This section concurs in BellSouth Telecommunications, LLC's (BST's) Tariff FCC No. 1, Section 6, which can be accessed via the following hypertext link: (C)

<http://cpr.att.com/pdf/fcc/1006.pdf>

Exceptions to this concurrence of BellSouth Telecommunications, LLC's (BST's) Tariff FCC No. 1, Section 6, are as listed below. The following cited exceptions relate to that specific section in the interstate Tariff FCC No. 1.

E6.1 General**E6.1.1 BellSouth SWA Service Arrangements and Manner of Provision****E6.1.1 (A) BellSouth SWA FGA**

In lieu of the language in Tariff FCC No. 1, the following applies to the intrastate jurisdiction.

BellSouth SWA FGA provides line side access to Company end office switches with an associated seven digit local telephone number for the use in originating and terminating communications to an Interexchange Carrier's intrastate service or a Company-provided, end-office based, intrastate private network switching service. When a customer certifies that it is providing an intrastate, interLATA private network switching function for the end user at its terminal location, the end user may order BellSouth SWA FGA for off-network access. Otherwise, the customer may order such access. An end user is restricted to ordering BellSouth SWA FGA for off-network access associated with private network switches. Additionally BellSouth SWA FGA FX/ONAL type services will be billed directly to the end user (subscriber) of these services. Customers are not restricted and in addition to the off-network access capability, customers can order BellSouth SWA FGA in connection with providing interLATA foreign exchange service and MTS-like service. When associated with a Company-provided, end-office based private network switch, end users must order BellSouth SWA FGA for off-network access. When BellSouth SWA FGA service is ordered by an end user for use with a Company provided private network switch, the end user must specify the customer that provides the interLATA links of the private network service. If an end user provides the interLATA links of its private network, the end user may order BellSouth SWA FGA for off-network access. A more detailed description of BellSouth SWA FGA service is provided in E6.2.1 of Tariff FCC No 1.

The Company will bill BellSouth SWA FGA FX/ONAL type service directly to the customer's end user, and the end user will be subject to the deposit, payment and credit arrangements as specified in E2.4.1 of the intrastate tariff.

Additionally, the Switched Local Channel can provide a transmission path between an interstate BellSouth SWA Expanded Interconnection Arrangement and a Telephone Company end office switch (Intraoffice BellSouth SWA DS1 or BellSouth SWA DS3) when a BellSouth Expanded Interconnection Arrangement is purchased from FCC No 1. This Switched Local Channel is provided at BellSouth SWA DS1 and/or BellSouth SWA DS3 capacity and is assessed a monthly fixed charge based on the capacity ordered by the Interconnecting Customer.
