B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.1 General

A. Methods Of Applying Rates

1. Additional point of termination of a Local Channel in Different Buildings on the Same Premises
 - a. A charge, as provided in B103.1.1.A.1.b. following, for extending a Local Channel and terminating the channel at a station location in a different building on the same premises shall apply in lieu of an additional Local Channel Charge when conditions and facilities permit, otherwise the local channel charge applies.
 - b. When additional points of termination of a single private line service are located in different buildings on the same premises, the charge for the channel shall be based on the airline distance between each pair of buildings. The rates are specified in B103. following.
 - c. These channels are provided only for use between Company-provided equipment. See B2.1.4.A.2. for the *term and condition* governing channels between Customer-provided equipment. (T)
2. Additional Point of Termination of a Local Channel in the Same Building

A charge as provided in B103. following for extending a Local Channel and terminating the channel at a station location in the same building applies in lieu of an additional local channel charge.

These channels are provided only for use between Company-provided equipment. See B2.1.4.A.2. for the *term and condition* governing channels between Customer-provided equipment. (T)
3. Same Building

When all station locations of a private line service are in the same building, the charge for same building channel specified in B103. following apply.

These channels are provided only for use between Company-provided equipment. See B2.1.4.A.2. for the *term and condition* governing channels between Customer-provided equipment. (T)
4. Channels Between Buildings on the Same Premises

When station locations of a private line service are located in different buildings on the same premises the charge for the channel shall be based on the airline distance between each pair of buildings when conditions and facilities permit. The charges are as specified in B103. following.

Where a supporting structure is necessary for the purpose of furnishing these channels on the subscriber's premises, such supporting structure will be furnished by the subscriber as provided for in "Construction on Private Property" in Section A5. of the General *Exchange Guidebook*. (T)

These channels are provided only for use between Company-provided equipment. See B2.1.4.A.2. for the *term and condition* governing channels between Customer-provided equipment. (T)

B. Circuit Rental

(Obsoleted 06-03-91, Type B)

For the exchanges of Briarwood, Dekalb, Duffee, Lynville and Obadiah only (previously Hughes Telephone Company operating territory), see B103.2.3. (T)

B103.2 Description Of Services And Rates - Intraexchange

B103.2.1 Series 1000 - Sub Voice Grade Service

- A. Sub Voice Grade Services are designed for transmission of low speed data at speeds up to 75 and up to 150 baud within certain technical specifications. These channels are furnished for half duplex and duplex operation for use with two-point or multi-point Private Line Services. The service is not suitable for the transmission of alternating current tones. Effective 8-12-85, Obsoleted Type B.

EFFECTIVE: July 1, 2006

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.2 Description Of Services And Rates - Intraexchange (Cont'd)

B103.2.1 Series 1000 - Sub Voice Grade Service (Cont'd)

B. (DELETED)

(D)

C. Parameters and Specifications for Sub Voice Grade Local Channels used with Customer Provided Station Equipment (CPE) is discussed in *B3.2.1*. The following type specifications apply.

(T)

1. Basic Parameters With Specification Or Limit

a. Channel Signals

Local Channels used with CPE - as specified in B103.2.1.B. Note that the specifications of channel signals refer to the requirement of the total service offering and not the individual local channel.

b. Channel Distortion

Local Channels used with CPE - as specified in B103.2.1.B. Note that the specifications for channel distortion refer to the requirement of the total service offering and not the individual local channel.

c. Power Requirement

For up to 75 Baud Type - Where the Company provides transmission equipment at the interface. The customer must provide a source of continuous 117 volt, 60 Hz ac power by means of a nonswitched outlet.

For up to 150 Baud - Customer must in all cases provide a source of continuous 117 volt, 60 Hz ac power, nonswitched outlet.

The Company will in all cases supply all voltage and current adjustments.

These channels are not suitable for the transmission of alternating current tones.

EFFECTIVE: July 1, 2006

E. Rates And Charges (Cont'd)

3. Local Area Data Channels (Type 1180 and Type 1182)

(Obsoleted 06-03-91, Type B)

In consideration of the decreasing supply of metallic facilities required to provide Local Area Data Channels, the Company will convert a customer's service requiring such facilities to a Voice Grade Service or SynchroNet service and waive the nonrecurring charges associated with the change. This applies to customers where metallic facilities are being replaced with non-metallic facilities, or a customer may elect to make this change at any time prior to a modernization program that would eliminate the availability of metallic facilities.

