and measured/message service is allowed.

Note 4: Shares DN with another bearer service on the same DSL.
