A18. LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

A18.1 Directory Assistance Service

A18.1.1 General

The Company furnishes directory assistance service for the purpose of aiding subscribers in obtaining telephone numbers.

A18.1.2 Rates and Charges

- A. A charge is applicable for each inquiry for directory assistance except as noted below; each number requested constitutes an inquiry except that the first two numbers requested on any one call constitutes only one inquiry.

Directory Assistance Service - request of a telephone number - (maximum of three requested telephone numbers per call)

| | Rate | USOC | |
|--|--------|------|-----|
| 1. Outside the Company's local or expanded local calling area but within the Company's HNPA serving area for the originating line. | | | |
| (a) Per Call | \$2.49 | NA | (I) |
| 2. Outside the Company's local or expanded local calling and HNPA serving areas for the originating line ¹ . | | | |
| (a) Per Call | 2.49 | NA | (I) |

- B. Charges for directory assistance may be billed to the originating number.

- C. No operator assisted surcharge will apply in addition to the applicable directory assistance charges.

- D. Local Directory Assistance (DA) may be provided at no charge to persons who are unable to use a telephone directory due to a disability which can be confirmed by a physician or certifying agent. Directory Assistance calls will not be charged to the approved telephone number. The DA exemption applies to local listings only. The exemption does not apply to other types of directory service requests, such as requests for numbers outside of the Company's local calling and LATA/NPA serving areas for the approved telephone number. To obtain an exemption, the customer must complete the appropriate form and have it certified by a registered physician or certifying agent. Local Directory Assistance exemption is valid for a two-year period and must be renewed. Failure to provide the required documentation may result in loss of the exemption. Directory Assistance usage will be monitored by the Company and is subject to review and investigation. Misuse of the exemption by a customer could result in its removal. Directory Assistance exemption is a voluntary program of the Company that may be terminated at any time.

- E. Exchanges where charges for inquiries to directory assistance temporarily are not applicable to any subscribers due to lack of facilities are specified following:

Liberty (Cherokee County)

Waterville

A18.2 Reserved for Future Use

A18.3 Reserved for Future Use

A18.4 Reserved for Future Use

Note 1: No allowances, exemptions, or exceptions apply. This service is available where technically feasible.

A18. LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

A18.5 Airline Mileage Between Rate Centers¹

(T)

A18.5.1 General

- A.** For the purpose of determining airline mileages vertical and horizontal grid lines have been established across the State of North Carolina. The spacing between adjacent vertical grid lines and between horizontal grid lines represents a distance of one coordinate unit. The unit is the square root of 0.1., expressed in airline miles. A vertical (V) and a horizontal (H) coordinate is computed for each rate center from its latitude and longitude location by use of appropriate map-projection equations. These rate centers and their V and H coordinates are shown in A18.5.3. following. A pair of V-H coordinates locates a rate center, for determining airline mileages, at a particular intersection of an established vertical grid line with an established horizontal grid line. The distance between any two rate centers is the airline mileage computed as explained in A18.5.2. following.
- B.** For long distance message telecommunications service the rate center for a point not listed in this section is the rate center for the central office to which the point is assigned for long distance telecommunications rate purposes; where the point is not assigned to a central office, the rate center is the location of the point.

A18.5.2 Determination of Airline Mileages

- A.** To determine the rate distance between any two rate centers proceed as follows:
1. Obtain the "V" and "H" coordinates for each rate center.
 2. Obtain the difference between the "V" coordinates of the two rate centers. Obtain the difference between the "H" coordinates.²
 3. Divide each of the differences obtained in 2. by three, rounding each quotient to the nearer integer.
 4. Square these two integers and add the two squares. If the sum of the squares is greater than 1777, divide the integers obtained in 3. by three and repeat step 4. Repeat this process until the sum of the squares obtained in 4. is less than 1778.
 5. The number of successive divisions by three in steps 3. and 4. determines the value of "N". Multiply the final sum of the two squares obtained in step 4. by the multiplier specified in the following table for the value of "N" preceding.

(T)

| N | Multiplier | Minimum Rate Mileage |
|---|------------|----------------------|
| 1 | 0.9 | - |
| 2 | 8.1 | 41 |
| 3 | 72.9 | 121 |
| 4 | 656.1 | 361 |
| 5 | 5,904.9 | 1,081 |
| 6 | 53,144.1 | 3,241 |

6. Obtain square root of product in 5. and with any resulting fraction, round up to next higher integer. This is the message rate mileage except that when the mileage so obtained is less than the minimum rate mileage shown in 5. preceding, the minimum rate mileage corresponding to the "N" value is applicable.

a. EXAMPLE:

The message rate distance is required between Mount Olive, North Carolina and Raleigh, North Carolina.

| | | |
|-----------------|------|------|
| (1) Mount Olive | V | H |
| | 6393 | 1279 |
| Raleigh | 6344 | 1436 |
| (2) Difference | 49 | 157 |

- (3) Dividing each difference by three and rounding to nearer integer = 16 and 52.

| | |
|-----------------------------------|----------------|
| (4) Squaring integers and adding, | 16 x 16 = 256 |
| | 52 x 52 = 2704 |

Sum of squared integers 2960

- (5) Sum of integers is greater than 1777 so divide integers in (3) by three and repeat (4).

- (6) Dividing integers in (3) by three and rounding = 5 and 17.

| | |
|-----------------------------------|---------------|
| (7) Squaring integers and adding, | 5 x 5 = 25 |
| | 17 x 17 = 289 |

Sum of squared integers 314

Note 1: This section was removed from the General Subscriber Service Tariff effective December 1, 2005 and reinstated to the General Exchange Guidebook with the effective date of this page.

(N)

Note 2: The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.

(T)

A18. LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

A18.5 Airline Mileage Between Rate Centers (Cont'd)¹

(T)

A18.5.2 Determination of Airline Mileages (Cont'd)

A. To determine the rate distance between any two rate centers proceed as follows: (Cont'd)

6. (Cont'd)

a. EXAMPLE: (Cont'd)

(8) The sum of the squared integers is less than 1778 and was obtained after two successive divisions by three; therefore "N" = 2.

(9) Multiply final sum of squared integers by factor of 8.1
(corresponding to "N" = 2).

314
x8.1
2543.4

(10) Square root of 2543 = 50 and a fraction, which is rounded to 51 miles (fractional miles being considered full miles). The 51 miles is larger than the minimum of 41 rate miles applicable when "N" = 2 so the message rate mileage is 51 miles.

A18.5.3 List of Rate Centers