Local Area Data Channels are intended for baseband transmission of digital data signals between two points of the same premises or between two different premises within the same serving wire center area, not to exceed six (6) cable route miles.

- a. Provision of these channels is subject to the availability of facilities and does not envision construction of facilities expressly for this service.
- b. Transmission specifications for local area data channels are dependent upon the route length of the facilities utilized to provide the service as follows:

Maximum End-To-End Facility Length In Route Mile	Maximum Insertion Loss At 1000 Hz, In dB ¹
1	9.0
2	13.5
3	17.0
4	20.0
5	23.0
6	25.5

- c. Type 1180 is provided as a 2-wire interface with effective 2-wire facilities.
- d. Type 1182 is provided as a 4-wire interface with effective 4-wire facilities.
- e. Rates - Intraexchange

(1) Local Channel, Each

	Installation Charge	Monthly Rate	USOC

B103.2.4 Circuit Rental

(Obsoleted 06-03-91, Type B)

A. The following terms, conditions and rates apply for Circuit Rental service subscribed to by customers prior to April 1, 1990 in the exchanges of Briarwood, Dekalb, Duffee, Lynville and Obadiah (previously Hughes Telephone Company operating territory). Circuit Rental service is not available for new installations, additions, service rearrangements or transfer of service to new locations.

1. Circuit Loop Rental - Miscellaneous, including Private Line Voice, Foreign Exchange (FX), Teletype, Data, Metering, Control Channels and Alarms.
2. Circuit Loop Rental is a two-wire line or cable pair provided by the Company from the customer's premises to a different location, (police station, customer's residence, etc.) within the exchange rate area of the Company exchange over which the customer operates his own equipment.

Note 1: The Installation Charge is per channel.

B103.3 Description Of Services And Rates - Interexchange

B103.3.1 Series 1000 - Sub Voice Grade Service

- A.** Sub Voice Grade Services, as described in B103.3.1.B., B103.3.1.C., and B103.3.1.D., are designed for transmission of low speed data at speeds up to 75 and up to 150 baud within certain technical specifications. These channels are furnished for half duplex and duplex operation for use with two-point or multi-point Private Line Services. The service is not suitable for transmission of alternating current tones. Effective 8-12-85, Obsoleted Type B.

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

(N)

B103.3 Description Of Services And Rates - Interexchange (Cont'd)**B103.3.1 Series 1000 - Sub Voice Grade Service (Cont'd)**

- B.** The types of local channels and the transmission characteristics offered for termination at a premises for termination in customer-provided terminal equipment and systems are as follows.
1. Type 1050
A four wire interface engineered for binary signals at rates up to 75 baud, 20 or 62.5 milliamperes dc neutral signals. The terminal equipment with a transmitted output of no more than 8 percent telegraph distortion local and capable of processing received data signals with up to 35 percent telegraph distortion.
The Company has the option of providing 20 or 62.5 milliamperes and will notify the customer of the current level to be supplied. The Company will supply the line voltage and provide for the current adjustment. The maximum open circuit voltage across the send data leads at the interface will not exceed 270 volts.
 2. Type 1051
EIA Standard RS232B type interface engineered for binary signals at rates up to 150 baud and the terminal equipment with a transmitted output of not more than 5 percent telegraph distortion and capable of processing received data signals with up to 40 percent telegraph distortion.
- C.** Parameters and Specifications for Sub Voice Grade Local Channels used with Customer Provided Station Equipment (CPE) is discussed in B103.3.1.B. The following type specifications apply.
1. Basic Parameters With Specification Or Limit
 - a. Channel Signals
Local Channels used with CPE - as specified in B103.3.1.B. Note that the specifications of channel signals refer to the requirement of the total service offering and not the individual local channel.
 - b. Channel Distortion
Local Channels used with CPE - as specified in B103.3.1.B. Note that the specifications for channel distortion refer to the requirement of the total service offering and not the individual local channel.
 - c. Power Requirement
For up to 75 Baud Type - Where the Company provides transmission equipment at the interface. The customer must provide a source of continuous 117 volt, 60 Hz ac power by means of a nonswitched outlet.
For up to 150 baud - customer must in all cases provide a source of continuous 117 volt, 60 Hz ac power, nonswitched outlet.
The Company will in all cases supply all voltage and current adjustments.
These channels are not suitable for the transmission of alternating current tones.
- D.** Multi-point
Multi-point service is furnished subject to the condition that standard signaling and transmission may not be obtained. Special equipment and arrangements in addition to the equipment and arrangements normally provided for two-point service will be provided when feasible to meet the customer's requirements based on the charges specified in B3.7.

(D)

B103.10 Description Of Service And Rates - Customer Operating Center Service (COCS)

(Obsoleted 06-03-91, Type D; customers may continue to activate channels within their existing size of service cable.)

B103.10.1 General

A. Customer Operating Center Service (COCS) is designed for use by customers who utilize large quantities of local channels of the types specified in K.2.following between their location and the serving wire center.

B. Customer Operating Center Service is provided to customers at their option. The rates for COCS service are billed directly by the Company to the customer of COCS service.

C. For the purposes of this *Guidebook*, a Customer Operating Center is defined as a customer location:

(T)

1. owned or leased by the customer over which the customer has control and provides security.

2. from which the customer furnishes and administers services to multiple clients in a geographical area. The term "Client" denotes a subscriber to the services offered by the owner or leasee of a Customer Operating Center.

3. at which a system, or a group of systems, owned or leased by the customer whose operation is to receive signals and messages which are recorded, maintained, and supervised by the customer.

4. at which the customer has regularly scheduled observers and operators and/or equipment in attendance at all times whose duties include, upon receipt of a signal or message from a client, to take such action as shall be required under the rules established by the customer for their guidance.

D. COCS service is provided by using a complement of cable pairs in the size and length specified in K.1.following.

E. A monthly rate applies for each complement of cable pairs of a specific size and greater than 1/4 mile in length.

F. The customer will provide in advance a forecast of the complement of cable pairs he wishes to have planned to his use and agrees to payment of the charges for the complement of cable pairs whose airline distance is greater than 1/4 mile whether circuits are activated or not.

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.10 Description Of Service And Rates - Customer Operating Center Service (COCS) (Cont'd)

B103.10.1 General (Cont'd)

- G.** The monthly rate for each complement of cable pairs is based on the airline distance between the customer's operating center and its normal serving wire center. The maximum distance for COCS service is one and a quarter mile.
- H.** In addition to the monthly rate for the complement of cable pairs, a monthly rate applies for each local channel activated within the complement of cable pairs.
- I.** Basic Termination Liability
A basic termination liability will apply for any facility placed new specifically for a customer for which no reuse is foreseen if the initial use is discontinued.
The termination liability period is 5 years.
The amount of the termination liability is equal to the estimated amount for:
1. Cost of the installed facilities provided including costs incurred for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Installed cost includes the cost of:
 - a. equipment and materials provided or used,
 - b. engineering, labor and supervision,
 - c. transportation,
 - d. rights of way.
 2. Any other costs associated with the particular situation.
 3. The maximum termination liability defined preceding is reduced by 1/60th for each month of a 5 year period that the complement of cable pairs is in service from the date it is placed in service for a specific customer.
- J.** A service charge applies for a connection move or change of each local channel activated within the complement of cable pairs. The service charges are as specified in L.1.e. following.
- K.** Monthly Rates
1. Per complement of cable pairs
 - a. Distance in 1/4 Mile or Fraction Thereof
 - (1) Service Cable Size - 50 Pairs

L. Nonrecurring Charges

1. Service Charge Per Local Channel Activated

The service charge for the connection or change of each local channel activated within a complement of cable pairs is as follows:

- a. The term Service Charge as specified herein is defined as the nonrecurring charge or charges applying to the ordering, installing, rearranging and furnishing of local channels. Service charges are categorized as

- (1) Service Ordering Charge
- (2) Visit Charge
- (3) Channel Connecting Charge

b. Service Ordering Charge

- (1) The Service Ordering Charge applies per customer request for work performed by the Company in connection with the receiving, recording and processing the customer's request for local channels to be installed at the same time.
- (2) The term "per customer request" as specified preceding means all work or service ordered by the customer to be performed or provided at the same time. Only one service ordering charge applies when more than one local channel or types of local channels is ordered at the same time. When two or more types of local channels are ordered on the same customer request the higher charge applies.

c. Visit Charge

A Visit Charge applies for connecting or changing Types 2150 (2463), 2152 (2464), 2153 (2230), 2171 (2261) and 2172 (2462) local channel only. Only one Visit Charge applies when more than one Type Local Channel is ordered to be provided at the same time.

Note 1: See General *Exchange Guidebook*, Section A108. for rates for types 2106, 2107 and 2007. (T)

Note 2: These local channels are provided with a four-wire facility (2 pairs). The total number of all types of local channels that may be activated within a complement of cable pairs is limited by the number of these types of local channels.

EFFECTIVE: July 1, 2006
